COLLISION IN A FOG Panama Steamer Finance Run Down by Freighter Off Sandy Hook. VESSEL SINKS IN TEN MINUTES Three Passengers and One Member of Crew Drown. ONE VICTIM CLINGS TO WRECK Miss Irene Campbell Carried Down Despite Efforts of Rescuers. AMMONIA TANK BURSTS Firemen and Engineers Are Driven from Posts by Fumes' and One Engineer Jumps Overboard. NEW YORK. Nov. 26.-In the thick fog off Sandy Hook today the stout steel freighter Georgic of the White Star line rammed and sank the lightly laden Panama line steamer Finance, outward bound with eighty-five passengers. The Finance went down within ten minutes, carrying to their death three of the passengers and

one of the crew. The rest of the passengers, who included nineteen women and fourteen children, as well as others of the crey, were rescued by the boats of the Georgic. The freighter was not damaged. Of the passengers lost, one was a woman, Miss Irene Campbell of Panama, who clung frantically to the rail of the sinking yes. sel and could not be persuaded to release her hold, nor were the men who manned the small boats able forcibly to remove her. She was seen clinging deteminedly as the vessel was enguifed. William H. Todd, third assistant engineer, jumped overboard and was lost. When a roll of the passengers of the Finance was called it was found that Charles H. Schweinler, a policeman of Panama, and Henry Muller, a railroad conductor of Panama, had disappeared, and there is little doubt that they were drowned.

The disaster occurred in the main ship channel off Sandy Hook, at 8 o'clock this morning, and as both vessels were groping their way through a fog that has held up maritime commerce in local waters for the last three days.

vision must be carried out, in spirit and in letter. As these hearings of the committee on a tariff which includes over 4,000 items will cover only about three weeks. I sup-pose that my friend Payne must have ar-ranged for investigations by experts in all the leading influstrial and commercial centers of Europe and Asia. Presumably these experts have been busy ever since the long session of congress closed leas apring, and they will continue their work until the eve of the extra session. I have seen no word yet in the papers about the activity of these delegated investigators, but Mr. Payne knows the inadequacy of his committee's inquiries and he there-fore must have pravided for this sup-plementary work in the leading old world centers of trade.

Mr. Payne's easy confidence in being able to make a readjustment of the tariff achedules which will be satisfactory to the country must mean that he has pro-vided for scientific aid from the outside. I am strengthened in this belief by the fact that he knows that Germany, as a preliminary to its latest tariff revision, created a commission of thirty-two ex-perts, and that they gave five years of in-vestigation to the subject, many of them

peris, and that they gave five years of in-vestigation to the subject, many of them visiting every country on the globe with which Germany had any trade. Several of them came to the United States. Morever, our tariff covers far more items than Germany's. Our industries are three times as great in volume. In get-ting its tariff investigations made by a board of experts, Germany was applying business principles to what is pre-eminently a business subject. Railroads, great indus-trial and commercial houses and all the other targer enterprises in the United States employ experts to inquire into husi-ness conditions and make reports on which plans for future activity can be based.
