Cash and Book Accounts.

Correct account of cash is kept by 2.917 cash registers. One would think there are that many in Omaha alone, but not so. The Douglas county assessor could find only 749, and not in extra good condition, for they go on the tax list at an average value of \$11.53. Money in the Bank.

Money on hand or on deposit aiways shrinks unaccountably, as compared to bank statements, about assessment time. The total amount spread on the grand assessment roll of the state as subject to millions appear to be unaccounted for by the assessors, because the state banks report deposits amounting to over \$66,000,000 dog for about \$1. at the last report, and the national banks

of Douglas county alone reported deposits of \$49,364,000 in January, 1908, three months before the assessment under consideration was made. banks held \$8,537,000 of deposits at the same date, but little short of being twice the ation in the whole state. Money may make money, and money talks; but the accrued product appears not on the assessment roll,

Within sixty days the state banks of Nebraska reported loans to the amount of \$55,716,574. On the grand assessment roll for the last year all the loans that could be found for taxalior purposes amounted to but \$175.534. Evidently, if we count in national back and private loans, credits of this character to the amount of \$150,000,000 or more are escaping taxation, under the head of loans, at least.
