Objectionable Features of Trusts. Philadelphia Record.

Mr. Ellis, assistant to the attorney general of the United States, takes an intelligible view of the trust problem when he says that the objectionable feature is not the combination but the power to control prices. There seems to be no way of preventing the combination, and in the case of the industrial trusts there is no way of preventing the control of prices except to see that competition exists. And this means that where domestic competition has been suppressed some foreign com petition would be a wholesome thing.
