TOKIO, July 12 .- The news of the action the exclusion from the United States of time. Asiatic laborers, is taken here to be di-

In some quarters indignation is expressed and the declaration is made that such a clause is an infringement on the treaty rights of Japan and opposed to the principle of humanity that should govern the relations of nations. It is generally believed, however, by those familiar with political conditions in America that the majority of democrats are not anti-Japanese in sentiment and that the exclusion clause was incorporated in the platform for the purpose of satisfying the labor element.
