Less than three weeks after the hous pened the firm was looking for a factory ite in Omaha. Four weeks after th ning of the sales agency, the company unced that at no distant time a facory would be crected, as Omaha had the key to a territory so vast that figures seemed to lie. The present deal means that he largest independent cracker company n the world will make Omaha joint owner with Kansas City in the plant and 125 persons will be employed by the new factory omaha as a start. The opening of the Loose-Wiles Cracker

and Candy factory in Omaha interferes in to way with L. Iten & Sons of Clinton, Ia who have determined to open a cracker factory in Omaha not later than August and have bought a building for \$50,000. which is now being equipped with the atest machinery for making crackers. Last year the National Biscuit com commonly known as the "cracker closed its factory in Omaha rust." arbitrarily and the independent manufacturers have taken advantage of the situation. Where the so-called "trust" has thrown 125 people out of work, the independent manufacturers have promised work to more than 300, and just now the goods of I. Iten & Sons and the Loose-Wiles Cracker and Candy company are the only crackers on the market fo Omahans,
