What there were sold in fair season, but without very much change in general market conditions. market. What there were sold in fair season, but without very much change in general market conditions. There were a few cars of beef steers and as a rule they sold in reasonable season, but prices did not show any very material improvement. In fact about the best that could be said of the market would be to quote it steady with yesterday. \*\*Cows and helfers seemed to be in pretty good demand and they also sold fully steady and in cases possibly a little stronger than yesterday. The few loads offered were picked up very readily, making it a good, active market. \*\*There were not enough feeders on sale to talk about, but whist there were commanded about steady prices. It was very evident, however, that common light stockmanded about steady prices. It was very evident, however, that common light stockers are not sought after. Strictly good cattle, however, sell to good advantage. classes of products women's wear goods seem most active, but the automobile trade, paradoxically enough, returns one of the best reports of any single industry. In purely industrial lines the building trades return very good reports and an enormous volume of work is planned for the coming spring and summer. The iron and steel, coal and coke trades are all rather depressed, and most activity is in structural shapes of steel, presumably at the expense of prices.

The products women's wear goods, at mark: current receipts, free cases, 19620c at mark.
