The father of the Wright brothers is lic conscience was inert. A Roosevelt a minister. The boys evidently came was needed to stir it up and breathe by their sky pilot proclivities natu- into it that vitality which spells acrally.

Tariff First. By postponing the consideration of the income tax amendment the senate has said unequivocally that nothing is to be permitted to interfere with the prompt disposition of the tariff schedules. The business of the country is more or less halted by the uncertainty inseparable with a pending

tariff bill. The special session was called for the express purpose of reaching an early determination which would remove this obstacle to trade revival and, while the debate has been longer than anticipated, no other legislation has been permitted to interfere

with the work in hand. The tariff in itself is a complex and troublesome problem which congress is finding plenty of difficulty in disposing of without intermixing it with extraneous matter. The tariff

states like Colorado.

Roosevelt and Taft.

The address of Henry Clews compares Roosevelt and Taft in a striking way. He reminds us that if anyone imagines that the American people has abated in the least their admiration for the ex-president they are nursing a delusion. It would be no less serious a mistake to believe that the poli-

cies for which Mr. Roosevelt stood are dead or even dormant. Mr. Clews points out that Mr. Roosevelt was the man for the hour when he came into office. A man of his enthusiastic personality, fearlessness and pertinacity

was needed to stir up the public conscience to a point which rendered possible the inauguration of the reforms opinion that the things against which
