Gong. RECORD SINCE LEITER CORNER

Corn in Sympathy with Wheat and Light Receipts Have Tendency to Help Bulls in This Genin Also.

Wheat began to soar again after the first tap of the going Saturday morning. One streingth of the market is due entirely to the support of the buil leader based on the advanced cash demand and a confirmation of the slipinage of the present crop. Corn is strong and up with wheat. We celpts of corn have failen off and during the next few weeks are expected to be light as seeding has begun.

Wheat was strong mean today and closed to up making a new high record since the Jou Letter corner. Responsive cables and the strong each situation were the stimulus and the advance was pronounced. Further advances are looked for may the frozent is well supported. May wheat opened \$1.13% and closed \$1.14%.

Corn was strong with wheat and showed renewed activity. The light receipts and less responsive acceptance from country shippers proved the feature. Sentiment was builtsh at the close and better values are looked for. May opened at \$1.24% and closed at \$1.24%.

Primary wheat receipts were \$57,000 bushels, cle and shipments were \$57,000 bushels,

1.061. The strength at the start was due to the builtsh situation surrounding the cash grain in life scanner and to are edvance of %6%d at Liverpool. The leading buil was on the buying side of the market and this started pienty of covering by shorts. Early in the day prices reacted at intervils on profit-taking, but toward the end of the first hour prices again started upward and before the upturn was checked May had advanced to \$1.224 and July to \$1.084. During the final hour the market was farilishly effected by crop damage rejects and by an improved demand for flour in the northwest. The close was strong, with May at \$1.254.27.218, and July at \$1.08%. The corn market was spasmodic, trade being active at times and then inclined to drag. The tone, however, was firm all day. The close showed net gains of a shade to \$1.08. May being at \$50 and July at \$750.

There was a broad and active trade in cats and the market scored moderate gains in sympathy with the strength of other grain. The market closed firm at net gains of \$1.08. Final quotations on May were a \$50.000 and on July \$1.098%.

Buying by a local packet, based on a 50 advance in live hogs, was the feature of the provision trade. At the close prices were a shade to 50 higher.

LONDON. April 3. — Money was more plentiful and easier on the market today and discounts were adopted. Attendance at the Stock exchange was small, owing to the Oxford-Cambridge race. Business was light, but the tone was steady, with slight improvements in consols and kaffirs; otherwise there was little change. American securities were easier. In sympathy with Wall street, and after small business they closed two points lower than yesterday, but still above the lowest for the day. The tone was steady.

BERLIN, April 3.—Prices on the Bourse today opened lower, especially in the case of American securities on realizing. Later the market turned strongly upward, notably Chanadian Pacific.

PARIS. April 3.—Prices on the Bourse Canadian Pacific.
PARIS, April 2—Prices on the Bourse today were firm. Rentes rose on the appointment by the senate of an income tax committee. The Bourse will be closed on April 9 and 10.

Totals..... 60 CATTLE-As usual on a Saturday the receipts of cattle were so small that there was nothing to make a market or to make a test of values. For the week receipts have been quite liberal, shawing considerable gain over last week, but still there is a slight shortage as compared with a year ago.

been reasonably active, the demand for that kind of cattle being rather more brisk than for the higher priced beef steers.

It would seem as if the country had made up its mind all of a sudden to buy stockers and feeders, with the result that the demand all this week has been very good. While receipts have been large, they have been none too much to supply the requirements of country orders. With such free buying every day it is not surprising that values gradually tended upward and that they are now 19915c higher than last

that values gradually tended upward and that they are now logisc higher than last week, with practically everything in the yards cleaned up.

a slight shortage as compared with a year ago.

The market on beef steers owing to the large supply declined quite sharply the first of the week, and, aithough there was some recovery later on, the market at the close is still weak to 10c lower than the finish last week. At the same time that prices have had an easier tendency, the trade has also been a little sluggish on most days, but, nevertheless, everything received has been sold. Considering the liberal receipts the market, as a whole, has not been in bad shape by any means.

The market on cows and heifers also showed some weakness during the first two days of the week, but later on, under the influence of free buying, they firmed up until at the close they are steady to 10c higher than one week ago. The movement on cows and heifers on most days has been reasonably active, the demand for that Rind of cattle being rather more brisk then for the higher miced beef steers. BIRDS AS MEN'S SAVIORS Without Them Human Life on the Footstool Would Become

Dr. Charles A. Babcock, originator of the bird day movement in the schools, which, by legislative enactment, has been taken up by the schools of twenty-one states. drew a grewsome picture of life on the earth without bird life at the East Side. Settlement house, New York City. He based his predictions upon the fact that with man added to the natural enemies of birds their extinction would goon follow -With a passing reference to the perfl of in state from the gypsy moth, which isadvancing from New England, Dr. Babcock drew a picture of nan living on small -

oses haraused by a crawling creature, without is barvests and food gone. "It should be realized." he said, "time" without birds to hold in check the insects, vegetable life would soon ceurs and life for man would become impossible upon the earth. Birds are nature's check to the amazing power of insects to increase It insect life were allowed free course in would soon overpower plant life, and theres fore animal life, including that of men,

would be impossible. This is an astounding conclusion, but it is the conclusion of "If the birds were gone, very soon the leaves would disappear from the trees, and the limbs would be restooned with the webs
