Wheat Receipts Moderate, Stocks at Primary Points Fall. GENERAL SENTIMENT IS BULLISH

From a Supply and Demand View of the Situation It is Believed That Values Will Soon Advance.

OMAHA, Jan. 25, 1909. With wheat receipts only moderate and stocks at all primary points decreasing, the general sentiment runs bullish and all trades are made on temporary dips for short advances. From a supply and demand view of the situation it is believed that values will soon advance.

On these advances prices for corn and more favorable weather for shipping corn receipts are more liberal and as the country roads improve a still larger movement is expected as farmers are more disposed to part with their corn than heretofore.

Following a decline Saturday wheat opened firm on higher cables and a flash that the visible supply had increased and however scattered selling was met on the advance, backed by bearish floor corn which sold at 1.00 1/2.

Wheat—Receipts, 165,000 bu. and shipments were 161,000 bu. and receipts last year were 1,018,000 bu. and shipments were 1,077,000 bu.

Clearances were 138,000 bu. of corn, none of which was shipped to the coast.

Liverpool closed higher on wheat and unchanged on lower on corn.

MONEY MARKET REDUNDANT

Bank of England Gets Gold From South Africa Without Opposition From Bank of France—First Time for Weeks.

NEW YORK, Jan. 25.—Developments over the week-end had no effect in moving sentiment in the stock market, although some of them were unfavorable.

The Bank of England was permitted to take up the South African gold laid down in the London market, which had been held by the Bank of France.

Additional significance was given to the fact that the French bank from the Balkans was more circulated through foreign markets, the danger of being a positive motive for selling up gold in Paris.

This supposition is cleared away by the fact that the gold was sold in London and England. The issue of the gold was not expected to lead to a great easing of the money market, an early discount rate of 1 1/2 per cent. for the gold was not expected to be granted.

The option market was without transactions, closing low higher. May closed at 97 1/2, July at 97 1/4 and September at 97 1/4.
