GRAIN AND PRODUCE MARKET

Kansas Rains Deemed Insufficient to Allay Drouth.

CASH SITUATION FORTIFIES BULLS

Declared Impossible to Buy Actual Wheat-Offerings Scarce and Buying Propmtly Advances. Values Quoted.

OMAHA, Feb. 14, 1909. The rains throughout Kansas were regarded as local showers and insufficient to overcome the damage that has resulted from the long stege of drought. The buil faction is well fortified by the strong cash situation and the fact that it is impossible to buy the actual wheat. Offerings were spare and any buying advanced values.

Corn was duil and unchanged. Higher receipts were quickly disposed of under good demand and all cash offerings brought a shade better prices than yesterday.

brought a shade better prices than yesterday.

Wheat was higher at the start and made advances steadily during the day on former foreign markets. The late rains were judged insufficient in the drought sections and there was a lack of seiling pressure that has prevailed during the early half of the week. May wheat opened at \$1.27 and closed \$1.25.

Corn was strong on continued light receipts and good cash demand. The market ruled duli, however, with practically nothing doing after the cash market closed. Sentiment is buillish and wet weather will hinder the country deliveries, cutting receipts atill lower. May corn opened at 70½c and closed at 71c.

Primary wheat receipts were \$54,000 bushels and shipments were 214,000 bushels. against receipts last year of 333,000 bushels and shipments were 385,000 bushels and shipments of \$54,000 bushels of corn. none of oats and wheat and flour equal to 119,000 bushels.

Liverpool closed %\$5%d higher on wheat

none of oats and wheat 110,000 bushels. Liverpool closed %2%d higher on wheat and %d lower on corn. Local range of options:

Market Opens Strong and Several New High Levels Are Reached.

NEWS GENERALLY FAVORABLE

Persistent Selling Under Cover to Realise Soon Undermines Values and Weakness Ensues-Bonds Are Irregular.

NEW YORK, May 14.-Prices were high again at the Stock exchange, but the selling under covering to realize profits, which has been a feature of the market all through the week, even at its periods of greatest apparent strength, was pushed steadily and persistently. The market was undermined and turned weak, after a show of strength in the first hour that was more consistent and comprehensive than at any consistent and comprehensive than at any time previously this week. The leading speculative stock all moved upward in concert. Prices have been carried to the highest level touched since January of 1957. There are prominent examples in the list of stocks that have touched record prices this week, notably among these high-priced coalers. Such speculative leaders as Union Pacific, Southern Pacific, Reading and United States Steel are within a few points of the highest prices ever reached. Pacific, Southern Pacific, Reading and United States Steel are within a few points of the highest prices ever reached.

The recent speculation has been shaping to the astumption that this country was moving to a ra of prosperity which would excel all its past history in that respect. The strength of this conviction is witnessed by its efficacy in carrying up prices to their present levels at a stage of the business revival which admittedly is immature yet. There was something striking in the unanimity with which the leaders in banking railroads and industry expressed their hopefulness today over the business prospects. The news of rains in the southwest was regarded as affording important relief, and the optimistic estimate of the crop outlook from Chairman James J. Hill of the Great Northern received a good deal of consideration. Heavy sales of copper were reported. Foreign influences were favorable to the market. Even the money outlook gave less concern than for some days past. The time loan market was called somewhat easier and the preliminary estimates of the week's currency movement indicated the largest balance of receipts over shipments in the interior for any week of the season. The hardening of time money rates earlier in the week seems to have attracted this inflow. London advices point to some borrowing there for New York account, in spite of the command by London of our gold supplies. Strength in foreign exchange pointed to further gold exports. London sold stocks here. The foreign trade statement for April shows the effect of the continued heavy imports combined with falling off in exports in the shrinkage of the excess of exports to a value of \$2.990,151, compared with \$46,920,129 in April of last year.

ompared with \$46,920,129 in April of last year.
