RAIN AND PRODUCE MARKET

Wheat Situation and Values Remain with No Change.

NORTHWEST RECEIPTS STILL FAIR

ments Until the Close of the Intand Navigation Senson.

OMAHA, Nov. 13, 1908. Nothing developed materially to change the wheat situation and values remained firm to higher. Northwestern receipts continute to run at a fair volume and the outlook is for good receipts until the close of navigation.

New corn receipts are improving slightly, but the real movement is not looked for until the latter part of this month. Corn values are showing good strength with wheat at an advance.

Wheat took a setback owing to seiling

wheat at an advance.

Wheat took a setback owing to selling which developed from lower cables and reports of increasing stocks. The general tone was weaker throughout the session and traders ware backward with their support. Detember wheat opened at 3%c and closed at 3%c.

Good buying of corn at the start, coupled with higher cables sent prices up. The market was erratic, however, and breaks resulted on profer of sales at top prices. The tone of the market was good and values were strong on the close, December corn opened at 56c and closed at 5%c.

values were strong on the close. December corn opened at 56c and closed at 56% c. Primary wheat receipts were \$81,000 bu. and shipments were \$83,000 bu., against re-ceipts last year of \$17,000 bu. and shipments of \$35,000 bu. Corn receipts were 250,000 bu, and shipments were 200,000 bu., against receipts last year of 231,000 bu. and shipments of 175,000 Clearances were 28,000 bu, of corn, 15,000 bun, of oats and wheat and flour equal to

No.000 bu. Liverpool closed 1/2d lower on wheat and 1/2/2d higher on corn. Seaboard reported 300,000 bu. of wheat taken for export. Local range of options:

CHICAGO GRAIN AND PROVISIONS

Fentures of the Trading and Closing Prices on Board of Trade.

CHICAGO, Nov. 13.—Despite news of a generally bearish character the local wheat market closed firm today at prices 1/40 to 1/40 kg/kc higher than the previous close. Corn was strong, oats steady and provisions was strong, oats steady and provisions casy.

Trade in the wheat pit was void of any great activity and the session was characterized by considerable nervousness. The majority of pit traders seemed to favor the selling side of the market, but the first signs of any material support from bull leaders caused hasty covering by those who had sold "short." News of the day was chiefly of a hearish nature, the Liverpood market was rather weak, receipts in the northwest were liberal, weather in Argentina was more favorable to the growing crop, and export business showed a decided falling off. Duluth reported that export business was practically at a standstill, and that sales today comprised only eight beat leads of Manitoba wheat. Until late in the session no business was recight beat leads of Manitoba wheat. Until late in the session no business was reported as having been transacted at the scabbeard but shortly before the end of the day it was claimed that forty-eight boat leads had been "worked." In regard to the Argentina situation reports received today stated that rains were general and that growing wheat would be greatly benefitted. Demand for each wheat was extremely light and prices at the sample tables were owing wheat would be greatly benefitted.

emand for cash wheat was extremely
that and prices at the sample tables were
tout steady. After covering a range of
to Se prices at the close were a triffto the previous session.

The December at \$1.03\forall and May at \$1.07\forall

Co.000 bushels. Experts for the week as

Tindicates trace of precipitation.

The December at \$1.03\forall

Tindicates trace of precipitation.

Tindicates trace of precipitation.

Tindicates trace of precipitation.

Following slight weakness at the start the ran market was strong the remainder of the day and at the close prices were to be dayed the previous close. Final questions of December and May were similar

Oats were firm early in the session, but became weaker late in the day. A decline of ic in feed bariey and of ic in cash oats was responsible for much of the selling. The market closed easy with prices unchanged to ic lower, with December at 49 67-69-ic and May at 51651-ic.

Prayisions were weak nearly all day. Receipts of live hogs were again extremely liberal, total arrivals today at western points being 78,400 head, against 41,300 head a year ago. The leading futures ranged as follows:

NEW YORK STOCKS AND BONDS

Market Advances Buoyantly Throughout Practically Entire Session.

STEEL COMMON LEADS ADVANCE

Sales Amount to Over 300,000 Shares-Harrimans Also Higher.

NEW YORK, Nov. 12.—No apparent obstacle presented Reelf to the advance in prices today. Except as bids were raised, there seemed to be no stock offered for sale, there seemed to be no stock offered for sale, there seemed to be no stock offered for sale, there seemed to be no stock offered for sale, bids retaining their stocks in the hope of conviction that they could just as well get higher prices for them. Such offerings as were encountered were absorbed with ready confidence.

Stocks which have lain dormant were revived by putting in bids at gradually advancing quotalions without bringing out any stocks, the result being some remarkable advances in the sale prices over preceding transactions, sometimes dating back months into the period of depression. All this served to feed the speculative enthusiasm, which was prevalent in a high degree. It was manifestly easy to advance prices and the securing of fresh holdings itself conduced to this end. No special news features were dwelt upon to explain the defaults the desired end to the best effect. While, obviously, there must have been a selling in each case to meet the buyer, there was no ostentation about the selling, while the buying was done with confusions and with palpable inclinemation that for all to buy and for none to sell would facilitate the desired end to the best effect. While, obviously, there must have been a selling in each case to meet the buyer, there was no ostentation about the selling, while the buying was done with enthusiasm and with palpable inclinemation that the selling while the buying was done with continuation and consumption. Details of this process and the stage of progress yet reached in the improvement played smail part in the calculations, or absence of calculations, as did the extent to which the rise in prices and the stage of progress yet reached in the improvement played smail part in the calculations, or absence of calculations, as did the extent to which the rise in prices and the stage of progress yet reached in the calcula
