CRAIN AND PRODUCE MARKET

Wheat Started Dull and Worked Lower, with No Demand.

EDGE IS OFF BULLISH ADVICES

all Options Ruled Dail During the Day, but Gradually Worked to a Higher Level-Closing Prices.

OMAHA, July 29, 1908.

OMAHA. July 29, 1908.

OMAHA. July 29, 1908.

The loss of yesterday, but show very little strength, owing to a lack of buying power. Heavy long lines were disposed of and the edge was well taken off of any bullian advices.

All options ruled dull during the day, but gradually working to a higher level. Wheat started dull and worked a triffe lower with no one to take offerings after the rush of selling yesterday. Reports of increased demand in southern markets and larger shipments gave strength later and values closed up. July wheat opened at 80%c and closed at 85%c.

Corn opened weak, with light demand and feeling the weakness in wheat. Corn is moving very show and country arrivals are lighter than usual. Interest is slack and very little activity is noticeable. Some buying at the close firmed prices and values closed sightly higher. July corn opened at 16 and closed at 11%c.

Primary wheat receipts were 1115,000 bushels and shipments of 35,000 bushels.

Corn receipts last year of 775,000 bushels and shipments were 445,000 bushels, against receipts last year of 80,000 bushels and shipments were 445,000 bushels. Clearances were 45,000 bushels and shipments of 184,000 bushels of corn. 1000 bushels of oats and wheat and flour equal to 332,000 bushels.

Liverpool closed unchanged to %d lower in wheat and %d higher on corn. Seaboard reported 304,000 bushels of wheat taken for export.

aken for export.

WEATHER IN THE GRAIN BELT Fair and Cooler for Thursday is the Glad Tidings.

Glad Tidings.

OMAHA. July 29, 1908.

The weather continues very warm everywhere east of the Rocky mountains. Light and widely scattered showers occurred in the central valleys and eastern states within the last twenty-four hours and some heavy rains fell in the guif and south Atlantic states. The pressure is relatively high over the eastern portion of the country, with a trough of low pressure extending south from the upper Missouri valley over the eastern Rocky mountain slope. An area of high pressure, with cooler weather, is moving in over the northwest, and the indications are for fair in this vicinity tonight and probably Thursday, with cooler Thursday.

Omaha record of temperature and precipitation compared with the corresponding day of the last three years:

NEW YORK STOCKS AND BONDS

Interest in Market is Apathetic and Volume of Dealings Diminishes.

ATTEMPT TO LIFT VALUES FAILS Every Bid at Advance Brings Out Offerings-Close is Irregular-

Bond Market is

Stendy.

NEW YORK, July 29.—Interest in the stock market became apathetic today and there was a material contraction in the volume of dealings. The speculative tone at the same time was heavy. Early attempts to advance prices soon developed that stocks were being supplied to meet the bids at the advanced prices. This supply of stocks diminished at a moderate recession and left the market in a duil and singish condition. There was no encouragement to bid up prices with the obstacle to be met of free selling orders above the market. On the other hand, there was no such urgency in the selling as to encourage the bear party to offer prices down. The passing of several events which have been looked forward to was partly accountable for the neglected condition of the market. The publication of Judge Taft's letter of acceptance, the quarterly report of the earnings of the United States Steel curporation and the declaration of the regular dividends on the Harriman Pacific roads approved to have spend the states. earnings of the United States Steel corporation and the declaration of the regular dividends on the Harriman Pacific roads proved to have spent their force largely as market factors with their publication. The supplementary statement given out with the report of steel carnings showing an advance in the average daily booking during July to 72 per cent of the capacity of the works was accepted as the most important item in the statement for its speculative bearing. But even this was regarded as having prompted the large accumulation and the advancing price in the stock which has occurred during July. With these various items of news out of the way the market showed its usual desire for new factors to point the next step in the speculation. The day's news did not supply this factor. Some disturbing effect was produced by the confused reports circulated early in the day of a supposed serious automobile accident to William K. Vanderbilt. Some recovery followed when the reports were known to refer to a mishap in which the capitalist had not been the reports were known to refer to a mis-hap in which the capitalist had upt been involved. There was some waning of ifinvolved. There was some waning of interest in the rumors concerning the adjustment in the affairs of the Gouid railroad properties in connection with the \$5,000,000 Wheeling & Lake Eric notes failing due on August 1. The steps to be taken to meet this obligation were made a mystery of and the information on the subject consisted of rumors that bankers were in consultation over the details of the plan. The reticence of the supposaci parties to the plan was believed to be due in part to the tactics of negotiations. An upturn in the wheat market was made the occasion of reports of damage to shipping wheat in the northwest. There was

in part to the tactics of negotiations. An upturn in the wheat market was made the occasion of reports of damage to shipping wheat in the northwest. There was nothing to indicate a marked change in the conditions of the crops. The estimates of private experts on the cotton crop promise an improvement of condition for the month to be shown by the government report soon to be issued.

With the decline in activity in stocks there has come a languishing in the interest in the bond market, which was made the cause of some puzzled complaints on the part of bond dealers. The new output of bonds has been sufficient apparently to supply the present demafd. The prices at which bankers hold the new issues also is held by the bond dealers to be unduly high. The new Central Pacific first refunding 4s when issued are being dealt in on the curb and have dropped to below the price at which they were taken from the bankers, thus duplicating the experience with the Union Pacific refunding 4s. The strength of the metal gave strength to the copper industrials. The irregular flutuations continued throughout.

Bonds steady. Total sales, par value.
