SOUTHERN STATES' WEALTH

Commercial Congress at Washington to Discuss Possibilities.

MARKS EPOCH FOR YAST EPOCH

Prominent Men of Nation Address Delegates from This Territory on Problem of Conservation.

WASHINGTON, Dec. 7.—What may prove an epoch in the commercial development of the south was the opening today of the Southern Commercial Congress, an assemblage of leaders in the nation's business affairs, whose mission is to discuss the resources and industrial possibilities of the south.

The congress is one of several bodies, all national in their scope and purpose, that assemble here this week, a group of days in which a more thorough study will be devoted to the problem of conservation, than ever before was attempted in the country's history.

Today's program furnished a series of notable addresses, the various themes being upon an interpretation of the resources of the southern states.

Among the speakers today were Secretary Straus of the Department of Commerce and Labor, chairman of the meeting; Surgeon General Walter Wyman of the public health and marine hospital service; Secretary of War Luke E. Wright, Phillip W. Keelin, president of the New Orleans Progressive union; C. P. Goodover of Brunswick, Ga.; John A. Fox of Arkansas, and John P. Wallace of New York City.

Aside from the addresses, a feature of interest was an exhibit of maps, charts, diagrams and pictures displayed in a hall adjoining the Willard Auditorium. Other important exhibits were furnished by the geological survey, Department of Agriculture, forestry service, etc. The exhibits dealt with such subjects as density of population, waterways, cotton production, geologic resources, mineral wealth, growth of public education, increase in rural delivery, commercial status of the gulf states and other pertinent data affecting the south's development.

G. Grosvenor Dave, chairman of the committee on arrangements, called the convention to order, after which he introduced Secretary Straus of the Department of Commerce and Labor, who presided.

Secretary Straus speaks of the wonderful strides made by the south in commerce during the last forty years. He called attention to the fact that the south economically and commercially has come out from the sectionalism and that it now is an important and growing part of the whole nation. The past decade, he said, the south in 1900 amounted to \$200,000,000. In the last five years the increase in the manufactured products of other parts of the country amounted to 28 per cent whereas during the same period this production of the south increased by 100 per cent.
