Excellent Condition of Union Pacific Counteracts Cut in Revenue.

APRIL SHOWING REMARKABLE Though Gross Earnings Fell Off Nearly Half Million, Net Gain Exceeded This Decrease by Low Operating Cost.

The statement of the Union Pacific for the month of April is remarkable for the decrease in operating expenses, a decrease which is attracting attention in the railroad world. It is accounted for, in a large measure, by the track of the Union Pacific west, which was in such good condition at the beginning of the financial flurry, and when the wheels fell off that little work was required to keep it in shape.

Although the gross revenue of the Union Pacific fell off \$47,342.35 in April, the operating expenses decreased \$96,176.82 in the same month, making a net increase in earnings of \$48,834.47, the taxes having increased nearly \$3,000.

The gross revenue of the company was \$5,962,823.32 for April, 1908, as against \$6,414,196.67 in 1907. The total expenses of operation and taxes were \$5,913,976 this year, as compared to \$5,365,366, a saving of over \$500,000. Thus the net increase of revenue, over operating expenses and taxes, was \$488,847, or greater than the increase in gross revenue.

The road, however, although showing a gain in net for April, shows a loss for the ten months of the fiscal year ending April 30. For the ten months, the gross revenue has been \$64,061,490, an increase of \$1,274,779 whereas the expenses and taxes have been \$57,888,650, an increase of \$1,713,841. The revenue over operating expenses and taxes for the ten months shows a decrease of \$2,320,061.67.

REV. W. J. HARSHA IS DEPOSED
Former Minister of Omaha Excluded from the Church and Fellowship.
PORT WORTH—The commission in re Rev. W. J. Harsha, Kremmling, Colo., has passed judgment by which he was deposed from the ministry and excluded from the fellowship of the church.
Many Omahans will recognize in the above clipping from a church paper the name of a former minister of this city. Leaving Omaha under a cloud, he is said to have had similar experiences in Colorado, and these led to his expulsion.

CARELESSNESS OF EMPLOYEES

A Particularly Painful Subject for Discussion Among Railroad Men.

Comparatively speaking, public attention has been but slightly directed in any specific way to the matter of accidents to employees on American railroads. It is certainly one of the most distressing features to be studied in connection with the safety problem. Collisions, derailments, defective handholds and brake apparatus and the like cause injuries to great numbers of employees.

For example, at Haverhill, N. H., the other day, five employees were instantly killed through the alleged carelessness or oversight of a fellow employee. Such instances, of course, are particularly painful topics for discussion among railroad men, and yet this is the kind of an accident one reads about in the newspapers almost daily. But in twenty-four hours the reading public will forget the very worst of these accidents to employees. Their frequency takes edge off their significance.

During the year 1907, on a single American railroad, 104 employees were killed outright, and 3,675 were injured. The cost of these accidents to the railroad in question was something like \$28,000. With an employees' liability law in force and operation, as in countries abroad, the increase in total paid to employees alone on this road would have carried the aggregate to half a million dollars.

The magnitude and importance of the safety problem in relation to employees is still more evident when we consider that for the year ended June 30, 1907, the casualty list on American railroads shows a total of all persons killed, from all causes, of 5,000, and injured 72,881; the totals for employees alone being 4,333 killed and 62,097 injured.

The following figures in regard to actual train accidents and the casualties resulting therefrom show a rather discouraging state of affairs, from the fact that the employees themselves were in the main responsible for them. In 1904 the killed and injured employees in train accidents numbered 7,834; in 1905, 7,850; in 1906, 8,262, and in 1907, 9,295. As with all other items, so with accidents to employees, the total of casualties has largely increased year by year.—Atlantic Monthly

Beware of Any Physic That Brings Pain

Gripping and pain will never occur unless there is irritation. Salts and harsh pills bring their results by irritation—by causing the bowel fluids to flow. So pepper in the eyes or nostrils will cause fluids to flow. But it is wise to treat a delicate membrane thus? Do so for a time and the membrane will harden. That is how Nature wards off such attacks. The you need larger doses. Eventually the calloused bowels fall in their functions entirely. Then you have chronic constipation.

No wise person will ever abuse the bowels in that way. They will use Cascarets. Cascarets never cause pain. That proves that their action is natural. Yet they are just as effective as harsh physic.

The best-kept box is 10 cents. The month's treatment box 50 cents. 12 boxes, \$5.00, 24 boxes, \$9.00.

Special drapery bargains Monday

BRANDEIS

to see Mayor Jim. And then he had run afoul of a bottle of firewater and landed in jail.

"I want see Jim Dahman," said Sleepy Eye to the court. "You said warrior much me to see Jim Dahman. Jim my friend. Send warrior with Sleepy Eye to wigwam of Jim Dahman."

But the big chief was discharged and told he could go to see his beloved Jim without being escorted by a "warrior."

BIG ADDITION TO ST. JOSEPH'S
One Hundred New Rooms, to Cost Quarter of Million Dollars.

An L shaped addition, 232x156 feet, is to be built on St. Joseph's hospital which will cost \$250,000 and give the institution 100 additional rooms.

J. S. Nuttall, architect, has completed the plans for the building and bids are being received for the work. It is to be brick, stone and steel construction and absolutely fire proof.

Mrs. Jeannette Woolworth Howard of New York City is in Omaha for the purpose of having the big warehouse formerly occupied by the Carpenter Paper company moved to its new home and Mrs. Howard proposes to put in a sprinkler system and other modern conveniences to suit tenants.

Arthur Genius of Chicago is in the city for the purpose of having improvements made on his property, including remodeling of the flats at Twentieth and Burt streets.

Mr. Genius was formerly a prominent Douglas street milliner of Omaha and one of the first to conduct the business on a large scale. Going to Chicago many years ago, he has made good, secured by his own work a fortune and still retains much Omaha property.

One of the Old School.
The stern-faced old gentleman, who had been a school teacher in the '60s, selected a goose quill, deftly fashioned it into a pen, and wrote his letter on a single sheet of paper.

Then he sprinkled black sand over the written paper. He sealed it with a red wafer and directed it.
"I like the old way best," he said, "and it's mighty little the steel trust, the paper trust and the mucligue trust get out of me."
But he had to use something modern, and with a brown he affixed a 3-cent postage stamp.—Chicago News.

COLE SIDES WITH HANIGHEN

School Board President Thinks Investigation is Due.

SAYS ONE WILL BE MADE

Not Right that Man Who Gets Bids Should Make Plans, as the Case Seems to Be in Heating.

J. J. Hanighen, 1408 Harney street, the plumbing contractor, who complained of unfair treatment by the Board of Education on the ground that an outside firm was given the contract by the board and the power to draw plans for other competitors, has started something.

Plans and specifications for heating and ventilating apparatus in new school buildings are drawn by Sam R. Lewis who draws the plans in the same S. R. Lewis who is manager of the Lewis & Kitchen firm. Superintendent Finlayson says the man who draws the plans and specifications and who puts in the bids for Lewis & Kitchen is one and the same.

"This is all news to me," says David Cole, president of the Board of Education, "and the matter will most certainly be investigated. Mr. Hanighen makes a point. I believe, when he says that the party furnishing the plans should not be allowed to submit a bid for the construction of the work. The board meets in regular session Monday evening and this will be brought up at that time for thorough inquiry."

Superintendent Finlayson intimates that before outside bidders were invited local contractors formed a pool and forced the prices up. Now all have to bid on rock-bottom prices, and the board is saving money.

Difference in Prices.
"We paid \$18,000 for the heating, ventilating and plumbing in the twelve-room Vinson school building," said the superintendent, "while in the sixteen-room Franklin building we will pay but \$6,000, one-third as much for heating, ventilating and plumbing. None but local contractors submitted bids for the Vinson work. Lewis & Kitchen were brought in on the Franklin

work. By inviting outside bidders we have broken this pool and brought prices down, and I am firmly convinced that were it not for Lewis & Kitchen we would have had to pay \$10,000 for the work in the Franklin school building instead of \$6,000."

The superintendent of buildings says that there are but three successful makes of heat regulating devices, apparatus whereby heat is automatically turned off when a certain temperature has been attained. These apparatus are made by Johnson, Powers and Nashell, and specifications call for one of these. Local contractors are as well able to obtain them as foreign bidders, he says.

President Cole has instructed Secretary Burgess to investigate the complaint of the local contractor and to make a full report of his findings to the board when it meets.

work. By inviting outside bidders we have broken this pool and brought prices down, and I am firmly convinced that were it not for Lewis & Kitchen we would have had to pay \$10,000 for the work in the Franklin school building instead of \$6,000."

ALLEGED BLACKMAILER UP
Man Who Seeks Money by Threatening Letter is Arraigned in Police Court.

Frank Hobart was arraigned in police court Saturday on the charge of blackmail, waived preliminary hearing and was bound to the district court under \$500 bond. Hobart is accused of having written a threatening letter to Mr. and Mrs. Gottlieb Anderson, an elderly German couple living at 1328 North Eighteenth street. The letter was signed with skull and cross-bones and stated that unless \$100 was given to the boy who brought the letter the house would be burned down. The police were at the Andersons house when the boy called the second time for the money and arrested him, later securing Hobart through the guidance of the boy.

PRATT FARM ATTACHMENTS
Papers Secured by Bank Are Confirmed by Judge Redick of District Court.

The attachment secured by the Omaha National bank on the farms of Colonel J. H. Pratt were confirmed Saturday morning by Judge Redick. They cover his Brunning ranch and the farm in Washington county and are to secure a judgment for \$23,828.35 claimed by the bank for money loaned to Colonel Pratt. The Douglas county farm has been appraised at \$12,750 and the Washington county place at \$60,000, according to the petition. Colonel Pratt began borrowing the money in October, 1903, shortly after he returned from his wedding trip after his marriage to Mrs. Julia Montgomery Pratt.

FRACTION OF FLOOD STAGE

River Still Rises, but No Danger Occurs or is Seriously Feared.

FARMERS ARE ON LOOKOUT

East Omaha and Florence People Are a Little Uneasy, but So Far the River Has Done No Harm.

The Missouri river Saturday morning marked a rise of half a foot, making the stage now 17 1/2 feet. Just a bare twentieth of a foot from the flood stage of eighteen feet. And the river is still rising. Half a foot rise is reported from the Blair bridge and a stationary stage at Sioux City. The river is consequently one-tenth of a foot higher than at the high water stage of June of last year.

No trouble has thus far manifested itself at Florence lake, Cut-off lake or at East Omaha, but the people up there are getting a trifle anxious. A rise of another foot might make things inconvenient at East Omaha and at the same time cause some anxiety at Florence lake. The river has in recent years reached a stage of 18 1/2 feet without a flood and it is believed this stage, if reached during the present high water, will not cause any material damage to the river front at Omaha.

The same general rise is noted southward from Omaha and reports are coming in of lowlands being flooded on the Iowa side above Plattsmouth.

The rainfall at Omaha, Friday night, was but 10-100 of an inch and light rains fell at other points in the Omaha district, but was not sufficient to cause any rise in the river from these rains. A high barometer prevails in the mountains and is moving eastward, which may presage a cessation of the rains.

River authorities are of the opinion the crest of the rise in the river will be reached by Sunday and from the fact that it is stationary at Sioux City, any further rise will be relatively very small.

CHIEF WANA TO SEE OUR JIM
Sleepy Eye Treks All the Way from Oklahoma to Meet Mayor Dahman.

It was a shame to arrest Chief Sleepy Eye.

All the way from Oklahoma he had come
