Well, our rush of work is over. A more pleased man than Colonel Crowder on the day following the election I never saw. He was all smiles and he certainly deserves a good deal of credit for the masteriy manner in which he has conducted the whole affair. It was no small task to hold combined elections under a new law entirely unfamiliar to the men who had to be called upon to administer it, and it is certainly gratifying that under such trying conditions the elections should prove an unqualified success. That they have been honest and clean is generally admitted. Kicks have been few and far between, and as a rule were found upon investigation to be groundless. Of course in a very few instances defeated candidates have not taken their medicine gracefully, but even in these cases the matter has been disposed of summarily. Most people—I among them—rather anticipated election troubles, especially in the rural districts, but the day passed without a hitch. In San Jose de las Lajas, the candidates for mayor of opposing parties who were bitter enemies before election, met in the street. One of them shot at the other without effect. The two men were arrested and landed in the station house, and that was all. I presume this will give the vellow papers an opportunity to display big headlines all about serious election riots and bloodedhed at the Cuban poils. As a fact, we have not received a report of any serious violence anywhere on the island as an outcome of the election."
