GRAIN AND PRODUCE MARKET

Wheat a Little Firmer on Heavy Export Sales.

CORN FOLLOWING WHEAT LEAD

Wheat Unsettled, with Wide Range in Selling, but Firmer at Close —Corn is Steady, but Dull.

OMAHA, July 28, 1909.

Wheat was weak at the opening with cables lower, causing further liquidation. Crops from the northwest were not so favorable and exporters reported heavy sales to Mediterrean points, this checked the decline and created a firmer feeling. If receipts slacken, this foreign demand would advance our market.

Corn was a little erratic with the change in wheat, but held fairly steady with no change in the situation. Demand was moderately improved.

Wheat was extremely erratic and ruled in a wide range, selling lower early on weak cables, but firmed up on less favorable crop reports from the northwest. Values at the close were well over yesterday with shorts covering.

Corn was steady but dull and did not follow the advance in wheat. Cash values were weak owing to the slack demand and moderate receipts. The movement of corn is free and is holding prices down.

Primary wheat receipts were 1,685,000 bu and shipments were 676,000 bu., against receipts last year of 1,115,000 bu. and shipments of 720,000 bu.

Corn receipts were 557,000 bu. and shipments were 458,000 bu., against receipts last year of 254,000 bu. and shipments of 443,000 bu.

Clearances were 1,000 bu. of corn, 1,000 bu of oats and wheat and flour equal to 52,000 bu.

Liverpool closed ¼@1¼d lower on wheat and ½d lower on corn.

CHICAGO GRAIN AND PROVISIONS

Tide Turns in Wheat Market, and There is Sharp Advance.

CHICAGO, July 28.—The tide turned in the wheat market today, following the steady decline of the last week or more, and prices advanced sharply, final quotations showing net gains of 1¾c to 2¾c. Corn also closed strong, but oats, with the exception of the July delivery, were weak. Provisions broke severely, and at the close prices were 32½c to $1.30 lower than the previous close.

The bulge in wheat occurred during the final half of the day, and at the top prices were 2¾c to 3⅜c above the low mark of the session.

One of the principal features of the day's trading was persistent buying by a leading elevator intetest, whose total purchases were reported to be 2,000,000 bushels (by September option). The market opened weak at declines of ⅛@⅛c to ⅜c, July being at $1.00¼ and September at $1.02⅜ to $1.03¼. Vigorous support by leading cash interests soon caused a steadier feeling, and as the session advanced, sentiment became decidedly bullish.

Additional black rust reports from the northwest, unsettled weather in the winter wheat belt and the discovery that not more than 150 boat loads of wheat had been taken for export today, including about thirty boat loads "worked" late yesterday, stampeded shorts during the final hour. The top for July was reached at $1.09, and for September at $1.05¾. The market closed strong.

Corn prices rallied sharply during the final half of the session. July was congested and the price ranged between 68c and 71c. The close was strong at net gains of ⅛@1¼c to 1⅝c.

Oats were weak, with an exception of a flurry in the July option, which caused a bulge of more than 2c in that delivery. At the close prices were ¼c lower to 1½c higher.

Provisions were weak throughout the entire day. At the close prices were 32½c to $1.30 lower than yesterday's final figures. The decline of $1.30 was on October pork, but the price was only a nominal one, a bid of $18.50 being made, but not accepted.

The leading futures ranged as follows:

PEAS—Canadian, steady; 5s 10d.

WEATHER IN THE GRAIN BELT

Unsettled Followed by Fair is Promised for This Locality.

OMAHA, July 28, 1909.

The barometric depression central over the extreme upper Missouri valley Tuesday morning has moved slowly eastward during the last twenty-four hours and now extends in a trough shape from Manitoba south over the Missouri valley to Texas. Showers occurred within the last twenty-four hours in the northwest, throughout the central valleys and southern states and rains continue in the northwest, the upper Mississippi valley and upper lake region this morning. The showers of the last twenty-four hours were fairly well distributed over Nebraska, but were generally light. The weather is slightly warmer over the country east of the Rocky mountains, but is slightly cooler in the mountains and throughout the northwest, and it will probably be slightly cooler in this vicinity by Thursday. The weather will probably continue somewhat unsettled tonight, followed by fair Thursday.

Record of temperature and precipitation compared with the corresponding day of the last three years:

	1909.	1908.	1907.	1906.
Minimum temperature	72	72	65	67
Precipitation	.00	.00	.00	.00

Normal temperature for today, 77 degrees.

Deficiency in precipitation since March 1, 0.28 of an inch.

Excess corresponding period in 1908, 1.76 inches.

Deficiency corresponding period in 1907, 4.35 inches.

L. A. WELSH, Local Forecaster.

NEW YORK STOCKS AND BONDS

Steel Dividend and Rise in Union Pacific Are Features.

INCREASE IN STEEL EARNINGS

Comparison with Corresponding Months in Previous Years, However, is Not Altogether Satisfactory.

NEW YORK, July 28.—Incidents considered by speculators of most importance were the increase in the dividend of United States Steel and the rise in Union Pacific today to above the long-predicted price of 200. In the case of the dividend on Steel the compromise rate of ¾ of 1 per cent for the quarter was considered an adroit settlement of a perpleing problem, as between the contention for the restoration of the 4 per cent annual rate and the retention of the 2 per cent rate. The 4 per cent rate would have been feared in conservative quarters as precipitate and as leaving nothing more in the immediate future for the speculative imagination.

Safeguards against harm to the price of the stock from disappointed expectations of a 4 per cent rate had been skillfully placed by the inspired intimations of the last week that there might be no increase at all. The consequence was that, while today's dividend increase failed to bring in any strong new demand sufficient to lift the price of the stock, it was singularly free from the usual pressure of realizing sales of following a confirmation of favorable predictions. Professional operators have felt that the price of United States Steel was likely to react, even with an increase in the dividend to 4 per cent. Buying to cover the shorts put out on this theory constituted an element in the strength, not only of United States Steel, but of other favorite speculative stocks.

Satisfaction with the quarterly report of earnings of the United States Steel corporation was not unmixed, and the exhibit was held to justify a dividend policy on the part of the directors at least as cautious as that adopted.

The $29,341,000 of earnings for the quarter, while rising handsomely over those for the preceding quarter, and still more markedly over the corresponding quarter of last year, are seen to be, with the exceptions of last year, the year of depression in 1904 and 1901, when the corporation was formed, the smallest earnings reported for the corresponding quarter in one year.

In the matter of the 4,579,800 tons of unfilled orders on hand, also, it is seen that, while the figures are above that for any interening quarter since that ending December 31, 1907, yet there is found an unbroken series of excesses over this figure for every quarter before that since the one ending September 30, 1904.

That date carries the comparison back to the period of depression from which the industry had not yet emerged after the depression of 1903. This more detailed analysis of the report, both as an exhibit of the present state of restoration of the steel industry and in its promise for immediate further progress, was of somewhat sobering effect on speculative sentiment. The absence of an official statement of the course of events since the date of the report was commented upon, in view of the use made of early intimations that such a statement would accompany the report. Points of strength in the stock market helped to sustain prices, for which particular causes were assigned. The rise in New York Central was occasioned by renewed rumors of Harriman investment in that stock.

The soft coalers were helped by hopes of a revival of demand by awakening industrial activity. An important short interest was believed to be covering in Reading. Amalgamated Copper suffered from the renewed fall in the price of the metal. The upturn in the wheat market drew attention to the possible consequence of a crop scare, with the critical period still to be faced. Final prices, as a rule, were little changed from last night, and showed mingled gains and losses.

Bonds were irregular. Total sales, par value, $3,512,000. United States bonds were unchanged on call.

Number of sales and leading quotations on stocks were as follows:

	Sales.	High.	Low.	Close.
