Protest Overruled and Tug of War to England-Champion-

LONDON, July 17 .- The American athletes are thoroughly disgusted with the treatment accorded them by the officals of the Olympic sames.

It is hoped that in the interest of the surcess of future Olympics the higher officials will do something to stop the unfairness with which the Americans allege the officers of the Amateur Athletic arsociation, who are conducting the games, are

fused also to allow the pole vaulters to dig a bole for their poles, although the Americame claim this has been the practice at all previous revivals of the Olympic games.

The original idea was to offer a trophy for the country securing the greatest number of points in all games, those held in the Stadium and those played at various clubs, such as the tennis at and the rifle matches at Bisley, but the difficulty of arriving at an equitable method of allotting the points was so great that the idea has been dropped. The committee worked out several schemes but each was open to so many objections on account of unfairness to one nation or another, and the attempt to reach a fair basis having been found quite impossible the British Olympic association had to de-

DUN'S REVIEW OF TRADE

Improvement in Business Conditions Slow But Steady.

RETAIL STOCKS ARE LIGHT

Preparations for Fall and Winter Distribution Are Most Active in the West-Steel Situation is Good.

NEW YORK, July 17 .- R. G. Dun & Co.'s weekly review of trade tomorrow will say:

will say:

Improvement is slow. Current retail trade is of fairly good proportions for the season and inventories indicate that recovery is not menaced by heavy stocks. Preparation for fall and winter trade is most active in the west, but there is a growing feeling of confidence in the future that is stimulated by good progress on the farmins.

More business is coming to the steel firms. That sentiment is improving more rapidly than actual conditions is shown by the rapid rise in prices of securities of this industry, the common stock of the largest producer attaining the highest quotations of 1908 thus fur. Sales of pig iron are not large, but numerous small orders aggregate a fair tonnage, the largest contracts coming from eastern cast iron pipe interests. Moderat orders for structural steel and railway equipment are reported and the only decreased activity is at hot mills of the tinishing departments. The shutdown will only continue long enough to remove the accumulated stock.

Primary markets for cotton goods are extremely quiet, buyers evincing no diswill only continue long enough to remove the accumulated stock.

Primary markets for cotton goods are extremely quiet, buyers evincing no disposition to operate and it is probable that concessions would be made to secure business, although no actual sales are recorded at lower prices. Inventories denote that stocks have been reduced to a point which relieves pressure, normal conditions being much nearer approached than earlier in the season. Export trade has decreased, offers from China falling short of the views of holders. Buyers are numerous in the Boston footwear market and a substantial volume of business is being placed. Interest centers in men's heavy goods, chiefly of gray stock. Most factories have started on full time, but contracts on hand cannot maintain this headway very long and continued activity depends on supplementary orders. Leather is firm, but rather quiet. Hides are firmly held. Foreign dry hides are fully maintained, extensive operations by Europeans giving a strong tone to River Platte markets.

BRADSTREET'S REVIEW OF TRADE

Good Crop Prospects Stimulates Preparations for Fall Business. NEW YORK, July 17 .- Bradstreet's re-

view of trade will say: Trade and industry are still in a condition of midsummer quiet with preparations for fall trade stimulated by generally good crop progress and with conservatism ruling operations. Activity in retail trade is centered in the disposal of surplus stocks of summer goods at concessions, but reduced public buying ability is reflected in reports from some centers of progress in clearing shelves of goods. Jobbing activity is still confined to filling small but frequent repeat orders for summer fabrics, although a few southern and northwestern points report enlargement of orders for fall delivery. Wholesale trade is preparing for future requirements, but primary lines of production are running within control and curtailed outputs are still a feature in mest lines of industry.

There is a little more life in building lines, particularly south and west, and yellow pine is firmer with optimistic predictions from southern and Pacific northwestern lumbermen.

Americans Disgusted with Treatment

ship Not to Be Decided.

The secrecy with which the drawings for the track events were made and the result of this system, whereby the test Am rican funners were put in same heats, was bad enough, they say, but now the unfairness in the tug-of-war today between an American team and a United Kingdom team, in which the officials allowed the United K agdom team to compele with prepared sho s, contrary to all rules, has disheartsned the American contestants. James E. Su'livan, American commissioner to the games, has entered a vigorous protest, and
