BRADSTREET'S REVIEW OF TRADE Mobile Good Crop Prospects Increase Con-

NEW YORK, July 24.—Bradstreet's tomorrow will say:

Good crop reports, the advance of the season and growth in confidence as to the trade outlook are reflected in reports of moderate enlargement of future buying at a few large centers, notably in the west and southeast. Industrial lines, too, have been benefited by evidences of revival in demand and the number of idle operatives has been reduced as a whole. Still the progress making is of a very conservative kind, curtailment of industry is still a marked feature and small orders for immediate shipment largely make up the volume of business doing by jobbers. Retail trade is fair as a whole, being stimulated by price reduction sales, though complaint of stocks not moving rapidly come from some cities, and collections show little, if any, improvement. The best reports come from the central west, northwest and southwest and the excellent outlook for the cotton crop makes for a better tone of advices from the south. In the leading industry there is noted a more cheerful feeling in iron and steel, though transactions in pig fron are smaller than in recent weeks. Numerous resumptions of car shops are a feature, and the number of idle cars has unquestionably been reduced by the liberal movement of wheat to market. The coal trade is rather duil. Lumber has a better tone and there is more doing in building at many cities. The reduction in prices of prints has induced freer sales of this product, but curtailment of production in this line is still enforced.
