PUTTING CUBA TO THE TEST.

The United States troops have begun leaving Cuba, preparatory to the final evacuation of the island and the surrender of all Cuban affairs to the newly-elected Cuban officials. It will take several months to withdraw all the troops, but after the formal transfer of control, on January 28, the military occupation by the United States will come to an end and the pledges Lewis is not going to Japan on any made when the troops were sent to the island about two years ago will have been kept.

Coal is wasted both in the mining and in the burning. The establishment of suitable and scientific measures of waste prevention, and of procuring the non-con-

BEST NEW YEAR RESOLUTION.

The Golden Rule as a Beacon on Life's Highway. Edward Markham in Success.

The noblest resolution that any citizen could make for the New Year would be the resolution to live more faithfully by the Golden Rule, that sublime principle of conduct for this world and for all worlds. Failure to live by this law causes the chief sorrows and collisions among men.

Let each earnest man search into his words and ways, determined to find the for more houses and dwellings than special manner in which he breaks the Golden law-his special habit that works injustice or unhappiness in his shop, his office, his home, his city. He will find perhaps, that in the shop he is in the habit of misplacing tools, and this hinders the work of his comrades; that in the office he is in the habit of being late in keeping appointments, and thus steals other people's time; that in the club he is in the habit of belittling worthy competitors, and thus joins the gang of thieves who steal reputations; that in the home he is in the habit of monopolising the conversation, and thus fails to draw out the powers of others; that in the city he is in the habit of spitting on the sidewalk, and thus spoils the comfort of his townsmen; that in business he is in the habit of misrepresenting his goods, and thus robs under the cover of custom.

These are the problems in the Golden Rule; and here are ample space and verge the greatest thing in man.

Other Instead of folding their hands and comanimals protected by law, such as antelopes zebras, giraffes and ostriches, are almost equally voracious in consuming domestic animals and fowl, and in destroying grain head money for lions and leopards, and hunting these animals has been greatly stimulated. Should the Roosevelt expedition visit Kilimstinde it will receive cordial reception and every assistance in filling its bag. If some of the law-protected animals should accidentially or otherwise receive a dum bullet the legal penalty will be cherfully remitted.

Political trade unionism in Great Britian was dealt a blow of some severity in the judicial decision that the unions could not use their funds to pay salaries to members of Parliament. The practice of paying such salaries arese because no member is paid out of the government treasury, and members chosen to the house through trade union influence have been too poor to devote their time to parliamentary service without a fund for their support. The grounds for the decision are, in effect that trade unions are not given a special position, with exceptional immunities, under the law, in order that they might develop into political organizations supporting a particular party. It seems that trade union members thus supported by salaries were bound by a pledge, before election, to support the labor party in the House of Commons and obey its parliamentary whip. Inasmuch as the minority of the trade unions were politically opposed to this practice, it was held that they were oppressed in being assessed for the for New Year resolutions—space and verge support of political parties which they for building character, character which is disapproved, while the principle of paying a member a salary, under a pledge to vote always a certain way, violated the principle which is at the basis of the law forbidding bribery at elections and in Parliament.

AN INDUSTRIAL PHENOMENON.

Peculiarities of the Ebb and Flow of the Human Tide. Philadelphia Record

In his annual report, of which the data They reasoned that a change could not make their situation worse. The light of civilization, which penetrated the screens of their prison homes, in spite of all efforts that never before has there been such for was my overshoes."—Louisville Courier to shut it out, could not fail to bring hope a multitude of returning allens. This enormous emigration is partially due to the freedom and capacity of their west- the competition of the great steamship companies in cheapening ocean transportation during a portion of the year, but if There is one section of east Afica where was caused in much greater degree by the Theodore Roosevelt and his companion business depression and accompanying loss hunters will be heartily welcomed. In the of employment for industrious hands. In Kilimatinde district of the Usambra moun- the untoward business condition that pretains lions are raiding the cattle ranches vailed the outflow of more people by upplaining of the misery more than 700,000 aliens have taken steamships in search of employment elsewhere, or in visiting their old homes, expecting to return under better fields and garden truck. No fences yet auspices and leaving better opportunities constructed can keep them out. Settlers of employment for those who remain be-

It is to be hoped that such an industrial and social phenomenon as the departure of more emigrants than arrive will never again be witnessed in this land. The outflow of more than 700,000 industrious working people is one of the most striking indications of the severity of the late crisis. In a period of great industrial activity it would be as disastrous in its effects as a general strike. On the other hand, there is no question that the ocean movement to and fro promoted by cheap transportation constitutes one of the most potent factors in modern progress. In making people of different nationalities better acquainted with each other it tends to lessen and finally expel the antipathies of race that have contributed almost as much as animosity of religious sects did formerly to wars among men. By affording opportunities of employment or business in one country when they fail in another it mitigates the feelings of discontent with the conditions of life and thus keeps down the recruitments to the ranks of socialism and anarchy. In former ages when men were stirred by the migratory impluse they moved slowly in immense masses to take forcible possession of a new habitat. Now they have only to purchase a cheap steamship to be wafted in a few days to any desirable quarter of the globe

BENEFACTIONS OF 1908.

Munificent Gifts Running Well Into the Millions. Chicago Tribuni

The figures of the year's benefactions run into the millions. More than ninety of these millions, either by gift or bequest, have been devoted to the betterment of men and women and children during 1908. In round numbers the colleges and educational institutions have received \$40,000,000; charitable enterprises of all kinds another \$40,-600,000; religious organizations (regular contributions not included). \$5,000,000; muse ums, art galleries and municipal improve ments, \$5,000,000; and libraries about \$1,000,-000. In the latter direction the amount shows a decided falling off over previou years. This, of course, is due to Mr. Carnegie's change in his library policy. He has planted library buildings all over the country and put in conditional leases under them until there is no further need of his help, but in all other directions the stream of phlianthropy runs bank full in all its old channels.

In this connection Andrew Carnegle, John D. Rockefeller and Mrs. Rdesell Sage, as usual, head the list of the philanthropists Mr. Carnegie has given away \$5,429,650, and there is an implied promise on his part also that an additional ten millions will be forthcoming ere long for the benefit of the Carnegie Technical school endowment. Mr. Rockefeller's gifts amount to \$2,924,000, and might have been much larger had it not been a hard, uncertain year for the Stan dard Oil benefactor and beneficiary. Mrs. Russell Sage has given away \$1,242,700 of the accumulations which her late husband so wisely left to her philanthropic disposi-

Gifford Pinchot, chief of the forestry bureau, and chairman of the national conservation committee, left Washington yesthe greatest progress in this direction of terday for Canada and later Mexico, beargiving nature an opportunity to effect its ing invitations from President Roosevelt own cures, but the effect of their teachings to President Dias of Mexico, and Premier is felt more and more every year in the Laurier and Lord Gray of Canada, to apmore advanced American hospitals. At the point delegates to the national conservation conference here February 18, next,

SMILING REMARKS.

proportion of drugless treatment is even habit isn't it?" "The tobacco habit?"
"Yes, I understand that the gasoline cars smoke, while an electric won't star out a plug."-Cleveland Plain Dealer, start with

> Isabel-Auntie, pray tell me why you never married.
>
> Wasabel-Child, I waited too long for a prince, when I might have had a duke,—Chicago Tribune.

"Of hear they do be sindin' messages now widout woires or poles. Faith, it's wondherful toimes we're living in, Dennis." "It is, Moike. Shure, th' way things is goin' we'll be able to thravel widout lavin' home wan av thim days."—Judge.

"I suppose you have asked that fitted suitor about his pedigree?"
"No," answered Mr. Cumrox. "We were both too tactful to let anything happen. He gave me a book in genealogy that covers his case and I presented him with a marked copy of a commercial agency's report." copy of a comm Washington Star. "Only a business letter," explained the

blushing daughter as she saw curious looks cast at her mail.
"Yes," said her father, sarcastically, "it does look remarkably like a sealed proposel."—Baitimore American.

Journal. WOMAN'S SPHERE OVERTURNED

Lurana W. Sheldon, in New York Times. In a few brief words or so I propose to fully show That emancipated woman is the handi-

work of man,
And I further rise to state
That her status at this date
Proves that she has been constructed on an economic plan.

When man first observed her kind. When man first observed her kind.
This one thought ran through his mind.
"She's a nighty pretty creature, but she
ought to have some clothes!"
So he thumped her on the back,
Said, "Stay home and mind the shack!" Then he started out and bought her kilts or bloomers and some hose.

Now this poor chap did not gue Woman's instincts turned toward dress So he couldn't gauge the outcome of his really tender care;
But she showed him right away
That her clothes had come to stay.
And she kept him on the hustle for still.

other things to wear.

Now, no primal man was built
Like a Gould or Vanderbilt.
He could earn his homespun jumpers
and her modest togs, perhaps.
But she hankered now for frills,
And she made him pay the bills,
Till she drove him to his corner with the
price of boots and caps.

price of boots and caps. Now of course you plainly see Man was noble as could be, But his foresight was myopic where a woman was concerned; And because "have clothes they would" Vives got work where'er they could, And right here the sphere for woman was completely overturned.

BABY'S ITCHING WAS INTOLERABLE

Girl of Six Months had Fearful Attack of Eczema - Spread All Over Her Face and Eyes Began to Swell - Scratched Till Blood Came-Relieved in a Night and

CURED BY CUTICURA AFTER LONG SUFFERING

me an ointment which did not help either. The disease in the meantime spread all over the face and the eyes began to swell. I became very anxious. The itching grew intolerable. I had to tie the baby's hands to the cradle to prevent her scratching. The cheeks were covered with blood and it was a terrible sight to see. I consulted doctors from September to December, but they were unable to cure the baby. I were unable to cure the baby. paid out from twenty to thirty dollars "One of my friends told me of the

Cuticura Remedies and I sent at once for a set which I began to use that evening. The next morning the baby's face was all white instead of red and you can imagine how surprised I was. I cannot and I do not know what would have become of my baby only for it. I used the Cuticura Remedies until the eczema become of my baby only for it. I used the Cuticura Remedies until the eczema entirely disappeared. The child is now three years old and quite well. I used three cakes of Cuticura Scap, two boxes of Cuticura Ointment and one bottle of Cuticura Resolvent and I never use any other scap. I always recommend them whenever there is a chance for doing so, I will send you one of her pictures which she had taken just after she was healed. Mrs. P. E. Gumbin, Sheldon, Ia., July 13, 1908."
