HAS FAKE INJURY

He is Told Rider is Dying and Stakeholder Flees with His Draft to Avoid Certain

Arrest.

J. C. Maybray gang of "big store" swindlers who were induced to come to Council Bluffs with the admitted expectation of picking up some "easy money" were instead fleeced of their own coin is related in detail in the petitions filed Saturday in the district court in suits brought by "Mikes" to recover their cash. Although the story since the arrest of Maybray and several of his associates has become a somewhat familiar one, it is still interestng and is evidence of the truth of the old saving of Parnum's about there would be no race suicide where suckers were con-

substantially the same in each of the five petitions, and that of W. H. Bedford of Bolckow, Mo., who was separated from \$5,000 on a fake horse race will suffice. Bedford, although from the state whose citizens are credited with being required to be shown" before letting loose of their cash, proved, like others before him who had been gathered into the rapactous maw of the swindling syndicate, an easy mark. Bedford, it is set forth in his petition, was brought, on or about August 12, 1908, by the conspirators" to the city of Council Bluffs and was introduced to and interviewed by one George F. Maxwell, who claimed to be the secretary of the club of millionaires in the Ogden hotel in this city. Gives Draft to Maxwell.

The affable and suave Mr. Maxwell, who, by the same token, has so far evaded the vigilance of the authorities and escaped arrest, by various devices and induced ments enticed and induced Bedford to place in his hands, as stakeholder on a certain horse race, the sum of \$6,000, which Bedford had brought with him in the shape of a draft on his home bank as evidence of that Bedford kissed the \$5,000 good bye when he handed it over to Maxwell, but he never saw it again.

The horse race as explained by "Secretary" Maxwell to the gentleman from Missouri was to be between Red Leo, owned by one Charles Barrett, who was owned by one Charles Barrett, who was to be his own jockey, and Abbie L. owned by a man named Tom Rogers, who histors at the 1960 National Horticuitural Congress exposition continues to grow, and now constitute some of the most attractive stake to be \$48,000 on each side. Bedford's latest addition is made by the Story Roger.

Honors for Aviator. M. Bieriot's friends took him quickly in an automobile to the old Lord Warden hotel by the pier. Meantime his wife arrived. She embraced him weeping, but they were soon sitting at breakfast, the center of a great gathering of French people. The mayor and other officials called early and welcomed M. Bleriot in the name of the city and nation as the pioneer of international flight.

The townspeople of Dover, who for three weeks have been on the alert for the signal announcing that one of the flying machines had started, were caught napping. A gale was blowing last night and the forecasts promised a strong wind and squalls in the morning. Hence the operators of the sirens on the steamers, which it had been arranged should be blown when the flyer started, were absent from their posts. Only a few persons received the wireless warning of Bieriot's ascent M. La Pontaine, a friend of the aviator, night. He declined a bedroom with the For Missouri and Iowa-Showers and cryptic remark that he had an appointment to meet M. Bleriot at 5 o'clock. The hotel people thought the mysterious stranger was joking. Close upon their heels were several police

and their services were needed to restrain the curio hunters, who immediately began to pull the machine to pieces for souvenirs Many others, foreseeing that the monoplane would be treasured as a historic relic, wrote their autographs thereon. The city officials conceived a happy thought and with Bieriot's consent raised a tent about the machine and charged 6 pence admission to view it. The profits from this enterprise will go to the hospitals and the police pension fund and the exhibition did a big business.

Aeroplane is Small.

Parts of the framework of the monoplane were splintered on landing. Every one expressed surprise at its small size. It is no more than twenty feet across the wings and its weight is about 400 pounds, the motor being twenty-five-horse power. In the same machine Bieriot recently made a cross-country trip of twenty-five miles from Etampes to Orleans. It is the smallest of three he took to Calais.

The machine is fitted with an air-tight sausage-shaped rubber bag so that it would float if it descended to the sea. Bleriot said, however, he had complete control of the machine and had no fear he would fail. The only difficulty he experienced

## How Good Ginger Ale Improves Health

Good ginger ale, such as sparkling Hydrox, contains pure carbonic acid gas.

This gas is often put into milk at many physicians' directions to make the milk digestible.

It separates the food globules so the digestive juices can instantly get to each particle. It also stimulates bowel action naturally just as natural exercise does. It's this gas that gives Hydrox its wonderful "sparkle." We make the gas in our own factory from bi-carbonate of soda.

No One Ever Neea Have Indigestion

No one need ever have indigestion he will drink sparkling Hydrox Ginger Ale.

Ginger, as well as carbonic acid gas, is an aid to digestion. It gives the stomach just enough warmth so that Hydrox can be taken ice cold without any shock to the nerves of the stomach.

It is good to know of a cooling drink that one can take in hot weather with benefit. For most ice-cold drinks are harmful.

Note the Food Value

That is another point to consider. Sparkling Hydrox Ginger Ale imparts strength for hot weather. It contains the best table sugar.

Sugar is 97% nutriment. It produces more energy than wheat. The nourishment one gets from sugar goes directly into the blood.

We could get the same sweetening from one ounce of saccharine as we now get from twenty-five pounds of sugar. Some makers use it because of its cheapness. But saccharine has no food value at all. Rich m rruit Juices

Then Sparkling Hydrox contains a rich blend of fruit juices which we extract in our own factory from the fruits themselves. We could buy con-centrated extracts made from green or over-ripe fruits. But the drink would then lack its mild and healthful effect on the bowels. There is no other good drink you can buy that is one half so good for you.

Children should drink Hydrox Ginger Ale-three or four times every day. The Very Finest Materials

We import our ginger root from We use double distilled aerated

water which is an excellent solvent. Each bottle is twice inspected before and after filling. We carry purity to the extreme. Then we age the ginger ale six

months to insure a perfect blend and smooth flavor. You are missing the best and most healthful of all soft drinks if you haven't tried Hydrox Ginger Ale. Get your fifst bottle today-see how good it is. Then order a case for the home. Serve it with every meal in place of injurious iced tea.

Sold only in quart and pint bottles
