Labor Commissioner Report.
Labor Commissioner Ryder has just finished writing the biennial report of his department, which he will endeavor to have in printed form for the legislature when it meets. He recommends a reorganization of the bureau; so that it will have, besides the deputy, two factory inspectors, who will also gather industrial statistics, a statistician and a stenographer, who will also be librarian and mailing clerk; the bureau has a somewhat extensive library of books that Mr. Ryder believes can be made useful where it is now useless, except for merely office reference.

Union Pacific Investigators Find Engineer Schley Did Not Manipulate Air Properly.

CHEYENNE, Wyo., Dec. 5.—The Union Pacific Railroad's special board of investigation, two members of which were Generals George M. Randall and Frank D. Baldwin, retired, has reported that in its belief, the collision at Borie, November 19, in which ten men were killed "was caused by the improper manipulation of air by Engineer Schley which resulted in his not having the necessary pressure to control the train when the emergency arose."
This is said to be the first investigation of this character in which United States army officers participated.
