AFFAIRS AT SOUTH OMAHA

Too Much Hilarity Causes Trouble for a Trio of Men.
TAPERS INTO FIGHTING MOOD
Packing Plants Scene of Two of the Outbreaks and the Third Starts a Rough House in Brown Park.
Three men, John Long, J. Maher and A. Smith, each got into more than the usual amount of trouble yesterday from over-indulgence in their appetite for drink, John Long was arrested for resisting the order of a special officer at the Cudahy Packing plant. James Maher is said to have threatened a Mrs. Rose of Brown park. He is said to have knocked on the door and called to the woman to open it or he would break it down and injure her. She called the police before he had attempted to carry out his threat. He was found to be carrying a weapon.
A. Smith was arrested for fighting with Ed Holman, one of the watchmen of the Omaha Packing plant. He brought a friend to the plant who was too much intoxicated to work, and later, criticized the officer for refusing him admission to the plant. This led to a fight, in which many blows were struck on each side and the watchman received severe bruises. Later Smith was found near a blacksmith shop at the Union Stock yards and placed under arrest. The trial will be this morning. Long was yesterday fined \$50 and costs.

CHOLERA AT ITS MAXIMUM

Plague at St. Petersburg Will Be Checked by Cold Weather.
MANY BODIES UNBURIED
Grave Diggers Are Unable to Keep Up with Steady Stream of Coffins Reaching Cemetery.
ST. PETERSBURG, Sept. 26.—The cholera epidemic in St. Petersburg, in the opinion of the experts has reached its maximum and now the number of new cases daily is expected to remain about stationary for a week or ten days, and then to gradually decline, under the influence of the cold weather.
Little progress has been made in cleaning the courtyards of tenements, the factory districts, the slums and other breeding centers of the disease, and the necessary conditions exist for a renewal of the epidemic in the spring.
A visit today to the Preobrazhenskaya cemetery, where most of the bodies of the victims are being interred, disclosed the fact that the burial spaces are still unable to keep pace with the number of dead received there.
In a shed near the entrance to the cemetery, were found about 150 coffins, piled in a confused heap. Some of them, according to the statements of attendants, have been awaiting burial for a week. Sixty or seventy more caskets were stacked outside the cemetery chapel, while inside that building were the coffins of 130 victims for which the influence or importunities of relatives of the dead has secured the privilege of immediate burial. The majority were rude board boxes with gaping cracks and knot holes. The mourners, in the main, were of the peasant and working classes and all were poorly dressed. Their grief was frantic.
At various places in the graveyard squads of weary sextons labored incessantly at graves—shallow holes barely three feet deep, into which water oozed from the sodden earth. The coffin-bearers pressed the grave diggers hard, the coffin sometimes arriving before the digger had ceased plying his spade.
The funeral services in the chapel were conducted over 100 dead at one time, a number of priests taking turns at chanting the long Russian liturgy. As soon as the service was finished, a group of peasants dressed in their working clothes, shouldered the caskets and bore them off to the place of interment, followed by the mourners. Priests were scattered among the graves, two by two, and said a short prayer and chanted the usual responses as each coffin was lowered into the earth. The sanitary precautions taken were slight. The mourners and workmen handled the coffins freely and the graves are so shallow as to offer danger from infection for years to come.
Talks About Bubonic Plague.
WASHINGTON, Sept. 25.—That the Gulf and Atlantic coasts of the United States are in danger of an infection of the bubonic plague was the serious note of warning sounded today by Dr. N. K. Foster of California, before the delegates in attendance on the twenty-third annual meeting of the conference of State and Provincial Boards of Health of North America. He expressed the belief that such an infection may have already taken place. The address of Dr. Foster, who is president of the organization, startled the delegates.
"I firmly believe," said Dr. Foster, "that the United States will become generally infected, not from California, but from ports having communication by water. My object is to sound a note of warning and to put you on your guard against an insidious and dangerous foe."
He said no effort should be spared to guard against its introduction and warned the authorities that every town on the Gulf and ocean coasts should begin now to destroy rodents and prepare for the invasion threatened.
A resolution memorializing congress to establish a national leprosyarium was introduced, but no action was taken. Papers were read which included "The Present Status of National Legislation Relating to Public Health," by Surgeon General Symant; "A Course of Instruction for Sanitarians and Sanitary Inspectors," by Dr. F. F. Westbrook; and by Dr. S. D. Grubbin on a law regulating country slaughter houses, etc., with provisions for a licensing system with fees.
The conference adjourned until tomorrow.
Advertise in The Bee, the paper that goes into the homes of the best people.

TEMPERANCE PEOPLE PARADE

Chicago Witnesses Display of Strength of Enemies of Liquor Traffic.
CHICAGO, Sept. 26.—Temperance hosts paraded the streets of Chicago today in what was intended to be an annual exhibition of the strength of the foe of liquor. Thousands of marchers were in the parade which traversed the downtown streets. Churches of almost every denomination were represented, the Salvation Army and the Volunteers of America contributed almost their entire local strength, the Good Templars and other temperance organizations had thousands of members in line and scores of the prominent clergymen of the city as officials of the parade.
Several of the temperance organizations had elaborate floats while a score of bands were scattered among the marchers. Spectators lined the streets through which the parade passed.

S.S.S. THE CURE FOR SCROFULA

Swollen glands about the neck, weak eyes, pale, waxy complexion, running sores and ulcers, skin diseases, and general poor health, are the usual ways in which Scrofula is manifested. The disease being deeply entrenched in the blood often attacks the bones, resulting in White Swelling, or hip disease, and the scrofulous and tubercular matter so thoroughly destroys the healthful properties of the blood that Scrofula sometimes terminates in consumption, an incurable disease. The entire circulation being contaminated, the only way to cure the trouble is to thoroughly purify the blood and restore the circulation to a strong, healthy state. S.S.S. is the very best treatment for Scrofula; it renovates the entire blood supply and drives out the scrofulous and tubercular deposits. S.S.S. is the greatest of all blood purifiers, and it not only goes right down to the very bottom of the trouble and removes the cause, but it supplies the weak, diseased blood with the healthful properties it is in need of, and in this way builds up weak, frail, scrofulous persons and makes them strong and healthy. S.S.S. is a gentle, safe, vegetable preparation. Book on the blood containing information about Scrofula and any medical advice free.
