GRAIN AND PRODUCE MARKET

Sentiment is Strong that Winter Wheat Crop Will Be Short.

NO ESTIMATE ON SPRING CROPS

Wheat Was Steady at the Start, but Later Weakened on a Much Improved Crop Outlook, with a Two-Cent Drop.

OMAHA, June 10, 1909.

June is the season of the year when the grain trade as a rule becomes pessimistic about future prices. Many reports are current that will not bear investigation. The sentiment is strong that the winter wheat crop will not exceed 375,000,000 bushels this year.

Reports on spring wheat are very favorable, but this class of wheat is not far enough advanced as yet to determine any accurate estimate, as conditions may change materially.

Local receipts of corn are better and should increase. The coming corn crop is in excellent condition and at present the market is a weather proposition, with prospects all in favor of ideal conditions.

Wheat was steady at the start on strong cables and good commission house support. Later prices weakened on favorable conditions and a much improved crop outlook. The crowd turned bearish at the close and hammered values for a 2c loss.

Corn was steady and held firm in the face of weaker wheat values. Cash corn was strong and higher with fair demand. Weather conditions are ideal and receipts are increasing and these features should bring a decline.

Primary wheat receipts were 273,000 bu., and shipments were 296,000 bu., against receipts last year of 313,000 bu. and shipments of 293,000 bu.

Corn receipts were 496,000 bu., and shipments were 259,000 bu., against receipts last year of 532,000 bu. and shipments of 325,000 bu.

Clearances were 9,000 bu. of corn, none of oats, and wheat and flour equal to 128,000 bu.

Liverpool closed ¼@½d higher on wheat and ¼d nighe; on corn.

CHICAGO GRAIN AND PROVISIONS

Wheat Prices Break Sharply—Improved Conditions Cause Selling.

CHICAGO, June 10.—Wheat prices broke sharply today, owing to general selling based on improved crop conditions in the southwest. The July delivery displayed the greatest weakness and sold off 2⅝c from the high point of the day. The market closed weak at losses of ½@⅝c to 1⅛@1¼c, compared with the previous final figures. Corn, oats and provisions were adversely affected by the slump in wheat and closed easy.

The wheat market was weak all day, with the expection of a brief period at the start, when prices rose to a point a trifle above yesterday's closing figures as a result of unexpected strength at Liverpool. The weakness became decidedly pronounced in the final hour and the July delivery was subjected to heavy selling pressure. Much of the selling late in the day was of a stop loss character. Bearish sentiment in the pit was due mainly to a material improvement in the condition of fall sown crop as indicated in numerous reports which were received from Kansas, Nebraska and the Ohio river valley. According to some advices the crop in Kansas is improving as a result of recent rains and harvesting will begin on a general scale next week. Floods in some sections of the southwest, however, were said to have wrought some damage to growing grain. An estimate on the week's shipments of wheat from Argentina, which showed a gain of nearly 1,000,000 bu., compared with the previous week, was a bearish factor early in the day. The range of the July delivery for the day was between $1.10⅝ and $1.13⅜. The market closed weak and only a trifle above the low point, with July $1.10⅝@1.11.

New high record marks for the season were established in the corn market when the July delivery sold at 73⅛c and the September at 70¾c per bu. Sentiment in the pit was bullish the greater part of the day, but the market finally yielded to the weakness of wheat and closed at almost the lowest point, although prices were still a trifle above yesterday's final figures. The December option was an exception and closed at a not loss of ¼c.

Trade in the oats market was quiet and prices fluctuated over a range of about half a cent. The market closed easy, with prices a shade lower to a shade higher than yesterday's final quotations.

Provisions closed 10@15c lower.

The leading futures ranged as follows:

WEATHER IN THE GRAIN BELT

Showers for a Change Friday and Some More of This Temperature.

OMAHA, June 10, 1909.

Rains have continued general since the last report in the northwest, mountain districts, central valleys and east over the lake region and Ohio valley to the Atlantic coast. The rains were light in the northwest and mountains, generally moderate in the Missouri and Mississippi valleys and excessive at points in the Ohio valley. With generally unsettled weather still prevailing over the upper valleys and northwest the outlook is favorable for showers in this vicinity tonight and Friday.

The temperature is slightly cooler in the lower Mississippi and lower Missouri valleys and southwest, and is slightly warmer in other sections, but no important change has occurred in any section within the last twenty-four hours and not much change is indicated for this vicinity tonight or Friday.

Record of temperature and precipitation compared with the corresponding day of the last three years:

	1909.	1908.	1907.	1906.
Minimum temperature	57	50	59	60
Precipitation	T	.00	.11	.00

Normal temperature for today, 70 degrees.

Deficiency in precipitation since March 1, 1.79 inches.

Excess corresponding period in 1908, 2.51 inches.

Deficiency corresponding period in 1907, 5.14 inches.

L. A. WELSH, Local Forecaster.

NEW YORK STOCKS AND BONDS

Rapid Advance in Union and Northern Pacific Feature of Day.

STEEL PRESSURE IS RELIEVED

No Hitch Has Occurred in Plans for Trading in Steel Stock in Paris, and Feeling About Trade is Confident.

NEW YORK, June 10.—The action of the stock market today indicated the resumption of some important operations on the long side. Signs of profit taking sales were still in evidence at a few points and the advance was uneven, leaving some important laggards.

Union Pacific was a leader upward in contrast with the sluggish movement of the Southern Pacific stocks. The latter stock was freed from the positive weakness which it showed yesterday. Northern Pacific was even more prominent than Union Pacific. Its rapid advancement was accounted for by rumors that steps were being taken to introduce the stock to the Paris Bourse in the same way as had been done in the case of United States Steel.

The denial from bankers interested that any hitch had occurred in the plans for trading in United States Steel in Paris, as was rumored with depressing effect yesterday, relieved United States Steel from pressure and it more than recovered its quarterly dividend during the day. The stock was helped also by the report of the reopening of the Ensley (Ala.) steel rail mills.

Feeling regarding the steel trade continues confident and professional. The news overnight of a rise in wages of workers for several of the independent steel companels was taken as confirmatory of improving conditions in the trade.

The introduction to the trading on the Stock exchange of contracts for the new Atchison convertible bonds when issued was made the occasion for a bullish demonstration in Atchison. The reports of crop conditions were regarded favorably. Some apprehension was expressed in stock market circles that the recent course of litigation against American Sugar Refining company and the agitation for prosecution by the government under anti-trust law might revive anxiety on the part of investors in corporations and prejudice the movement to attract foreign capital into them. Rates for call loans ranged from 2 per cent above that figure.

The banks of England and France made strong returns today and the discount rate declined in Paris while the Paris cheque on London advanced. A relaxation in the pressure on New York for gold is thus indicated. On the other side, however, a fall in New York exchange at Chicago to par compared with 35 cents per $1,000 premium a week ago shows an ebbing of the flow of currency to New York and gives the premonition of coming requirements for the movements of the country's crops. Rates for time loans for the longer maturity have advanced a fraction and keener scrutiny of collateral in stock market loans by bankers was reported. The irregularity of the market increased as the day advanced.

Bonds were irregular. Total sales, par value, $6,410,000. United States bonds were unchanged on call.

Number of sales and leading quotations on stocks were as follows:
