Corner in Wheat Fiction, Asserts James A. Patten

Operator Supposed to Control Market Says Line is Not Over Ten Million Bushels.

CHICAGO, April 14.—The appeal of Pittsburg bakers to the Federal Reserve Bank to take steps to end manipulation of wheat and other markets excited comment today by James A. Patten of Chicago, popularly alleged to control the present market for the high priced cereal.

"In the first place," said Mr. Patten, "I don't control the market. My line at no time has run over 10,000,000 bushels. I have preached the gospel of higher wheat because I saw what was coming. I saw it first, I believe, but when it comes to controlling the market there are two or three hundred other men who have bought who have something to say about that."

In regard to a report on the Board of Trade that he was going to quit he said: "I'm a grain trader and I don't intend to quit. I bought when the market looked cheap, as did others who accepted my view, and I'm going to sell it at a profit if I can. I have already sold a great deal. I have more to sell and when anybody offers me a proper price I will sell more. I sold some this morning, cash stuff, at 51.2. There is no corner, no manipulation. Others who bought early sell as demand develops."

"For three or four years this has been coming and I saw it. At the end of each crop bins were empty everywhere. With increasing population here and abroad it was obvious that sooner or later the crop of one year would be exhausted before a new crop was at hand. Last fall, if not earlier, I saw it coming. I bought wheat and my friends did likewise. The great unthinking public here and in Europe would not or could not see what was coming. Liverpool would not buy months ago, thinking the price of that day too high. Now Europe wants 55,000,000 bushels. The harvest was early last year. It has been trying to cover thirteen months instead of the usual twelve and it cannot do it. We need wheat for the mills right here in Chicago now."

"Here's another point. If we hadn't bought wheat—I mean myself and others—the price would be higher here than it is. Europe would have taken it, for the foreigners finally recognized the weakness of their position, where would the domestic supply have come from? We would have been compelled to buy from the very Europeans we sold to. I regard it as fortunate that it was an American who first diagnosed crop conditions and took advantage of it."

New Building Will Go Up for Manual Training

Three-Story Brick to Be Erected as Addition to the High School.

More room will be provided for the manual training and domestic science classes at the Omaha high school. It has been practically decided to erect a three-story brick building for the accommodation of these two departments and the power and heating plant for the school.

The building of the large addition to the school will necessitate a leveling and power plant of greater force, and at a meeting of the building and property committee of the Board of Education it was decided to put up a new building. Definite action will have to be taken by the whole board.

The intention of the committee is to tear down the present power house and build a large one on the northwest corner of the block, at Twenty-first and Davenport streets. The new building would be 50x120, with the boilers and the electric light plant on the lower floor, manual training on the second floor and domestic science on the third. Work on the south wing to the high school is progressing.

Ft. Dodge Objects to Asphalt Rate

Commercial Club Asserts Proposed Duty Would Make Price Prohibitive.

FORT DODGE, Ia., April 14.—(Special Telegram.)—Mayor Bennett introduced before the Fort Dodge Commercial club last night a resolution, which was unanimously adopted, for presentation to Senators Dooliver and Cummins urging their strenuous opposition to the rate under the Payne tariff on asphalt.

The old rate is \$1.50 and the new duty \$3.36 per ton, and as Iowa asphalt is largely imported from Trinidad the increase, it is asserted, would make its use prohibitive in the state. The resolution will be forwarded to Washington at once.

ST. LOUIS, April 14.—The highest price paid for cash wheat in St. Louis in thirty-one years was received today when sales of No. 2 red were made at \$1.47 1/2. NATURE'S LAXATIVE THE BEST

Many Are So-Called "Natural." Many Laxatives on the market are often styled "Natural," because of the well known fact that the Laxative which Nature gives us is the best. Such ones, constantly coming up, soon disappear because they are manufactured, and can never possess the intimate merits of the product of Nature. HUNYADI JANOS Water, the genuine Natural Laxative, has stood at the head for nearly half a century as the ONLY Laxative whose established reputation is its best recommendation. It remains always the standard because it is NATURE'S remedy in its original form, pure and simple, in no way dependent on others, or on artificial composition. At all Drugists. Try it. Look out for unscrupulous druggists, who will substitute unless you ask for HUNYADI JANOS.
