

THE OMAHA SUNDAY BEE

OMAHA, SUNDAY, JANUARY 10, 1909.

JUDGMENTS

THE National commission's conclusions to the Eastern league and American association, though sweeping in scope and may militate to the advantage of both the Western and Southern leagues, and thus gives these three organizations the right to draft one another from each team in the Western and Southern. This is the same right now enjoyed by the two major leagues, and therefore doubles the draft, or enables the five organizations, between them, to get by this process two men from each team. At first glance that looks like a hardship, but a matter of fact, it probably will become an advantage to the Western and Southern team owners by increasing competition in drafting to the extent of forcing the larger leagues to do more buying. It will make it impossible for them to wait until the eleventh hour to make their draft, for it will be a case of the early bird and the worm. So much for the owner. As to the player, the new arrangement gives him more room for advancement. Under the old regime, his chances are limited to the National and American leagues, and this is a narrow limitation. Under the new order of things, he has more than double the scope of outlet for his ambitions. These results may not obtain, but they at least appear possible.

Wrestling has profited by the outlawing in so many states of prize fighting. For the last two winters the mat has been popular, but this winter has eclipsed the former seasons. In Chicago, where wrestling had died out because of certain allegations attached to it, the patronage this winter has been enormous. Whether it is due to a genuine revival of interest in the old game or whether more to the fact that men of sport-loving natures are determined to have some winter pastime and cannot have boxing so long as the law holds it under the lid, the fact remains that wrestlers have done well. These wrestlers may secure their popularity if they will do the wise thing and seek to the old adum that may have arisen from hippodroming in past years is made impossible. It is a grand sport and will be patronized as long as it is kept on the high plane of decency. Base ball is a living example of what a square game may accomplish.

Now that it is all over, would it be asking too much of the National commission for it to let us know just exactly what it was it expected to back Mr. Tebeau into? Certainly had a hole dug for him somewhere, or it would not have dilly-dallied so long and then given him everything he asked for. The National commission's treaty of peace look all right, but it must be conceded that the way by which the peace pact was brought about shows up the National commission in rather an unfavorable light. It could have saved its face by doing what Tebeau said do at the outset, instead of flatly refusing them and completely giving in later. The whole thing inevitably suggests that the commission must have been led around to the place where Tebeau keeps his power plant and treated to a good look-in.

Martin (Farmer) Burns, the dean of westerns, has come to Omaha to live. He has brought his family and will educate his children in Omaha schools. This gives to Omaha a man whose distinction in his profession is unmatched. Bordering on 30 years of age, he is today one of the very best westerners in the world, perhaps the best of his weight. He still possesses the agility and strength which youth gives and which sobriety preserves. Burns' greatness as a wrestler is no more remarkable than his habits as a man. He is a testimonial to younger men of what may be done in the field of strenuous athletics by careful living. The sport-loving fraternity of Omaha will certainly give the Grand Old Man of the Mat a glad hand welcome.

The winter season is far advanced and the talk of abolition of the spit ball has not yet reached any tangible stage of development. The champions are not out, either And or the spitball were abolished. It is certain something equally as obnoxious and injurious would be instituted in its stead, so perhaps it is best to let well enough alone and worry along a while still with the spitter.

It is well enough in this heyday of base ball prosperity and good fellowship for the guardians of the game to reflect that it's a good idea in times of peace to prepare for war. Lifting the ban from Ward, Sebring, Chase and a few other players who have defied organized base ball does not serve to increase the popularity of the game. Lifting the ban from Ward, Sebring, Chase and a few other players who have defied organized base ball does not serve to increase the popularity of the game.

Speaking of ball players who jump contracts has directed an unusual amount of attention to the case of Dave Rusk, who, after cutting off one year's salary from Joe Kelley and sticking another man in Joe's place as manager of the team, backstaging is often too good for obsequious players, but what is to be done with the magnate who violates his contract?

One of the most interesting pieces of base ball gossip for a long time is that concerning a trade of George Stone for Hal Chase. McAleer is half-way quoted as saying he would not let Stone get away from him unless by so doing he could get a pinch hitter or Hal Chase for his base ball. He had a chance to trade Stone for Wild Curoy and promptly turned it down.

The New York American management is once more knocking its head on the ground to Hal Chase. Farrell's need of a first baseman is to be regretted when it becomes necessary to set such an object lesson to other players. If this isn't putting a premium on outwary then that can't be done. But, of course, lifting the ban from Sebring practically lets in Chase.

Omaha felt the loss of Autrey and Austin as keenly, perhaps, as it ever felt the loss of a pair of players, but if reports be true Eberle and Penderly, who succeed them, will make the local fans forget, in part at least, the loss they have sustained. It is encouraging to know that President Rourke has landed a first and third baseman who promise so much.

Guess the National commission knows now who is running this little base ball business.

Heavens, Muggsy, there are four of those Covelaki brothers!

So far Br'er Johnson has drawn no color lines.

GROTTIE IN BOWLING POLITICS

Boosted as President of Middle West Bowling Association.

ONE HUNDRED GO FROM OMAHA

Interest in the Second Annual Meet Will Draw About Seven Hundred Leading Bowlers to St. Joseph.

Dick Grotte, the popular assistant city building inspector and president of the Commercial Bowling league, has been launched forth as a candidate for the presidency of the Middle West Bowling association. To make good on its claim to the title of "the best bowling city in the world" Omaha is to give Grotte a good boost. About 100 bowlers will go to Omaha to St. Joseph to attend the second annual bowling tournament, which will be held in that city January 23 to February 4. It is now certain that Omaha will send over ten five-men teams, about twenty-five women teams and about sixty-five bowlers for the individual contests, thus giving Omaha probably as large a delegation as any city, except possibly St. Joseph, will have at the tournament. Omaha has always taken a lead in sports and is going to the fore in bowling.

G. A. Francisco of Omaha is now president of the association and has been working hard to make the St. Joseph meet a big success, which now seems certain, as the indications are that over 700 bowlers will attend the tournament. He has been most industrious in helping to make the meet a big success.

Some good prizes are hung up for the second annual tournament of the Middle West Bowling association—prizes which are worth going after. Among other prizes are \$3,000 in hard cash and this should be sufficient to tempt even a larger number of bowlers from their winter quarters. The management has so arranged affairs that no team will be compelled to remain in St. Joseph longer than two days, as they will be able to play their games and then scot for home as soon as their play is over.

It is expected that 140 five-men teams will contest, 280 two-men teams and about 700 for the single prizes.

Spring Plans of the Doves.

BOSTON, Mass., Jan. 9.—The spring training plans of the Boston Nationals are being discussed by the club's management. The club is expected to leave for the South in early March. The team is expected to play in the South for the first time since 1907.

Timely Tips for Automobile Owners and Drivers

The automobile club of Philadelphia now has a membership of nearly 700. The touring club of France now has a total membership of 115,000, principally automobilists and bicyclists. The newly organized Chauffeurs' Club of Boston is holding meetings twice a month, and is expected to have a large membership. In 1908 there were sixty-nine exhibitors of automobiles at the first automobile show in New York. This year there were 100 exhibitors. The show was held in the Madison Square Garden. The show was a great success. The show was held in the Madison Square Garden. The show was a great success.

The Spanish Royal Automobile club has organized a corps of motor volunteers, which will be more apt to aid to the government in time of trouble. A club has been organized at Findlay, O., having for its object the promotion of sociability and the opening of a campaign for good roads. In addition to conducting a campaign for a road, the club will also be conducting a campaign for a road. The club will also be conducting a campaign for a road. The club will also be conducting a campaign for a road.

Wherever the motorist goes France, Germany, Italy, Russia, Turkey, China, Egypt or Dohomey, he finds gasoline sold in the same style. American gasoline cans of commerce that he sees at home. The State Military Board of New Jersey has decided to permit the New Jersey Automobile Trade association to use the new Essex Troop armory in Newark for a show from February 20 to 25. The county of Norfolk, Virginia, has voted \$200,000 for highway construction, and will appropriate \$100,000 to build 100 miles of new roads leading to Richmond. In California they have begun to put car demonstrators in uniform. The plan is said to work well, as prospective purchasers are more apt to ask questions freely than if the driver were in ordinary clothes.

For absolute accuracy there are no road maps of Italy as good as those issued by the Touring Club Italiano. They are prepared by members of that society, and are sold at a low price to outsiders. A luxuriously equipped automobile stage or motor bus has been put into service between New York and Lakewood, N. J., for the special purpose of conveying people who reside in the Jersey pines during the winter. A motor package delivery wagon recently covered a route of 301 miles in two hours and thirty-nine minutes in Philadelphia, as compared with the previous record of fourteen minutes with a horse-drawn team.

Kaiser Wilhelm of Germany has plunged into racing with his usual enthusiasm for sport, according to a dispatch from Berlin, and will reduce the imperial stud car to a mere hobby. The Kaiser's motor car is a masterpiece of engineering. The Kaiser's motor car is a masterpiece of engineering. The Kaiser's motor car is a masterpiece of engineering. The Kaiser's motor car is a masterpiece of engineering.

To better insure the success of their project, the Automobile Engineers' society of Louisville, Ky., have organized an association, with complete constitution and by-laws. The show for the year 1909 will be held in the Louisville Coliseum. According to a motor expert, an excellent method of increasing the circulating pump is by using the radiator. If the tubes are not the water in circulating properly; if, indeed, either the supply of water is exhausted or the system is inoperative. "Cabbies" of Detroit have united in a war on the taxicab service established in that city recently. They are endeavoring to drive it out by means of a city ordinance regulating the rate of fare, but thus far have failed to succeed. The Automobile Dealers' association of Boston, Mass., is considering the advisability of having a "taxi" license for the Back Bay district which may be used not only for taxicabs, but will be used for individual private depots. The motor car distinguished itself during the recent snow storm that blocked traffic in Paris. Automobiles were able to make a passage through the drifts in the streets, the motor speed about the city with comparative ease. The work of making the old Narragansett Pier track in Rhode Island, famous for its horse racing, one of the fastest automobile circuits in America will soon be begun. Comment worth \$2,000 has been purchased to cover the entire mile circuit and to bank the turns. It has been definitely decided not to hold the automobile show in Providence, R. I., this winter. Neither the state armory nor infantry hall, in which the two preceding exhibitions have been held, could be secured, and no other suitable place was available. Cleveland, O., claims to have more cars in the country in proportion to population. It is also asserted that nine-tenths of male motor car owners in Cleveland drive their own machines in preference to employing chauffeurs. Marquis de Dinch, who has been one of the stoutest opponents of motor car racing

have been announced by President George Doherty. Manager Bowman will send his batteries to Augusta, Ga., in advance of the rest of the squad. The team will leave on March 10, and the main camp will not journey southward until a week later.

MAC CLEANED 'EM OUT ANYWAY

David Harum Makes Complete Change in the St. Louis Cardinals.

The release of Arthur Hostetter to Milwaukee of the American association, announced by Owner Stanley Robison of the Cardinals, marks the passing of the last of the players who composed the National league team when Manager John J. McCloskey landed in St. Louis, says the Republic. McCloskey, who will be at the helm of the Milwaukee club, will again have charge of Hostetter. John J. McCloskey was the sweet on Hostetter and since he signed with the Wisconsin aggregation has been angling for him. No consideration is mentioned. It is probable that a player or players will come this way early in the season.

Hostetter, whose real name is Hostetter, came to the St. Louis National league team in the fall of 1905 from Denver, of the Western league, as a third baseman. He played the far corner with indifferent success and the following spring blossomed out as a pitcher. That spring he won the only game of the ante-season series between the Browns and Cardinals, the American leaguers taking six out of seven. Since that time Hostetter has played every position on the diamond, winding up last season as a catcher.

Hostetter, a valuable man, a valuable man for any team if it were not for his bad legs. From the knees up he is one of the best players in either league, but his legs refuse to keep pace with his head and arms. He has one of the greatest throwing arms in the business, and at the field meet at Cincinnati carried off the honors in the long-throwing contest. The release of Hostetter marks the passing of all the players of the 1906 team from major league company, with the exception of "Buster" Brown, now with the Philadelphia Nationals, whose term is short.

Hostetter, who was a shortstop for the St. Louis Browns, was traded to the Philadelphia Nationals. Hostetter, who was a shortstop for the St. Louis Browns, was traded to the Philadelphia Nationals. Hostetter, who was a shortstop for the St. Louis Browns, was traded to the Philadelphia Nationals.

President of Aero Club Looking for Site.

NEW YORK, Jan. 9.—A. Holland Forbes, first vice president of the Aero Club of America, has gone west on a tour of inspection of grounds which have been offered to the club for the start of the annual grand prize balloon race under its auspices in the first week of June, next. The cities tending the free use of grounds also offered suitable gas free, and there is no doubt that Forbes will select a site in a definite selection. The race is to be open to all America. Federation rules will govern. All balloons will be limited to a capacity of 7,000 cubic feet, with a 5 per cent leeway, and each will be required to carry two persons, one of whom must be a registered pilot.

FOOT BALL PLANS AT DARTMOUTH

Coaching for the Coming Season is Settled Upon.

BOSTON, Mass., Jan. 9.—At a meeting of the Dartmouth College Athletic council, held in this city, the coaching plans of the foot ball team were determined. The coaching staff will be headed by a head coach being selected and allowing him to choose his own assistants, the council appointed the head coach and his three assistants as well. W. W. Lillard, '05, of St. Louis was selected as head coach. He is there with W. J. Randall, '06, of Boston; L. C. Turner, '04, of Ross, O., and J. T. Gilman, '05, of Baltimore.

centralization arrangement, in which full advantage is taken of both beams, is considerably more advantageous than that in which both beams are held perfectly parallel. A new automobile paradise has been discovered in northern Africa, by Captain Samuel H. Robinson, who has just returned from a tour of inspection of the Sahara desert. He has discovered a vast tract of land, rich in minerals, and well suited for automobile travel. The land is rich in minerals, and well suited for automobile travel. The land is rich in minerals, and well suited for automobile travel.

While there is much doubt as to any great change by the incoming legislature in the New Jersey motor law so far as it relates to Jersey motorists and speeding, yet there is good reason to hope for the abolition of the \$10 tax imposed on visiting motorists from other states. The New Jersey legislature has declared war on this tax and Governor Fort has announced that he is with them for its abolition. An automobile expert who has made a study of horses is authority for the statement that sorrels are the only absolutely safe horses. Sorrels are the only absolutely safe horses. Sorrels are the only absolutely safe horses.

Valuable assistance has been given the automobile school of the West Side Young Men's association of New York by the school of automobile mechanics, several of whom have donated cars for laboratory work and instruction. The school is a very successful one, and has been a great help to the automobile school of the West Side Young Men's association of New York.

As two women were traveling in a motor car near Rouma, on the outskirts of Paris, a stag, half grown, was running across the road. The car was stopped, and the women were looking at the stag. The stag was looking at the car. The stag was looking at the car. The stag was looking at the car.

A mixture of olive oil and white lead, reduced to a workable consistency by white lead, makes an excellent coating for metal parts of the engine or machine. The mixture is easy to remove by means of turpentine or kerosene. The mixture is easy to remove by means of turpentine or kerosene. The mixture is easy to remove by means of turpentine or kerosene.

New York Nationals for Sam Mertes and "Doc" Marshall and a sum of money, said to be \$10,000. Sharp dropped out of last season's race, but is expected to be back in the coming season. The champion Cubs for next year, Marshall is also with the Cubs, being a sort of a present from Robison to Murphy. Jake Beckley is playing first for the Kansas City American association team. Shannon has also dropped to the ranks of the minors, while Snodgrass is with the Toledo team of the American association. Danlevy is holding on at St. Paul and Taylor is with Columbus. McFarland is performing in the sunny south, while Grady is in the Tri-State. O'Neill and Farrell have dropped out of first base.

START FOR THE BALLOON RACES

President of Aero Club Looking for Site. NEW YORK, Jan. 9.—A. STOVE LEAGUE WINS PENNANT

Fans Cinch the Flag Down at the Smoke House.

EBERLE TOUTED AS REAL MARVEL

Big First Baseman a Corker—New Pitchers Will Go Some—King, Cadman and Graham Promise Big Things.

"Pa has landed one sure prize in that man Eberle," said the Big Bug. He hoisted his feet to the top rail of Pa's stove and, cared not that the thermometer was moving toward the bottom of the bulb. Brother Dave brought in a fresh bucket of coal from the back yard, for he saw that the Smoke House fans were excited to discuss the coming season. The date was just half way between the closing of the old season and the beginning of the new and when this was noted the fans were at once reminiscent and with their minds on the great national game, cared not a whit for niceties of heat and cold.

"I know what I am talking about, for I was in St. Louis when he was trying for first base against the big Bohunk Konechky, who was finally given the job, and it was nip and tuck which won as the place. Eberle is only six feet, three in his woollens, and will reach all the way from Gondoing to Graham without taking his feet off the sack. I like these lengthy first basemen, for when you get a good one there is sure to be some class to go with it, and that ain't all he can do for he is there at every branch of the game. Just keep quiet, I'm not saying anything against Autrey—he was the best in this league, but when he has gone we have to look for another, and I am sure Pa has the goods in Eberle."

Struck on Outfield.

"I'm pretty much struck on that outfield," chimed in another bug from behind the stove. "There's nothing to it—it'll have anything in the league skinned a city block this year. You know Doctor Walsh, the league at the bat and Fisher was about the best ever and when you add King out in right field you have a trio that will be hard to beat. You know, I like that little King better than any player in the league. He is there with his noddy all the time and on bases is getting faster all the time. Did you ever notice the lead he always gets?"

"Oh, I don't know as he leads off any further than Fisher," insisted the Chief Bug, whose work keeps him away from the game every day but Sunday, but who gets there before 1 o'clock on that day.

"Well, perhaps, he doesn't but then that man Fisher is always 'on' to be able to lead off and that is what makes him so good," said Goodfellow Bug, who likes them to their kind.

Rice and Lower in the Box.

"They tell me those two throwers that Pa got from Cincinnati are all the good," said the Big Bug in a quizzical way. "Well, Pa doesn't say much about them, but he wants to spring them as a surprise on the fans. I have looked them over and know the both Rice and Lower will be heard from in this league and the Original Fan from behind his muffler."

"Well, I guess Jimmie was about the best that ever struck those designs, but they tell me we are all going to like his old running mate, Pender, who's back at the Smoke House. I saw the gloom gathering over the same of Jim. You know, he is a grand old player. He is little, but oh, my! He is fast on bases, can hit and is a clean fielder."

"But you fellows were talking about pitchers and you forgot to talk," interposed the Big Bug. "I still have to add to the star of the league this year. Look at his record, look at him. He goes for my money. And you can't tell but Slim Hall will be back in shape this year. You know, he was sick last year and did not get back on his feet in time to play for much good to the team, but I look for him to be up and coming this spring. You him to be up and coming this spring. You him to be up and coming this spring."

"Pa still has a string on Ritzman, the southpaw who went around winning pennants after we farmed him out last spring. I don't know much about that, but I traded Johns of Dayton, and he seemed good things have come out of Dayton, and you can't tell."

How About Old War?

"I guess you have forgotten War Sander. He only makes three good southpaws and I guess that will be bad against some of the westerners. You can't tell, but I hear a grand old player, he will be good in the spring. I don't know much about that, but I traded Johns of Dayton, and he seemed good things have come out of Dayton, and you can't tell."

"Now, that is where I am stuck," answered the Original Bug. I have tried to pump that out of Pa, but he only looks wise. I have a sort of an idea that Pa has something up his sleeve on that shortstop position."

"Don't overlook that boy Summa," put in the Big Bug. I saw him break up several games with his bat last year and he may crowd some of your fixtures out. And then I hear a grand old player, he will be good in the spring. I don't know much about that, but I traded Johns of Dayton, and he seemed good things have come out of Dayton, and you can't tell."

"And so the bugs went on, and if the pen-ant is not won long before the season opens it will be a wonder. Brother Dave runs a good size lead on the fire gets so low that the bugs cannot sit around the fire-side at the Smokehouse and win pennants. Graham is in Fine Form."

George Graham, Omaha's great second baseman, who wrenched his knee in warming up for an exhibition game with the regular White Sox last spring before the regular opening of the league season and was therefore not able to play all season, is fast rounding into shape. Graham is back of the counter at the Smoke House and listens in silence to the speculation of the fans. He has been most sensible in the treatment of his knee and has given it all the rest possible, with the result that it is getting strong. George has placed himself in charge of an osteopath who has been putting in some long and effective hours over and over by working out a little slow in the spring should be able to soon strike his old pace, which was a little too fast for any second baseman in the Western league to follow.

HAL CHASE STILL IN DEMAND

New York Americans Pursue the Rebellious First Sacker.

NEW YORK, Jan. 9.—Although there has been no definite announcement made from headquarters, reports that are carefully allowed to leak out of the New York American league club office from time to time, it is now pretty generally understood that Hal Chase will be back on first base

1909 Chalmers-Detroit "30"

30 H. P.—\$1,500

ACCOMPLISHMENT

"Completion, fulfillment, entire performance—Webster"

No word more nearly describes the result of the efforts to the Chalmers-Detroit Motor Co. Their 1909 "30" is an accomplishment in every sense of the word. It is the automobile in its finished state, the fulfillment of the designer's fondest hopes. To the purchaser it offers a car of the highest class at a moderate price, at an honest and fair price, with design so simple and practical, so free from complexities and troublesome appliances that its up-keep is reduced to the minimum. Don't be satisfied until you have given the machine a thorough examination and received a demonstration of its power, quietness, ease of control and easy riding qualities will surprise you.

READ THESE SPECIFICATIONS:

Motor, 4-cylinder, 30 H. P., water cooled. Wheel Base, 110 inches. Transmission, selective type, 3 speeds forward. Wheel Size, 32 inches. Rear Axle, full floating type, Body, 3, 4 or 5 seater. Color, Chalmers Red—Red Gear or Royal Blue—Red Gear.

Forty-five of these cars now on hand for immediate delivery.

H. E. Fredrickson Automobile Co.

2046 FARNAM STREET

ONLY SCIENTIFIC METHODS CURE

Come to the leaders of medical specialism. Years of close study, thousands of dollars spent in researches and scientific investigation have made us expert and proficient. We are a physical and a mental cure. You cannot afford to jeopardize your future health and happiness by neglect or experiment with uncertain and unreliable treatment. If you suffer from any disease, caused by ignorance, indifference or contagion, you are the very man we want to talk and help. Do not permit false delicacy to preclude your cure and deprive you of a useful and every day but Sunday, but who gets there before 1 o'clock on that day.

"Well, perhaps, he doesn't but then that man Fisher is always 'on' to be able to lead off and that is what makes him so good," said Goodfellow Bug, who likes them to their kind.

"Oh, I don't know as he leads off any further than Fisher," insisted the Chief Bug, whose work keeps him away from the game every day but Sunday, but who gets there before 1 o'clock on that day.
