FIGHTING THE WHITE PLACUE

Religious Bodies Join the Campaign Against Consumption.

EDUCATION AS A PREVENTIVE

World-Wide Interest in Abating the Great Scourge-Curative Power of Fresh Air, Rest and Wholesome Food.

Within the last four months the churches of over 100 different cities in the United States, all the principal religious denominations, and several interdenominational sosleties, have united in a campaign against consumption, according to a statement issued by the National Association for the

Study and Prevention of Tuberculosis. Notable campaigns have been conducted by the ailled churches of New Tork, Brooklyn, Pittsburg, St. Paul, Milwaukee, Washington, Chicago, Providence, Baltimore, Trenton, Seattle, Philadelphia and many other cities. In most of these places a special Sunday has been set aside on which sermons about tuberculosis have been preached in the various churches. So successful has been this method of depm claring the gospel of fresh air, that it is being adopted by pastors all over the coun-

In several of the larger religious denominations definite resolutions by some of the local ministerial organizations, allying these association with the tuberculosis movement, have been adopted.

Foremost in the fight against consump

tion is the Roman Catholic church. In this

church, under the direction of Archbishop Ryan of Philadelphia, an educational crusade against tuberculosis is being carried into all of the parochial and other schools in its control. As a result, over 1,250,000 school children in 12,000 parishes are being reached. The clergy of the church have been asked also to instruct their congregations on the dangers and methods of preventing tuberculosis, for the purpose of bringing the simple doctrines of the cure and prevention of this disease to every one of the 17,000,000 Catholics in the United States. The work of religious bodies in the war against tuberculosis received a great impetus in 1906, when Emanuel Church of Boston, under the leadership of Dr. Joseph H. Pratt and Rev. Elwood C. Worcester, started a movement for the treatment of tuberculosis patients in their homes under the supervision of the church. As the patients held weekly meetings at the church for instruction and advice from the physiclans in charge, the organization was called a class. So successful was the Emanuel class's first year's work that many other churches throughout the country have followed this example, and tuberculosis classes have been formed in a large number of cities, in many cases, independently of church organizations. There are now about fifty regular classes in existence, over onehalf of which are conducted in connection

with churches.

The activity of the church, however, as center of education in tuberculosis, is of much more recent growth. In fact, almost all of the preventive education work of the churches has been accomplished in the last four months. The National Association for the Study and Prevention of Tuberculosis estimates that there are now over 20,000 church congregations to whom the message of the prevention and cure of tuberculosis has been preached, and the number is in-

creasing daily. The religious campaign is not only undeominational, but it is also interdenominational. The Young Men's Christian association, for instance, has started an active crusade against tuberculosis. Through its LATEST UMBRELLA HANDLES physical department instruction is being given concerning the nature and dangers of consumption to all of the men and

This was the manner in which she was

discovered by men who went out from

Pensacola to St. George's island, where the vessel was sighted aground. She had evifor her complexion, and the smallest vial dently gone upon the beach easily, for she of perfume. Other parasol handles contain had suffered no injury, except a little to the hull, where she had pounded on the sand, and can easily be repaired. On December 20 the vessel was caught in not strike for happy ones," and the old a terrific storm on the gulf, which raged so fiercely that the captain and crew were

washed from the decks. The sails were set then, and they have remained so, the vessel wandering about the gulf and turnfinally landed on the beach. During this period the gulf was visited by half a dozen severe storms, but the vessel, without a man aboard, weathered them all. Aboard were found a portion of the

Discovers a New Astral Law?

Robert L. Hodge, a house painter, of Franklin Park, has invented an astral calculator, based on what he claims as his discovery of a new astral law, which he believes will revolutionine the world's chronological system. According to his theories, the season changes are not caused by the earth's revolution around the sun, but rather by a yearly revolution of the sun in an orbit apart from the earth and by a balance motion of the earth on its equatorial axis.

Hodge has traveled across the country taking observations to verify his theory. Under this, a calendar year would consist of exactly 364 days, with each fourth month, beginning with March, consisting of exactly thirty-one days, the other eight months of thirty days. He has worked out a new astral calculation to take his observations.—Boston Herald.

cargo of navai stores, while that portion conceited about their looks as are their stored in the hold was intact and uninjured. This is the most remarkable mariman-down handles of a year ago, those of time occurrence known in years.-Cincin-
