DR. E. R. L. MURPHY Loose Teeth Made Firm

If you are a victim of pyorrhea, commonly known as Riggs' disease, (loosening of the teeth and sore and bleeding gums), we are alble to tighten loose teeth and cure your sore gums; it is a simple method and not in the least discomforting.

Dr. Murphy's Method is the original and only method of supplying missing teeth, or tightening loose teeth, without the aid of plates or ordinary

bridge work. When these teeth are in place it is a difficult matter for any one, even the one who is wearing them, to tell which are nature's teeth and which are "artificial teeth.

In shape, size, color, looks and action, they are a perfect substitute for the teeth which grew in the mouth, and as firm as a rock. They are made to eat with.

You can imagine how the announcelic, who were wearing false teeth, when the columns of the daily press that we missing teeth without the aid of p tial plates or even ordenary bridge work. Our offices were beseiged with people anxious to find out what we make teeth stay in the mouth.

by offering to restore all the teeth they had lost with our method and guarantee the work. We told all these people, and we tell you now, that if have two or more teeth or roots left in either jaw we can supply all that you have lost and make them as solid as a rock in your mouth, so that they will look and feel and act like natural teeth, and, in doing this, we won't cover up your mouth with a plate. We won't cause you any pain or discomfort while we are doing the work, and becomes a pretty big job. we won't charge you any more for it than any first-class dentist would ask for ordinary work.

Think of the blessings that follow tiful to look at-beautiful to eat with! We beg of you not to confuse us with

cheap advertising dental parlors. First-To protect ourselves against such people who have been stealing our name, advertising matter and fame.

Second-To protect the public against loss of teeth and money, through the dangerous counterfeiting of the original method as practiced exclusively by

Send for our free book, "Dr. Murphy's Method"-which explains the system thoroughly-if you can't visit our offices in person.

DR. E. R. L. MURPHY 510 N. Y. Life Bidg., Omaha, Neb.

ommended by men and women everywhere. It is a standard article of lasting reliability. Mme. Yale says: "I can conscientiously recare in need of an article of this kind. I have used it myself for over thirty years, and the perfect condition of my hair and scalp is sufficient proof of its excellent and harmless efficacy. Hundreds of thousands of people all over the civilized world will say as much in favor of Yate Hair Tonic as I can. Yais Hair Conic is good for Fall-ing list. Thin Hair and Gray

ADVERTISE IN THE OMAHA BEE BEST IN THE WEST

Type of the Men Who Build Up the Great Railroads.

REAL GENERAL OF RAILROADING

Was a Freight Clerk When Hemtington Found Him and Now He's Harriman's Right Hand Man.

A man with sharp, piercing eyes and a listening to the efforts made by the attorneys for the government at a recent hearing to show that the combination of a handful of governors. railroads formed by E. H. Harriman was fliegal and should be dissolved under the flo director are in Chicago. From there he

Sherman act. At different times the testimony had to apples of Washington, the mineral prod- plains, and all the time Mr. Stubbs is the plains of Kansas, but no matter what carriers are doing particularly those domthe crop was or where is was grown this man seemed to know more about it than of one of the biggest railroad systems of mental notes and every week or so comes the country.

J. C. Stubbs is the traffic director of ment was received by the general pub- railroad traffic man has become, because had discovered a method of restoring and bost lines, a far greater mileage than road systems. Charles F. Daly, for inman to control.

It is the business of a traffic man of a meant by the statement. None of them know about a railroad itself, how steep its small in area as compared with that over could imagine how we were going to grades are, how many cars can be hauled by one of its locomotives and other things Naturally we were prepared to meet about its operation, but he must also know these questions and to meet them in what crops are grown along its lines. the most convincing manner—namely, what crops might grow and what indus- eastern traffic men have little pioneering tries can be fostered in the territory which his system covers.

Many Chances to Fall Down.

In short, he must know about as much as the census bureau and the Department of Agriculture combined. It would be a poor traffic man, for instance, who couldn't tell offhand just about how many peaches were produced in a state through which his road passed, but when you are traffic director of a system covering with all its

The traffic man of the hig railroad good, sound, nut-cracking teeth-beau- by promotion to such places in many in- of the people who occupied that land bestances, as for example, President Ripley men Mr. Stubbs is frequently spoken of find them in Cansan as the traffic brains of Mr. Harriman. It has only been within recent years that and to him has been credited many of we have been able to know that the word the latter's moves, most of which are in- "aiphabet" came to us from the Phoespired by considerations of traffic, such, nicians. Before that we supposed that for instance, as the acquirement of the it came to us from the Hebrews, through Illinois Central and the stock purchases the Greek. As we say "A B C" the Greeks in many of the important lines in the said "alpha beta" (the first two letters

up as a shining example of what the had come to the Greeks from the Hetraffic expert has become in this country brews, who called their first two letters through the consolidation of railroad to be considered about all a traffic man brews got the word "alphabet" from the task to master all there is to be known about the crops and industries of such a letters, "alph" and 'beth," which have diversified character as is to be found suffered but little change in sound down west of the Alleghenies, but Mr. Stubbs to our A and B. Alph meant simply an is credited with having done so.

'It would surprise me," said a railroad not tell me offnand how many figs there meant a house, which was pictured by the were growing this minute on the fig trees rude outline of a primitive dwelling. of California, for he's got the crop rehead. That's why he's such a marvel."

Must Inspire Producers.

man who inspires the farmers to experi- call our "siphabet"-New York Herald. ment with new crops and miners to look for new mines. That is because his constant aim is to get more traffic moving over his railroad, passengers as well as of Mr. Stubbs in promoting new crops, and took half of it myself, what would be but there are also those who just as left?" vehemently hold that Mr. Stubbs by keeping up rates has retarded it.

Stubbs started in when a young man as That was back in the '70s, when Collis P. Huntington was building up his railroad proud of you." system. When he found out how much began to promote him rapidly until he can't I?" finally became the traffic director of the Southern Pacific, and as such the man who made the rates for the Pacific coast and its two important outlets. If a town didn't grow fast enough they blamed it on Stubbs then. It was all because he didn't make the right rate for it. It didn't matter how much its citizens put their shoulders to the wheel in its upbuilding, unless Mr. Stubbs smiled and offered to help there was a feeling that the town would stand atill. That is why Mr. Stubbs for twenty years has been a more important figure in some new states than the prosident.

All of the business of a reliroad, both passenger and freight, is under the traffic frector. He is the commanding general of a small army which has nothing to do with the actual operation of the system. He is there to build up towns, to attract immigrants and to start them in business.

Judge of First Instance. If a town wants increased facilities, an extra siding, perhaps, eventually it will be up to the traffic man to say whether or not the request be granted, though of course generally the president and the Mirectors must act fermally upon his recommendation before it is authorized. And the traffic man will determine it just in accordance with his estimate of the amount of increased business such a step may menn, an estimate formed after he has found out all about the town, its inhabifants and their ways of making a tiving. Sometimes instead of one town it may be half a dozen little communities scattered over a valley yet untouched by the railroad which are to be considered, and in that case the traffic man must know all about the soil and what it can produce to make

a branch line pay. In northern California, for instance, both the Harriman forces, led by Mr. Stubbs. and the Atchison, Topeka & Santa Fe, deided that there was a fruitful soil and a country which could quickly produce revenue, and both projected branch lines, reuiting in a railroad war. In Arizona three ears ago, the Atchison for the same reaon started building through the so-called Glia canon a line intended to open up a territory of 200,000 square miles, supposed to se rich in mineral resources and which would afterward be affected by the great rrigation scheme of the Roosevelt dam. This was another case where the truffle couldn't be caught napping. In this case man of the rival line had to show that he Stubbe was on the job, and the result was another railroad war, ending in the agreement between the Harriman road an

the Atchison road which is one

While the territory in which the traffic nan is such a factor in all commercial and industrial development has been greatly extended in the last decade or so owing to the consolidation of railroads, the traftle man bus not the arbitrary power be once had. This is thue to legislation givng the right of appeal from his decisions to the Interstate Commerce commission.

Commissions Change Authority. Years ago a traffic man could fix a rate for a town on his line and boards of trade might protest in vain against his injustice, but now the Interstate Commerce commis sion can step in and exert its authority. Nevertheless a traffic man of any of the face smooth shaven and heavily lined sat big railroad systems, and particularly one covering the new part of the country, is a mighty big figure, higger sometimes than

The headquarters of Mr. Harriman's trafgives his orders, which are executed on the boat lines on the Atlantic coast as do with the peach crop of California, the well as on the rall lines across the western ucts of Arlzona and the alfalfa grown on watching what the other transcontinental insted by the gentus further north, J. J. Hill. And watching the flow of traffic the lawyers or witnesses. This was be- from ocean to ocean and that put off at cause he was the railroad traffic director way stations, Mr. Stubbs keeps making on and has a talk with Mr. Harriman, who got Mr. Stubbs when he got the Southern the Harriman lines. He is perhaps the Pacific and immediately made him combest example in this country of what the manding general of the traffic of all the lines he controlled. Of course, Mr. Harriwith the lines acquired by Mr. Harriman man's traffic general is not the only one a few years ago we announced through Mr. Stubbs now controls absolutely the whose task has become of great magnitude traffic moving over 27,000 miles of fall with the development of America's rall-It has ever before fallen to any one traffic stance, who occupies the same relative position to the New York Central lines, has a job nearly, if not quite as big, for while railroad to know not only all there is to the territory covered is comparatively which Stubbs holds sway, yet it is a territory where in one state are to be found more industries and more people than in that covered by Mr. Harriman, But the to do, and this is one of the great branches. of the work done by the class of which Mr. Stubbs is the best example.

VETRERAN OF UNKNOWN AGES

"Alphabet" Heary With Ages, but Does Business at the Old Stand.

When we speak of our A B C's as our lines more than half of the country this "alphabet" we are using a word hoary with age, that, as far back as we can trace it, came from the eastern shore of the generally ranks next sto the president. Mediterranean sea, thousands of years be-Sometimes he is the president, for traffic fore the Hebrews went up there and took experts have had the ability recognized possession of the land of Canaan. Back fore the events of Exodus were written of the Santa Fe. In the case of the we are not able to trace the word, for wo Harriman lines the president is not the have not sufficient knowledge of them or practical traffic man. Among ratiroad of their etymological history before we

of their alphabet), which when it reached In railroad circles Mr. Stubbs is held us became "alphabet." This we supposed "alph" and "beth," but since then we have lines, any one of which years ago used found that both the Greeks and the Hercould look out for. It is something of a same source, which was the Phoenicians. The people of Phoenicia had the same ox, the sign of it being a conventional ox's head, with the lower part of the official the other day, "if Stubbs could face turned slightly to its right, and beth which had a superfluous line added to port of every state in the west in his distinguish it from an O. So the first two letters of our A B C's were originally an ox and a house and gave the name of In a new country it is often the traffic all of the twenty-six letters, which we

What Liquocide Is

Liquocide is a tonic-germicide, the virues of which are derived solely from oxide gases. No alcohol, no narcotics, nothing but gas enters into it. The process of making requires large apparatus, and consumes 14 days' time. The object is to so combine the gases with liquid as to carry their virtues into the system.

purifying.

germicides are poisons when taken internally. They are impossible, for they destroy
