There are Little Soldiers in Your Blood

They are the white corpuscles, and there are millions of them.

It is their duty to defend you against disease, by protecting the red corpuscies and the bodily tissues from disease germs - those dangerous micro-organisms of which so much is now known.

You are helpless unless these little soldiers in your blood have the health and strength to fight for you-to repel the many infectious and contagious diseases whose germs are in the air you breathe, the water you drink, the food you est, and on things you touch.

Among these diseases are typhoid fever, scarlet fever, diphtheria, grip, spotted fever, smallpox, malaria, ague, tuberculosis or consumption.

To make and keep these little soldiers healthy and strong, is sim-

ply to make and keep the blood of the right quality and quantity. This is just what Hood's Sarsaparilla does.

It is the best preventive as well as curative medicine.

If your blood is impure and impoverished,—a condition indicated

eruptions, scrofula, eczema, catarrh, rheumatism, anemia, ner-vousness, tired, languid feelings,

loss of appetite, general debility,—
then the soldiers in your blood are
not in condition to fight for you.
They need better health and greater strength. You should begin tak-ing Hood's Sarsaparilla at once.

\$5 Hood's Sarsaparilla effects its wonderful cures, not simply because it contains sarsaparilla, but because it combines the utmost remedial values of more than 30 different ingredients, each greatly strengthened and enriched by this peculiar combination. These ingredients are the very remedies that successful physicians prescribe for the same diseases and aliments. There is no real substitute for Hood's Sarsaparilla. If urged to buy any preparation said to be "just as good," you may be sure it is inferior, costs less to make, and yields the dealer a larger profit.

Begin taking Hood's Sarsaparilla today. Get it in the usual liquid form or in chocolated tablets known as Sarsatabs. 100 Doses One Dollar.
