GRAIN AND PRODUCE MARKET

Strength in Liverpool and Higher Outside Start Wheat Prices Up.

GOOD ADVANCE ON SUPPORT

Change Comes in General Bearish Sentiment and It Looks Like Market is Due for Upward Turn.

OMAHA, June 21, 1909.

Strength in Liverpool and higher outside markets started wheat prices higher and a good advance resulted from better support. A change has come in the general bearish sentiment and it looks like the market was due for an upward turn.

Corn advanced with wheat, showing much better tone. There was very little corn for sale, and while good progress has been made the growing crop is late.

Wheat was nervous, but grew stronger on shorts, covering and buying was of better class. A change in the pit shows traders are expecting a rally after the steady decline during the past ten days. Values advanced steadily during the day.

Corn was steady, but showed a stronger undertone with the higher wheat market. The market was bare of offerings and shorts were bidding steady for purchases. The general situation is unchanged, but traders are playing for an upturn.

Primary wheat receipts were 485,000 bu. and shipments were 314,000 bu., against receipts last year of 450,000 bu. and shipments of 158,000 bu.

Corn receipts were 533,000 bu. and shipments were 254,000 bu., against receipts last year of 492,000 bu. and shipments of 400,000 bu.

Clearances were none of corn, none of oats and wheat and flour equal to 81,000 bu.

Liverpool closed ¼@⅝d higher on wheat and ¼d higher on corn.

CHICAGO GRAIN AND PROVISIONS

Declining Tendency in Wheat is Effectively Checked.

CHICAGO, June 21.—The declining tendency in wheat was effectively checked and prices scored gains of more than 1c owing to unfavorable weather for harvesting in the southwest and to a "green bug" scare in the oats market. At the close prices showed net advances of 1⅜c to 1⅝c. Corn and oats also made substantial gains, but provisions closed weak.

Possible delays to harvest operations, owing to wet weather, was the chief factor in creating a strong wheat market. The weather bureau announced that scattering showers had occurred during the last forty-eight hours in the middle, western and southern states, and predicted additional rain for a large part of the winter wheat belt in the next twenty-four hours. The bulls quickly took advantage of the unfavorable weather conditions and the harvest hitch to help force prices higher. They were aided in their efforts by a sharp bulge in oats and by an advance of ¼@⅝d at Liverpool. Weekly statistics were also small and bullish.

World's shipments for the week were less than generally expected, the amount on passage decreasing 1,368,000 bu. and the visible supply in the United States decreasing 2,761,000 bu. The principal demand was for September and December deliveries, although July was bought freely by shorts. During the day the latter month sold between $1.13⅝ and $1.14⅜. The market closed strong at almost the top, with July at $1.14¼@1.14⅜.

Wet weather, light local receipts and the bulge in wheat caused a strong market for corn during the entire day, which was in active demand by shorts, displayed the greatest strength and advanced almost 2c from the low point of the day. The market closed strong, with prices up ⅝@⅞c, compared with Saturday's final figures.

The first genuine "green bug" scare of the season brought out liberal purchases of oats and resulted in gains of ⅞c to 1⅛@1⅜c. Reports from southern Illinois claimed that the much dreaded green bug had made its appearance in the oats fields in several sections, and that the fields were turning yellow. The September delivery manifested some weakness early in the day owing to selling by cash interests.

Provisions were weak all day and closed 7½@10c to 12½c lower than the previous close.

The leading futures ranged as follows:

WEATHER IN THE GRAIN BELT

Partly Cloudy, Possibly Showers and Same Temperature.

OMAHA, June 21, 1909.

Rains occurred within the last twenty-four hours throughout the northwest, the central valleys and southern states. They were heavy at points in northern Montana and north in the Canadian provinces and in the middle gulf states. Rain is falling this morning in the Ohio valley and southern states, and continues in the Canadian provinces. Clear weather prevails west of the Missouri river to the mountains and throughout the southwest. Barometric depressions overlie the extreme upper Mississippi and Missouri valleys and the southwest, and while generally fair weather will prevail in this vicinity tonight and Tuesday, showers may possibly occur tonight or Tuesday.

Record of temperature and precipitation compared with the corresponding day of the last three years.

	1909.	1908.	1907.	1906.
Minimum temperature	66	75	67	62
Precipitation	.40	.00	.82	.00

Normal temperature for today, 73 degrees.

Deficiency in precipitation since March 1, 3.20 inches.

Excess corresponding period in 1908, 2.94 inches.

Deficiency corresponding period in 1907, 6.16 inches.

NEW YORK STOCKS AND BONDS

Bears Circulate Rumor That Harriman is Fatally Ill.

DISCREDITED BY UNION PACIFIC

Reports From Paris About United States Steel Action Has Effect of Hurting Values—Story of the Day in Stock Market.

NEW YORK, June 21.—It took several hours of waiting tactics on the part of professional operators amongst the operations in stocks to demonstrate today their satisfaction that the sharp fall in prices last week had not attracted any demand sufficient to form a basis for a renewed upturn in prices.

The smash which followed was more severe than on last Thursday. Selling was almost as constrained during the early part of the day as was buying, with the result of dullness and listlessness such as have not been seen for weeks in the trading. The bears still found effective material for influencing sentiment in the fears of bad effects to follow the failure to secure admission for the United States Steel stocks to the Paris Bourse. The direct opposition between the reports said to be received by private bankers regarding the standing of the plan, and the assertions of the banking interests concerned, did not prevent the reports of the failure of the project from hurting values. Selling of United States Steel also carried the impression of liquidation of some important individual accounts.

The same appearance in the Wabash securities served to throw suspicion on the active advance which has been effected in those stocks on vague intimations of important developments, said to be impending, but which have entirely failed of authenticity. Amalgamated copper also proved acutely weak and the over-speculation abroad in coppers left the reactionary tendency there still in force. The progress of the decline brought out added efforts on the part of the bears, shown by their raiding tactics and by the circulation of unfounded rumors.

One of these rumors was to the effect that E. H. Harriman had suffered a sudden and fatal seizure in Vienna. This rumor was put out late in the session of the stock market, and was not traceable to any authoritative source, but it proved extremely effective, notwithstanding the prompt discredit thrown upon it by Union Pacific officials, who would have immediate advice of any happening to the head of the system owing to the frequency of cable communications from the traveler with his business associates.

The sharp rallies, which followed the successive drops, were evidence of the part played by short selling in the weakness. This rule did not apply, however, to the final break, in which the Harriman stocks played the principal part, the selling movement being still in active progress when the trading ended. A rally of a point in Southern Pacific was the only notable indication of a check to the movement.

Foreign exchange rose strongly to within a few points of the highest point of the season and experts computed a good profit on exports of gold to London at the prevailing level.

Bonds were irregular. Total sales, par value, $4,354,000. United States 4s, the 3s coupon and the 4s registered, declined ¼, and the 4s coupon ½ per cent on call.
