

position is being carried on between two men—Collins and Frum. Several other members of the team are eligible for the captaincy, but they have withdrawn in favor of the two leaders.

Of the fourteen letters this year five are "barbs" and the others are members of fraternities. It is understood that Frum has secured the support of two of the "frat" men, and in case that is true when the election takes place there is liable to be a tie vote, for Collins has the support of the seven other "frat" men and can vote their votes, while Frum will have "barb" and two "frat" votes, making seven votes for each candidate.

YORK HIGH HAS GREAT RECORD

Coach Brown Has Developed a Fine Machine.

YORK, Neb., Dec. 5.—(Special.)—York high school foot ball team may well be proud of the great record made in contest with leading high school foot ball teams. The team of 1908, composed of nearly all new players, was one of the best teams that ever represented York, and when it is understood that in years past York has had Nebraska high school championship teams, great credit must be given Coach Brown, an ex-high school star player, York was most unfortunate in not being able to secure dates and games. Teams representing smaller high schools of the state would not thought five years ago when on a championship tour, and were induced to come to York and were beautifully cleaned up.

Nebraska on Rules.

Nebraska will send a representative to the meeting of the national foot ball rules committee in New York during the Christmas holidays. Until this fall Dr. James T. Lees has been a delegate from Nebraska and is at present a member of the committee. Last spring he was removed from the athletic board when a purty wave swept over the state institution and he will not go to the foot ball meeting from Nebraska this year. Some present member of the board will be sent in his stead.

It is believed that a certain individual at the University of Iowa, who has been yearning for the position and who has considerable influence with several men on the committee, will probably be selected to fill the vacancy, and that Nebraska will lose out on account of changing its representation.

Now that the foot ball season is over more attention is being paid to basket ball. About five weeks ago the squad trying out for the indoor game numbered over forty members. Now this number has dwindled down to twenty, but will be augmented next week by the addition of several of the foot ball players.

The men who are showing the best form in practice are Wood, Perry, Captain Walsh, Hutchinson, Petrashek, Richey, D. Bell, Webb Jones, Waters and Long. Captain Walsh and D. Bell, both members of last season's five, will not be eligible for the intercollegiate games this year, and several substitutes will need to be developed to fill in the lineup for the games in which the two veterans cannot play.

Why Should You Pay From 50 to 100 Per Cent More for a Car That Will DO No More Than the Oakland "Forty"?

It is a good, old-fashioned American habit, before buying a cigar or a ten thousand-dollar house, to look into things a little before spending your money, and see that you are paying not one cent more than is necessary.

THE OAKLAND TWENTY

It is designed for the man who wants a light car of moderate power, made with all the mechanical excellence of a big, high-powered car. Its two-cylinder vertical motor runs as smoothly and quietly as a four-cylinder engine.

The Oakland "Twenty" 2-cylinder (vertical) Shaft Drive, \$1250.

It has 112-inch wheel base, seats five people without touching elbows, and in every little appointment is luxurious and easy riding. Compare it with any high-priced car, and you will wonder how the other fellows ever get people to pay the long price for cars no better appointed than the Oakland.

Light weight, 2,000 lbs., means low cost of maintenance. Big 32-inch wheels, 4-inch tires, steel I-beam axles—nothing cheap about the Oakland—simplicity of construction and scientific manufacturing system alone can account for the phenomenal low price.

MORE BATTING IS THE CRY NOW

Base Ball Patrons Want to See Liberal Hitting.

NEW YORK, Dec. 5.—Probably because the baseball experts in the west have nothing else to comment upon at this time, they are digging up the old movement about wanting more batting in base ball. This subject has been discussed often that it no longer can be considered significant. The magnates have taken up the matter at different times during the last five years, but finally became convinced that the rules of the game are good enough as they are.

OLYMPIAD THREE YEARS AWAY

Meeting at Potsdam to Pick Place for 1912.

LONDON, Dec. 5.—Simultaneously with the ringing down of the curtain on the fifth Olympic games at Shepherd's Bush, comes the announcement that the International Olympic committee will meet at Potsdam next May to fix the location for the next games in 1912. The crown prince of Germany has sent the invitation for Potsdam to be the scene of the conference, and it is the belief that the choice will be between Berlin and Stockholm. Some people in the old world think that this is a long way off, but those who have had experience are of opinion that the time is not too much when the amount of work to be done is properly estimated.

SPEED SKATERS GETTING READY

Rinks in New York Are Used for Practice.

NEW YORK, Dec. 5.—Speed skaters are anticipating many opportunities this season, and the ice at the St. Nicholas rink at the afternoon session is filled with fast men preparing for the race meetings. The Eastern Skating association has awarded the sanction to hold a series of races on December 19, and a program of three races has already been arranged as follows: A half-mile handicap, one-mile novice race and a two-mile handicap. This will be preliminary to the races for the international championships in January, and the eastern championships series in February.

THE SILENT COLD. The silent cold may not be as annoying to others, but it is none the less serious to the patient, with its insidious Sore Throat, pain and soreness in the head, chest and limbs, chills up and down the spine, general prostration and fever.

In such cases "Seventy-seven" is the remedy par-excellence and can be depended upon every time. All Drug Stores 25c. Humphreys' Homeo. Medicine Co., Williams and Co., New York.

STAMINA TO BE POINT OF CHIEF RELIANCE

NEW HAVEN, Conn., Dec. 5.—The task of rounding out a varsity crew at Yale that shall defeat the Harvard sweepers at New London next June are being devoted at the present time toward the development of stamina in the men who will be in the boat in the race against the crimson. In the opinion of many who are in touch with rowing at Yale, this sport has reached its maximum point of speed; hereafter endurance will decide the winner. In the opinion of these, the coaches at Yale are not putting from mind the incidents attending the Harvard victory on the Thames last spring. Yale had the speed, as was shown by the trials before the day of the race; but Harvard had the endurance. The blue stroke collapsed after the half-way mark had been passed, and a number of the other Yale men showed the effects of the pace. Harvard, on the other hand, while tired, did not give in to the strain, but paddled on to Red Top. It was stamina that the Yale crew as a whole lacked.
