Council Bluffs

EXPENSE OF INDIAN CREEK

City Auditor Compiles Facts and Figures About Its Ravages.

EIGHT THOUSAND EACH YEAR

He Opposes Any Further Waste of Funds on Temporary Expedients to Control Stream.

City Auditor McAnney has taken a firm stand against the expenditure of any more of the city's money on Indian creek except such as may be needed to remove present obstructions. The utility of wasting the taxpayers' money on temporary improvements, he contends, has been exemplified time and time again and in support of this contention he gives the following facts and figures:

"All money spent on temporary improvements on Indian creek is merely temporary and the sooner the city meets the existing condition of affairs by an attempt to construct a permanent source of drainage for the water which Indian creek is required in times of heavy rains to carry off, on practical modern lines, the cheaper it will be for Council Bluffs."

"Council Bluffs has been temporizing with Indian creek ever since the city has been incorporated, and the money expended thereon each year in attempting to keep it within bounds, and during freshets make the water run up hill, represents a sum sufficient to build either a tunnel or a lifting pump station to give relief permanently."

To illustrate, there has been expended directly from the city treasury in the five years ending July 1, 1909, on account of Indian creek, the sum of \$10,001.25. The amount paid out on account of bridges washed out (not worn out) represents an enormous sum covering the same period, and the extra expense to the streets and alleys department and the sewer department on account of the eccentricities of the creek, will run into thousands of dollars.

This is only the drain on the public purse, think of what a hardship the ravages of this worthless stream has worked upon the private property holders during the long period of its uselessness, and the menace to public health as well.

"Our sewerage system eliminating the drainage and flood proposition altogether, is already inadequate to the wants of our growing city. Justice to the patriotic citizens who have stayed with it, and in spite of discouraging conditions similar to the aftermath of the July 5 flood with which we are now wrestling, have, by word and action, expressed confidence in the future of Council Bluffs as a city, and their belief that a plan of permanent relief would be adopted, demands that immediate action should be taken."

"The frequent overflow of Indian creek is an evil that we have always had to contend with and in spite of the enormous sums of money expended in the last twenty-five years in attempts to temporarily restrain it, the ravages of the creek are getting worse all the time."

"Citizens of Council Bluffs and Pottawattamie county should get together and decide upon some permanent plan of relief. There are numerous systems of permanent, practical drainage and sewerage now in use applicable to our needs, present, future, and at a cost that will work no hardship on anyone, rich or poor. It is a belief that statutory authority now exists for the taking up and completing of this necessary measure."

"The financial means will not be hard to find any moment that definite action is taken in this direction. Certain it is that permanent relief of this nature will add to the value of Council Bluffs property as well as the farm lands affected by this creek from \$5 to 100 per cent."

Mr. McAnney intends to present this matter to the city council at its meeting next Monday night, with the recommendation that it take steps to devise some plan without further delay to solve the Indian creek problem.
