The percentage of actual reserve of the clearing house banks at the close of business yesterday was 28.97.

The sistements of banks and trust companies of Greater New York, not members of the New York clearing house, shows that these instituutions have aggregate deposits of \$991.946.900; total cash on hand. \$97.713,300, and loans amounting to \$905.746.100.

The apparent loss in bank clearings for the current week as reported by Bradstreet's is not real. Bradstreet's report is for the week ending Thursday night. This week a day was lost on account of July 4 whereas last year the holiday came during the week before the week with which comparisons were made. The report is therefore comparing five days against six days.

ment and pretty inuch every most shad changed hands by 10 o'clock in the morning.

The receipts of hogs this week have shown a very heavy falling off as compared with the previous week, being the smallest of any week since the first week of April. That receipts are lighter this week has occasioned no surprise, as a heavy falling off had been anticipated for this time, when the farmers are busy not only with their corn, but with haying and harvesting. Moreover, it was generally supposed that the supply of marketable hogs had been very materially reduced. The market throughout the week has been in very satisfactory condition. While prices have fluctuated back and forth to some extent, the general tendency has been higher, and at the close of the week the market is right around 5c higher than it was at the close of last week.

of the receipts locally and the condition, of the receipts locally and the condition, prevailing at other selling points. Eastern mutton markets have been in bad shape, packers claiming that it is almost impossible to force muiton into the hands of consumers. Excessive hot weather prevailing at large eastern consuming centers, together with the fact that a good many men are out of work and business conditions none too good, has had the natural result of reducing the demand for meat products. However, with prices on live sheep as low as at present, it would seem as it consumers would be able to use the muiton.
