

SECOND SCIENTIST CHURCH

New Organization is Incorporated by Some Members of First.

STARTS OUT WITH THIRTY-TWO

Some Difference of Opinion as to the Building of the Church Home

Omaha Christian Scientists have formed a second church, to be known as the Second Church of Christ, Scientist, and articles incorporating this new body have been filed with the county clerk.

Members of the First church who are not in the new organization were surprised to learn of the formation of the Second church as the matter, it was said, had not been discussed very freely outside of those immediately interested.

Before the formation of the Second church it was known there was considerable difference of opinion growing out of the building of the proposed church building.

FRANKLIN'S MAXIMS UNIVERSAL

"Poor Richard's" Sayings Became More Than Current Proverbs and Endured.

The maxims of "Poor Richard" are often merely current proverbs, but the wording in which Benjamin Franklin clothed them has endured, and they are therefore usually credited to him.

Benjamin Franklin entered the printing business soon after his arrival in this city, and on October 2, 1773, issued his first number of the "Pennsylvania Gazette."

As every printer in the colonies published an almanac, Franklin issued his first number in 1772, under the name of Richard Saunders, "Poor Richard," as the people called the almanac.

It was in this style, and in this way on the pages of his almanac, Poor Richard gave to the world the hundreds of maxims which are now almost universally quoted.

In order to devote more time to study, Franklin, in 1776, sold his newspaper, almanac and printing house to David Hall, one of his employees.

Franklin's Philadelphia printing office was established in the rear of 12 market street, and today he lies buried only a few blocks away from Fifth and Arch streets, in a grave unpretentiously marked.

of its lettering and gildings, lies here, food for worms. But the work shall not be lost, for it will, as he believed, appear once more in a new and a more elegant edition, revised and corrected by the author.—Philadelphia Press.

EVEN SCIENCE GIVES IT UP

Power of Love Revives Brain Which Was Dead for Sixty Hours.

Mrs. Harry Cohn's brain had been dead for sixty hours.

It came to life again and the woman who had been lying in a death-like coma sat up and smiled into her husband's eyes and spoke his name.

Mrs. Cohn was thrown from her horse in Denver. She fell against the street curb and struck her head a frightful blow.

They carried her home unconscious and for sixty hours she lay white and still, without a sign of life or returning consciousness.

"My daughter's husband, Dr. Cohn, was in Trinidad when the accident occurred," said Mrs. Halin. "We thought every hour would see a change for the better, and so we didn't telegraph until last night.

The physician in charge of the case said he had every chance that Mrs. Cohn will soon recover.

After traveling about the country for fifteen years in male attire, the sex of Mary Johnston of New Orleans was discovered at Ellis Island, N. Y.

Mrs. Johnston is 50 years old, slight of build and of a sallow complexion. Her manner and conversation show refinement and some culture.

She arrived in New York October 2, in the steamer of the American liner New York, from Southampton.

Her sallow cheeks became scarlet when she was picked out of a group of men in the male detention ward on Ellis Island.

The woman protested that she was in perfect health, but the examining surgeon said he wanted to be sure, and ordered her to the hospital for examination.

"Oh, please don't examine me!" she pleaded. "I might as well tell you all, I am a woman, and have traveled in male attire for fifteen years.

The surgeon called in a matron at the woman's request, but later she examined her lungs to make sure she was not tubercular.

Commissioner Murray, who was at the island, asked Miss Johnston why she had traveled as a man.

coding the examination had passed, and, with the unfeigned ease of a man, the woman tilted back her head as well over her black short-cropped hair, thrust her hands deep in the side pockets of her trousers, and said simply and forcefully: "I was left alone in the world when I was a girl of 16. I tried to get employment as a woman, but everywhere I went my low pitched voice and my mustache were against me, and I could not get on. For fifteen years I struggled along in the field of female employment, but it was of no avail."

"I have been an honest woman all my life and have never violated any law. I am sorry that it is a violation of the law for me to dress as a man, but I did not know it. I have become so accustomed to acting as a man that it will be difficult for me to live now as a woman.

Mrs. Johnston said that after leaving Canada she went to California, where she remained for fifteen years. As Frank Woodhull she sought employment in the country and worked on several big ranches.

The physician in charge of the case said he had every chance that Mrs. Cohn will soon recover.

On the model lower California farm it has been demonstrated that it is possible to open gently the valves of the shell with a pair of tweezers to disclose the presence or absence of the pearl and to return the mollusk to the water alive and uninjured.

The eggs, which are gathered with the shells during the season when the eggs are being deposited, are placed in protective cages, in the bottom of which are little artificial channels, made to imitate the bottom of the sea.

A Most Exceptional Glove Sale

We have had some very remarkable glove sales, but the sale to be held on Saturday, October 10th, will outclass anything ever before attempted by us. We were extremely fortunate in snapping up an importer's clean up. The price was so low that we decided to average up the price of our regular stock and give you a pick from all of the 12, 16 and 20 button kid, lamb, suede and cape gloves in our entire stock.

Two lots at two prices, \$2.49 and \$1.49 a pair. In the \$2.49 lot are gloves worth \$3.50, 3.75, 4.00 and 4.25. In the \$1.49 lot are gloves worth \$2.50, 2.75, 3.00 and 3.50.

The \$2.49 lot consists of all perfect gloves. The \$1.49 contains some slightly soiled from exposure. Sale starts at 10 a. m. and continues all day if stock lasts.

None fitted on day of sale, but we desire to fit them afterwards. If any defect appears while fitting you get a new pair or your money back. You take no risk whatever. And now a word on the long glove situation. It is true that the long sleeve garments in vogue at present interfere to some extent with the sale of long gloves. Many leaders of fashion, however, wear kid gloves over the dress sleeves—indeed, that is quite the chic thing. Advances from gay Paree indicate that long gloves will be much worn again next spring and summer.

We will sell at Handkerchief counter 150 dozens of Japanese hemstitched, all pure silk handkerchiefs, bought from an importer who was quitting the business, 24-inch size, worth 65c; on sale Saturday 29c each.

Mrs. Muriel Allen, who has been here all week demonstrating and fitting the celebrated Redfern corset,

You can spend a very profitable day with us on Saturday.

Thomas Kilpatrick & Co.

leaves on Saturday night. Ladies who desire style and comfort in corsets should take advantage of this opportunity and consult Mrs. Allen. No obligation to buy.

We show the latest Parisian novelties in ladies' Neckwear, including the Pierrot ruff.

On Saturday we will sell on second floor a very special silk skirt, all colors, for \$4.95, worth much more.

Last day of the special skirt making sale. You buy the material from us and we charge you only \$1.50 for making. Over 12 styles now to select from, and a guaranteed fit. Hundreds have been pleased—you had better be pleased than sorry.

Lively doings in our basement these days. The blanket business is the biggest we have ever known. Our contracts were most fortunate. You can save a substantial sum by buying now. Saturday we will offer a full size Persian cotton filled comforter, which usually sells at \$2.50, for \$1.85.

Children's Underwear—We are quitting two lines of natural wool and white ribbed—nearly all sizes—prices on Saturday will be 25% below usual.

Men's Underwear—50c and 75c Egyptian ribbed, on Saturday 39c. Dollar grades, ribbed and flat, 79c.

Awakened Owner Warned Up by Lively Fight in the Dark.

Charles Bailey, of New York, owes it to the fact that he was sleeping with his feet stuck out beyond the bed clothes that his house was not ransacked. To the same circumstance, also, the police say, is due the capture of one of the most seasoned burglars in the city.

About 2 o'clock in the morning Mr. Bailey was awakened by a cold draught on his feet. Rubbing his eyes he saw flashes of light in the dining room. Tumbling out of bed wide awake, Bailey went into the next room and stumbled over a man stooping in front of the sideboard.

The fight that followed was not according to Queensbury rules, but according to the police, it would have done credit to any ring. Bailey is a big, strong man, but the fact that he was in his night clothes and barefooted handicapped him. Besides, the early morning intruder, while not nearly so large as Bailey, was a tough and tireless customer, who, so Mr. Bailey thought, seemed never to know when he had enough.

By circumstances almost evenly matched, the men rolled on the floor of the dining room for full twenty minutes. Bailey got his man down at the start and pummeled him about the head and face with great vigor, but the little man got busy underneath him back violently and scratched and used his teeth on Mr. Bailey's bare legs.

The scuffle awakened Mrs. Bailey, who was asleep in another room. She shouted out the street door for help, and Sergeant Glick and Patrolman Wey came on the run. Rushing into the room where the two men struggled on the floor, they were unable at first to make out which was the burglar and which was the householder, until Mrs. Bailey identified her husband.

Battered and bleeding but still full of fight, the intruder set about to tackle the newcomers, until Sergeant Glick touched him none to gently on the head with his night stick. This quieted him, and Mr. Bailey got a much needed rest.—New York Times.
