## CARELESSNESS LEAD TO GRAVE

News of a Physician Who Has Passed on Thousands of Causes of Death.  
"It is easier to pay the doctor than the undertaker," said Dr. Philip O. Hanlon of New York City. "And then, 109," he added with droop emphasis, "you get more real life enjoyment out of the investment. If more people would pay a doctor there would be fewer occasions for paying the undertaker. The idea that the doctor is the best one to be undertaken is all moonshine. The use of the medical practitioner the more of the undertaker.  
"As it is, the undertaker has the best of it over the doctor; he gets full toll for cases that the doctor could have kept out of his hands indefinitely if he had had the chance. You can say for me that the undertaker has the softest job in New York City."  
As Dr. O'Hanlon has been coroner's physician for more than fourteen years, and in that time has investigated and passed on the cause of death in more than 28,000 cases, he is in a position to speak advisedly.  
"This doctor about he doctor carelessly killing people with drugs, or letting them die because he didn't understand their trouble, is not rational enough to deserve serious consideration. The truth of the matter is that most people let the beginning approach the end before they seek legitimate medical advice. A goodly

## PERCENT WAIT UNTIL THE DISEASE HAS DEVELOPED TO AN INCURABLE STAGE BEFORE THEY CALL ON THE DOCTOR. THEN THEY EXPECT HIM TO PERFORM A MIRACLE WITH THE ALCHEMY OF DRUGS, AND THE DAY OF MIRACLES IS ANCIENT HISTORY. THEY DELAY UNTIL THERE IS A JOB IN SIGHT FOR THE UNDERTAKER BEFORE THEY DO WHAT THEY SHOULD HAVE DONE IN THE VERY BEGINNING—SEND FOR OR CONSULT A PHYSICIAN.

"From my experience of fourteen years as coroner's physician I should say that I have found one out of every five of the cases examined had tuberculosis in some stage, and this covering something more than 28,000 cases. The evidence was generally in small areas, often at the apex of the lung. Here is where nature demonstrates her ability to take

## CARE OF THE BODY WHEN THE SYSTEM IS IN CONDITION TO RENDER THE REQUIRED ASSISTANCE AND SUPPORT. WHEN THE TUBERCULAR GERMS ENTER THE SYSTEM AND LODGE IN THE LUNG, FORMING A TUBERCLE OR NODULE, NATURE, IN A HEALTHY BODY, BUILDS A WALL AROUND IT, CLOSING IT SO THAT IT CANNOT DO FURTHER DAMAGE. BUT THE BREAKING DOWN OF THIS WALL, MADE POSSIBLE BY THE WEAKENING OF THE SYSTEM, WILL ALLOW THE TUBERCLES TO ESCAPE AND MULTIPLY, AND THEN, UNLESS PREVENTIVE MEASURES BE APPLIED PROMPTLY, A CASE OF WELL DEVELOPED TUBERCULOSIS IS THE RESULT.

"Keep the system in perfect order. Eat lots of salt and drink all the water you can get outside of. Flood yourself with it and keep it up in all seasons, morning, noon and night, and every hour between.

## DRINK OCEANS OF WATER, BUT NOT A DROP OF ALCOHOL. ONE TABLESPOONFUL OF WHISKY IN ITS EFFECT UPON THE CIRCULATION JUST AS INJURIOUS AS A DOZENS. ALCOHOL BREAKS DOWN THE HEALTHY TISSUES OF THE BODY AND OPENS THE WAY TO INFECTION BY ALL SORTS OF DISEASES. WATER IS NATURE'S ONE GREAT CLEANER, RIDING THE BLOOD AND TISSUES OF THE CONSTANTLY ACCUMULATING EFFETE MATTER AND POISONOUS CHEMICALS. ALL THE FACTORIES IN THE CITY DO NOT MANUFACTURE MORE KINDS OF CHEMICALS THAN THE HUMAN BODY, AND THE PROCESS IS CONTINUOUS, DAY AND NIGHT. WATER WILL FLUSH OUT THE INJURIOUS CHEMICALS, INSURE AGAINST THEIR HARMFULNESS BY DILUTION AND KEEP THE BODY FREE OF POISONS BY THE PROCESS OF ELIMINATION.

"Twenty-five to thirty persons in every hundred die before their allotted time because they neglected to consult a physician when the development of the disease could readily and positively have been arrested. Every normal person, unless death is caused by violence, should live to be from 75 to 100 years old, in more or less perfect health, provided, of course, that the health of the body is guarded and cared for.
