# Street Car Accidents HAPPEN

## Because People:

- 1.—Persist in getting on or off moving cars;
- 2.—Get off, facing towards the rear of the car;
- 3.—Run after a car and attempt to board it while it is going at a high rate of speed;
- 4.—Cross behind one car and step in front of another car coming from the opposite direction;
- 5.—Turn their vehicles sharply in front of a car;
- 6.—Use no caution when driving across street car tracks;
- 7.—Are allowed to make the streets their playground;
- 8.—Or steal rides on the cars.

Won't YOU Bear These Things in Mind and Assist Us in Preventing Accidents.

## Right or Wrong

Electricity for power is either desperately wrong or everlastingly right.  
You ought to know which.  
Motors connected direct to machines, eliminating useless line shafting, are either a big mistake or a big advantage.  
A motor started with a simple switch by ordinary workmen, compared to high priced engineers to start the engine, is either a foolish fad or advanced common sense. It will pay you to investigate.
