BANK CLEARINGS ARE WAY UP

show a Decided Gain Over Those o

Omaha.

the Preceding Year for

"The year of 1907 was a record breaker. The year before, 1906, was a normal business year in Omaha. The business of 1908 exceeds that of 1966-in other words we have beaten the normal business record, and are also at the advantage of having eliminated sulplus stocks, and assisted the factories in catching up with their orders. The setback of a few months at the close of 1907 and beginning of 1908, was a healthy thing. Factories which were six months behind with orders caught up; wholesalers who

had enough of some lines on hand to last two years, sold the surplus and quit ordering until they did; cars which were tied up in traffic congestion were released and sent pounding down the long lines of shimmering steel; retailers collected from the farmers and paid the wholesalers, the wholesalers paid the manufacturers, maintained their credit and probably owe as much or more today as they did at the end of 1907, but the bills are new and the kind of business which the best business houses and factories want.

"Withal, the year has been good. It opened good. July, August and September felle off, but things picked up again and the close is most satisfactory."

Mr. Wright shut the little book with a were showed the car loads and the tonnage, the

books as this that The Bee secures its facturing points on the "biscuit map." information about the actual business done by wholesale houses-from the most con- decrease. One distillery was closed for fidential sources, and the figures given are, short time, but resumed to make up for in the aggregate, making it possible to the time lost when it was closed for im obtain from almost every broad minded provements and repairs. business man an accurate statement of business conditions.

In the dry goods lines the business closed by the manufacturers of poultry supplies, about the same as last year. There is including incubators. More of these sup not a pliable 2 per cent difference in the ples have been manufactured in Omaha sales of the big houses, while with the than ever before and sold from the Misaddition of a number of smaller houses, sissippi river to the Pacific coast.

it is estimated that the gross sales of dry goods in Omaha for the year of 1908 exceeded that of 1907, when it was said to be \$8,575,000. This figure complied January 1. 1908, was found to be low when the invoicing was completed February 1. But Bakers' supplies to make a record for 1908, which would compare with the record of 1907, the dry pi

goods dealers of Omaha had to do the most strenuous work they have over done since they first began to trade calico to the Indians for Connecticut made wampum. Along soon after the first of the year, prices went off-10, 15 and finally all of 25 per cent in many lines of staple goods. Cloth which sold at 7½ cents per yard a year ago was selling during 1908 for 5 cents. Additional salesmen found positions in territory many miles beyond the former boundaries of Omaha's trade empire, and more yards, dozen, cases and pounds of dry goods were sold than ever before in order to bring the gross sales up to the point which they

finally reached. The consumption of staple and even fancy lines of dry goods did not diminish, how ever, when times became hard and at the end of 1907. The farmers, in particular, had the money and they spent it on their wives and daughters. When the prices went low, they bought two new apron patterns instead of one; a dozen new napkins, instead of six; a bolt of muslin of finer grade instead of ten or fifteen yards of lower grade, and this made the business of which

people did not stop eating because many were trying to urge hard times, nor did the consumption decrease because of the presidential campaign. The record made by the grocers has not been hard to make -not as hard as it was in the dry goods lines.

Leather goods and advertising novelties and a good year in Omaha, and a new leather house or two came along to swell the business.

Both the sale and manufacture of poultry and stock foods has increased, notably the alfalfa foods.

Factories in Omaha have made a good record, \$188,172,165 worth for the year. The most notable increase is in the manufacture of flour and feed stuffs, the mills of Omaha running day and night during the entire year, while the largest mill in the city ran only two months the last of 1907.

Healthy increases are shown by the creameries and Omaha maintains the posttion won several years ago of the largest butter manufacturing point in the United States.

Cracker Showing Late.

The manufacture of crackers decreased during 1908 because the National Bircut company closed its plant during the winsnap. It is a book which probably only ier of 1907, and until the plant of the Iten the proprietors see. Each page tells the Biscult company started in September, no history of one year. The figures of 1908 crackers were made in Cmaha. The Iten scarcely dry. They could hardly be plant, with a larger capacity than the old called business history, they were so fresh. National factory, is now running, and the They showed the dollars and cents, they Loose-Wiles Cracker and Confectionery Gate company is crecting a plant of equal cacost of trasportation and the cost of selling pacity, which will soon make Omaha one In almost every instance it is from such of the largest independent cracker manu

Beer and malt products did not show The cement block industry shows an in crease, no less than six new plants opening

in Omaha during the year. Smaller Houses Help. Among the notable records is that made

which have been pushing out for business. The following is a detailed statement of the wholesaling and jobbing business of the city for the twelve months of 1908 Record in Detail.

BAR LABORS FOR AMENDMENT

Attorneys of Douglas County Do Good

Work in Campaign to Increase

Omaha attorneys have for a number of

years done effective work in promoting the

general good of the profession through the

Douglas County association, which has

passed a very successful year. About 153

attorneys belong to the association, includ-

ing some of the most prominent in the city,

The organization did effective work in the

last campaign in promoting the constitu-

t'or al amendment providing for the increase

in the number of suprems judges. It has

also recently endorsed a reform of the

Nebraska divorce laws and for the increaso

FIFTY-FIVE EXAMS ARE HELD

Civil Service Department of Government Given Permanent Quarters. in Postoffice Building.

The civil service department of the government has been given permanent quarters in the postoffice building again on the second floor, these rooms being permanently assigned for examination rooms and the office of the local secretary. Miss Viola Coffin.

During the year 1908 there have been fifty-five civil service examinations and in which 529 persons took the examinations for various positions in the postoffices, departmental service, immigration or insular and Panama canal service.
