Heavy Undertone Prevails Because of Extensive Profit Taking.

MONEY SITUATION

Plurry in Call Loan Market is Considered Among the Possibilities of the Week-floads Are

NEW YORK, April 26.-There were symptoms of languor in the speculiation in stocks today and a disposition was mani-fest to harvest accrued profits rather than to undertake renewed commitments. This condition of affairs caused a heavy underto undertake renewed commitments. This condition of affairs caused a heavy undertone rather than pronounced weakness.

The money market position seemed to be responsible for this action on the part of the operators for the advance. A flurry in the call money market is considered amongst the possibilities for the present week in connection with the preparations for the monthly settlement to be financed. Money supplies at interior points are said to be redundant still and difficult to find employment for. In spite of this reserve force in the money situation there is a fear that even a slight hardening of money rates might dislodge some vulnerable market holdings of stocks of the less substantial class. Last week already a closer scrutiny was being exercised of collateral in ioans and borrowers were notified by the banks to reduce the percentage of the more doubtful class of securities furnishing loans. The shifting of loans thus brought about in itself a disturbing process. The same influence was at work in the bond market to reduce the volume of transactions in the department an to impart a heavy tone to that class of securities also. ket holdings of stocks of the less substantial class. Last week already a closer scrutiny was being exercised of collateral in loans and borrowers were notified by the banks to reduce the percentage of the more doubtful class of securities furnishing loans. The shifting of loans thus brought about in itself a disturbing process. The same influence was at work in the bond market to reduce the volume of transactions in the department an to impart a heavy tone to that class of securities also.

The day's narrow speculation centered in a few of the favorite trading stocks, notably Reading. Fluctuations in that stock were violent until it became known that the supreme court decision on the commodities clause of the Hepburn law was not to be handed down today. Less attention was paid to the stock afterwards, London turned seller in this market, prompted, it was said by the approach of

tention was paid to the stock afterwards, London turned seller in this market, prompted, it was said, by the approach of the half monthly settlement of the London stock exchange. There were traces of anxiety in some of the foreign markets over the unsettled state of affairs in Turkey. The renewed absorption of gold by Paris was illustrated in the taking of \$5,000,000 in London for that account. Reading seemed to be hurt by the intimation that heavy supplies of anthracite remained on hand to be worked off during the summer in the event of an agreement with the miners. Nows bearing on the coming wheat crop was regarded as favorable, but the further break in the wheat market lacked its stimulating effect on stocks. Time loans were quoted a fraction higher today for all maturities. The call money oday for all maturities. The call money rate did not get above 2 per cent. HOGS—Chicago got 50,000 hogs this morning and proceeded to send out reports of a break of 10g15c. As if that was not bad enough they followed a little later with a reported decline of 154;20c and with the trade slow. The effect on the market at this point can be imagined over better than described.

this point can be imagined oven better than described.

A few hogs sold early to shippers, or to packers who wanted something to kill out at once, at prices that were only 196150 lower, but it must be understood that the carly buyers picked out the best hogs taking only such loads as happened to suit them. The general market was extremely slow and as a rule packers announced right from the outset that they must have logs 15c lower or leave them unbought. More than that they did not appear at all anxious to buy even at the decline, apparently feeling that the market would weaken rather than gain in strength. Thus it happened that it was well along toward midday before very much business had been transacted.

When the hogs finally sold, the most of them went at prices that looked fully 15c lower than Saturday, and now and then something that buyers did not happen to take a notion to, sold even worse than that thouse Fretty much every-indicated the specially on light hogs. though the trade was slow.

SHEEP-Lambs commanded fully fifteer and on one or two ood sales perhaps a quarter higher than last week. Receipt quarter higher than last week. Receipts were limited and excepting a couple cars of mixed wetners and yearnings, the arrivals consisted wholly of lambs. A couple cars of clipped lambs that sold for \$6.80, looked to be 20c higher than was paid last week on the same class of stuff. While trade this morning was exceptionally active and supplies moved at the advance in shappy style, it was generally the opinion that values would not loid up very long under heavier receipts. Buyers were anxious for supplies and light receipts are largely responsible for the buige in prices. There was nothing choice in the lamb department with which to try lops, the best westerns selling at \$5.60. The scarcity of
