GRAIN AND PRODUCE MARKET

Firmer Cables and Bulls Stubbornly Put Wheat Higher.

UNFAVORABLE REPORTS COME

Dakotas and Whole Northwest Send In Reports Favorable to Bull Side of Market-Corn in Also Strong.

OMAHA, July 10, 1908. Reports from the Dakotas and generally brough the northwest wheat section con-

Firmer cables and good support by the built interests stubbornly put wheat higher. Corn also showed exceptional strength on strong cash demand and light receipts. With few exceptions traders savored the With few exceptions traders savored up side to all options and values higher.

higher. Wheat opened steady to ½c higher on unfavorable reports from the northwest and with firm cable values were well sustained and well supported throughout the session. July wheat opened at 86½c and closed at 85½c.

closed at 85%c.

Corn was exceptionally strong, supported by a strong buil movement, induced by light receipts and a very strong cash demand. July corn opened at 70%c.

Primary wheat receipts were 299,090 bushels and shipments were 200,000 bushels, a gain over receipts last year of 427,000 bushels and shipments of 125,000 bushels.

bushels.
Corn receipts were 208,000 bushels and shipments were 515,000 bushels, a gain over receipts last year of 455,000 bushels and shipments of 560,000 bushels. Clearances were 225,000 bushels of corn, 1,000 bushels of oats and wheat and flour equal to 120,000 bushels.
Liverpool closed % to %d higher on wheat and % to %d higher on corn.
Seabord reported 96,000 bushels of wheat taken for export. taken for export.

CHICAGO GRAIN AND PROVISIONS Features of the Trading and Closing

Prices on Beard of Trade.

CHICAGO, July 10.—The local wheat market closed weak today owing to liberal realising sales, final quotations on the September delivery being down tyotic. Continued belief the close of a nervous session during which a large volume of business was transacted. The unresponsive tone of the Liverpool market, prices for wheat on that market being only a trifle higher notwithstanding a sharp advance here jesteragy caused considerable selling here at the opening, which resulted in a slight dip during the first few minutes of trading. Commission houses, however, were active tidders and this soon caused a sharp raily, prices advancing about ic before the end of the first half—hour. For a time sentiment in the pit continued buillish, inspired to a large extent by unseasonably high temperature in, the northwest, particularly in North Dakota. The market weakened again in the final hour owing to quite general profit taking and closed weak at almost the lowest point of the day. Spaning in the final hour owing to quite general profit taking and closed weak at almost the lowest point of the day. wheal and flour were equal to 119,000 bu.
Exports for the week, as shown by Bradstreets, were equal to 2,730,000 bu. Primary receipts were 28,000 bu., compared with 137,000 bu. the same day a year ago. Minneapells, Dubuth and Chicago reported receipts of 197 cars, against 215 cars last week and 385 cars a year ago.

The corn market was strong throughout the session, owing to active demand by shorts and leading bulls. At the top prices were some 2025 cabove the low point of the day. The upturn seemed to be due to the oversold condition of the market rather than to any news of a builsin character. Weather conditions were extensely favorable for the new crop and damage reports were few. The market reacted a bit from the top, but closed strong. September opened \(\)c lower to \(\)c \(

Traders Are Confused.

Decline Induced by Realizing Develops Aggressive Demand, Which Sends Values Unward-Drop

on Large Offerings.

NEW YORK, July 10.-The tone of the stock market was irregular again today and the professional traders were a good deal confused by the obstacles they enand the professional traders were a good deal confused by the obstacles they encountered in the movement of prices in both directions. The start was lower than last night, the disposition being apparently to take profits on the action of the democratic national convention. There has been buying of stocks recently on the assumption that with the uncertainty over the two candidates definitely removed there would be some outside demand for stocks aroused. At the lower level induced by this realizing an aggressive demand developed and prices advanced vigorously. This movement had not proceeded far when stocks began to be offered in a volume and with a persistence the augured some large participation in the market on that side. Seiling orders in several separate stocks came from an individual source in 5,000 to 20,000-share portions, and this led to a supposition that plunging operations were being renewed on the part of a recent spectacular performer in the market. Some of the stocks which have figured most prominently in the week's rise were affected by an exhaustion of demand at the higher prices to which they have been carried, and the prices gave way easily before realizing sales. This was particularly true of American Smelting. Amalgamated Copper and the two Hill railroad stocks, which were strong yesterday, and United States Steel preferred, which rose buoyantly on a previous day. The sentimental effect of these weak points was considerable, and there was no such conspicuous point of strength to offsel as during other periods of realizing during the week. The general list, therefore, showed more sympathy with this weakness than yesterday.

more sympathy with this weakness than yesterday.

There was a sudden drop in the rate of activity of the market during the midday period, after a first hour's business larger than for any day of the week. News of the factors were not important. The maintenance of the Baltimore & Ohio dividend came in for further discussion and for some criticism on the ground of the incursion into the profit and loss surplus to pay it. The responsibilities for the decision of the dividend question was attributed to the leading interest in the property and in the belief that this interest was identical with the principal force back of the stock market movement in May, it was assumed that the same purpose to conserve the price level of stocks was thus expressed. The feature of the estimates of the week's currency movement was the contribution to the week's estimated gain of the subtreasury operations, notwithstanding the large payments made by the national banks to that institution in response to the call for return of government deposits. The banks have gained cash from this source since the last bank statement of \$2.071.800, and receipts from the interior are believed to have brought the total gain to nearly \$4.000.000. This marks some decline in the rate of the flow from the interior, and with the winter wheat crop beginning to move, this shift in the current of the currency movement may be expected to increase. June agricultural exports were only \$2.748.000 less in value than last year, and with the continuance of the shrinkage in imports a substantial trade balance in favor of this country may be locked for, with consequent bearing on the exchange situation. The appearance of support in the market disappeared in the liste dealings and the closing tone was weak.

Bonds were irregular. Total sales, par value, \$2.45.000. United States bonds were unchanged on call.

Number of sales and quotations on the Stock exchange were as follows:

Sales, High, Lew Close.

Amalesmated Copper ... 35.50 704, 634, 684 yesterday. There was a sudden drop in the rate of

Poreign Financial.

LONDON. July 10.—Money was plentiful but in small demand, with the market easy. Discounts were easy. Trading on the Stock exchange relapsed to duliness, most of the attention being paid to the settlement which commences today. Gilt-edged securities eased in the absence of investment buying and home rails yielded on realizations, the anticipation of reduced dividends and the gaport of the closing of a large account. Grand Trunk, as well as Mexican rails, were affected on poor traffic returns. American securities, after adjustment to parity and showing the strength on the Baltimore & Ohio dividend, sugged under realization, but the New York opening, with fair buying, caused a recovery in the afternoon and the market closed firm, alightly below the best.

BERLIN, July 10.—Prices on the Bourse today were firm and trading was quieter. PARIS, July 10.—Trading on the Bourse today was irregular. today was irregular.

Bank Clearings. OMAHA, July 10.—Hank clearings for to-day were \$1,542,699.25 and for the cor-responding date last year \$1.584,411 \$7. Duluth Grain Market.

and Arouse Anticipa-

tion

"The man who has awakened each day to the ingolent ringing of an alarm clock, who has hastily washed himself, bolted a breakfast, and then made a mad dash to reach his deak by 8:20," says John T. Mc-Cutcheon in Appleton's for July. "He is the man who knows the real meaning of summer vacation. It is a Utopia, where there are no slarm clocks, where one may get up when he pleases, and issue a defi to the boss every day during the entire period of his outing. In his mind's eye, vacation means summer skies, and rest and lay, and freedom from care.

The things that would be work if he ad to do them become pleasant outing experiences. He wears his old clothes, goes unshaven, sits for hours in the hijstering sun, is devoured by mosquitoes, gets up at dawn because the fishing is good in the early morning, cats a cold lunch, and thinks he is having a lovely time. He will sleep on a hard bed in a broiling room next to the roof and enjoy it beyond words. If he had to do any of these things he would declare a strike. But not being compelled by some tyrannical base, he enjoys it thoroughly. At the end of two weeks he will be tired out, and will drag himself back to work, rather glad to get settled down to the regularity of daily work, but not willing to admit to a soul on earth that he has not had a cerbing time. For weeks he will tell his friends down at the store, or the factory, all the wonderful things that he did 'up at the lake.' It's the 'change' that makes the vacation time so delightful in memories and so beneficial

in health. vacation enjoyments the minute they get off the train, in order to make the most of the time. In ten minutes the trunk is unnacked a nair of flannel transcers and a rakish hat from the year before are dug in the "ads." In an hour he is playing a game of tennis, in two hours he has explored the entire region for a mile around, and in three hours he is writing post cards to the luckless ones who were left believed, The next morning he is down at the postoffice, inquiring for letters from honic, or briskly reading papers descriptive of

yesterday's ball gamen back in town.

in the woods. Of all vacations, there are few that have an appeal to the tired cits' slave like that of a vacation in "tha woods." The tiny woods. What a purture of wholesome out-of-door life tha words suggest. A picture of untrammeled freedom of "roughing it," of majestic forest aisles, and velvety floors of pine needles. A long log cabin with bunks and a big general ecting room, with a great fireplace about which to sit in the evening! A silver take and a golden noon that shines down on you as you drift with some one, very pretty and temporarily very dear, in the hoat with you. That is the picture that entires the shop-worn denizen of the busy places."

MODEL HOME OF TOMORROW Will it Be of Cement and Without Chimney, as This Paper Predicts! A house of cement: a house without a

chimney; a house with plenty of artificial light and heat and yet without a bit of fire; a house without coal; without ashou; without dangerous gases; such is to be the house of tomorrow. This is indeed an ideal house, and if

is not impossible to have, for, with little trouble, one has just been completed at Carrollton, Ill. While this wonderful home is the only one of its kind in the world, it is a good example of what the average American home will be in a few years from now. Wood is fast becoming too scarce and too high in price to be used as common building material, and the time is already here when, for economy's sake architects and contractors are figuring to construct all buildings of steel and concrete. As the supply of coul diminishes the cost is advancing so that everything possible is being done to husband the supply and to see that none of the precious stored heat is wasted. Electricity, generated by water power, is even now taking the place of coal as a source of power and the time is not far distant when it will rank first as a source of heat.

This model twentieth century home at Carrollton is thiry-four by thirty feet two stories high, with attic and basement, and has eight rooms on the two main floors. While Edison's idea of a contrate floors.

WATSON IS NOTIFIED Committee Breaks News to Caudidate of the People's Party.

ATLANTA, G., July 10 .- Thomas F. Watson of Thompson, Ga., candidate of the People's party for president of the United States, was formally notified of his nomination by the committee appointed by the St. Louis national convention at a inrgely attended meeting of the populists in this city last night. The notification speech nas delivered by Judge J. W. Forrest of Albany, N. Y.
