complaints. However, they seemed well founded and quite seneral. We even heard it in Grand Island, "Discharge that cook at Milford,"

The water supply is secured from damming a creek and filtering the water. Much complaint is made regarding this, and we would recommend that a well be made of sufficient especity and that water be forced into the buildings on modern principles.

We found that there is no more buildings needed at present. The appropriation of \$15,000 made two years ago for buildings at the home. needed at present. The appropriation of 18.000 made two years ago for buildings at the home was used, so far as we could see, for what is called an administration building, but in reality meant to be a palace for the commandant. The building is unfursished and we recommend that when it is completed that it be turned into or used for a woman's ward or quarters and that the administration officers. ters and that the administration officers he kept where they now are. We recom-mend a nominal appropriation for keeping buildings in repair and for construction of

buildings in repair and for construction of an elevator in the main building.

In the Grand Island home a general good feeling existed between officers and inmstes and the home proper in good condition and order, but the farming operations seem to be slack and certainly a losing proposition under the present management. Stock generally looking badly, fences and buildings going to rack, forty or fifty acres of hay, affalfa hay and bluegrass lying in windrows—the only thing of the kind that we saw in a hundred miles of travel. Hay was being dumped in loads on the ground for the stock to tramp over. Alfalfa hay used for bedding for nows falfa hay used for bedding for cow tile there was a large stack of straw while there was a large stack of straw a few rods away. Rank weeds were growing in some of the roads running along the farm. Under this condition, as it is, it is hard to secure a good commandant and a good farmer in the same man. We would recommend that the land be rented, reserving enough for garden and pasture for rilk cows sufficient to furnish milk for the institution. We would further recommend that the twelve acres on the west ade of the farm adjoining the cemetery be bought by the state to be partly used for cemetery purposes, as the present cemecemetery purposes, as the present comeother suitable place for a cometery on the farm.

Brown of Sherman introduced in the hous his bill to give to the land commissioner authority to permit the taking of sand and gravel from the school lands of the state. This is the same bill he had killed several days ago, though he announced this morning the "nigger" had been removed from the woodpile and assausinated. The "nigger" was the authority of the land commissioner to permit the taking of pumice from the school lands. The bill was ordered for engrossment and third reading without going through the hands of a com-

Killen and Armstrong insisted on favorable action on the bill, but Taylor of Custer wanted to know why the money could not be paid out of the appropriation for the last biennium. He made this a motion and it was adopted, and then the house jumped onto the whole bill and butchered it. The death blow was dealt while Brown of Lancaster and a half dozen others were trying to talk and Brown had repeated several times, "We are in a peculiar situation," but he got little further. I am in full sympathy with your anti-Jap bill. "East is east and west is west, and never the twain shall meet," so wrote Kip-ling, and I believe he was right. G SALE OF RUGS

Chairman T. S. Allen, who is attorney for cervain fraternal interests, has been in the senate a number of times laboring with Mr. Bartos and with the individual members of the insurance committee to force a meeting, notwithstanding Mr. Allen is not registered as a lobbyist on the record book in the secretary of state's office.

Two bills introduced by Senator Volpp of Dodge county have claimed attention and although they are innocent looking on their face, there has been a disposition to make much over them. One permits the taking over of the business of mutual accident, sickness and benefit societies, together with all their assets, claims, etc., by a stock company of five members, and the other bill permits mutual companies of this sort to transfer their business to stock companies of this kind. It is said that the interest of Mr. Allen rests particularly in these and others of the good that will come to MANY BALK ON THE BANK BILL. various mutual societies through their passage. The measures will provide the method for consolidation of companies and will, Mr. Allen is quoted as saying, be largely in the interest of any company that is taken over from the ranks of a mutual into the fold of the stock compan-

Regulation of Mutuals. Among the bills introduced by Senator Bartos is one to make mutual fire insurance companies pay to their deputies and agents soliciting insurance the \$2 fee which is claimed in their reports to be all that is allowed in the way of commission. "I have nvestigated," said Chairman Bartos, "and while I find that the reports of the companies make it appear that the agent's fee of \$2 is all that is paid in the way of commission, they are really paid what will amount to 25 per cent of the premium in some instances. This is actually more than the stock companies pay on a \$2,000 policy, and it makes the expense roll of the mutual testing have been ushered into the office companies so high as to render their busi-

ness unsafe. "Another bill of mine changes the law governing mutual fire companies which now believe they have sufficient votes to put may have a guaranty fund. As a matter the bill through without amendments. of fact, my investigations reveal that while they are permitted to have a guaranty fund this morning provides that all the banks a fund, and they secure business on the visions of the bill shall be examined imtheory they have a fund when they do not, which is a decided injustice to others of law. This will necessitate the appoint the same business who are regulated ment of an army of examiners in order strictly.

"My study of mutual insurance has consinced me that the expenses of conduct are too high, that the law as it now stands permits misrepresentation, and that as a mater of fact there is misrepresentation every day of the year in the mutual insurance business. Salary rolls are padded and expense lists grow in a manner all out of proportion to the business transacted. "Now, mind you, I do not refer to the

small farmers' mutual companies that are rganized quite generally over the state, which go into the companies for mutual protection merely and pay their officers merely nominal sums for actual work done Their rates are low and they are generally patronized and they furnish protection because they are not being operated for the benefit of a number of individuals, but for the members themselves. My bills will not harm them in the least."

The Bartos bills would affect life com panies as well as fire and their scope is With relation to mutuals Mr. Bartos seeks

Insurance Hearing Monday.

After several postponements the senate committee on insurance will be called together for the first meeting Monday afternoon. A series of measures have been introduced by Senator Bartos, chairman of the committee, which are simed to control the mutual insurance companies and have created one of the sensations of the seasion. Insurance men have been domanding a meeting of the committee and State

titions of votes were given on roll call:

NORFOLK, Neb., Feb. 11.-Train traffic has been resumed on all lines in northern Nebraska, southern South Dakota and Wyming, excepting on the Chicago, St. Paul Minneapolis & Omaha line between Novfolk and Sloux City. After two days and two nights of plowing, two engines from Norfolk reached Hoskins, ten miles northeast of here, early today, when the snowplow was smashed to pieces and both engines derailed by encountering a stiff drift. As there are many more deep drifts on the line it is not expected that traffic can be resumed for several days.

Congress Proposes to Repeal Salary Increase of Secretary of State.

Senate Committee on Judiciary De clares Proposed Plan Would Make Senator Eligible for

Cabinet Place.

WASHINGTON, Feb. 11-Senator Knox s declared by the senate committee on judiciary to be eligible for appointment to the office of secretary of state, providing the salary of secretary of state is reduced from \$12,000 to \$8,000 a year, which was the salary prior to the action of congress in raising it during Senator Knox's present term of office.

The committee on judiciary today considered the bill introduced yesterday by egram.)-The first accurate and definite Senator Hale from the point of view that information regarding the banking bill it might be regarded as a subterfuge and a technical violation of the constitutional house and senate, which was received provision intended to prevent the creation by members of the legislature through of lucrative positions for members of con-The Bee this morning, caused a lot of gress. Finally it was decided that the main proposition of the Hale bill, which was to repeal the increase of salaries of cabinet members so far as it referred to secretary of state, was sound. The phraseology, however, met with criticism and it was decided to draft a new measure. The new bill, in accordance with the

views of the committee used the word 'emoluments' instead of "salary," in order to be in harmony with the language of the constitution.

It developed during the session that the committe was not unanimous in regard to he question whether it would be possible to repeal the salary increase provision so as to make Senator Knox eligible for the office. Senators Kittredge and Overman seemed to be in some doubt as to the propriety of taking this action, but they will not make a minority report, and it is said they will not oppose the passage of the bill when it comes upon the floor of the

ered about the court house, when Commissioner Handley announced that he was ready to sell the Rock Spring farm. The bidding started at \$1,500 and was gradually worked up to \$3,600, at which price it was sold to Mr. Collier's representative. After the papers had been properly drawn and recorded Mr. Jones started to drive back Elizabethtown and encountered one of the belated bidders who was mercilessly hurrying his horse to reach the auction in time to bid. An indignant salutation greeted Mr. Jones' announcement that the Lincoln farm was in his pocket.
