You wash dishes about two hours every day. That's one hour wasted!

Dishes get dirty, greasy and sticky, and soap will not clean them. Soapy dish water merely cleans the surface; it doesn't dig out the corners and drive out the decayed food particles. Moreover, soap leaves your dishes with a soapy, animal fat smell that is far from inviting.

GOLD DUST is the sanitary dish washer. It not only cleans the surface, but digs deep after hidden particles of dirt and kills the germs of decaved food which ordinary dish-water overlooks. GOLD DUST sterilizes, as well as cleanses.

Besides doing the work better than soap or any

other cleanser can, GOLD DUST will save just half the time you spend in washing dishes.

"Let the GOLD DUST Twins do your work."
