MORE THAN TWO TIMES AS MUCH LIGHT FOR THE SAME MONEY. TUNGSTEN LAMPS MAKE ELECTRIC LIGHT MUCH CHEAPER

They have two and one-half times the efficiency of the ordinary carbon lamp hitherto in general use. The filament is made of a rare metal called tungsten, which yields an intense brilliancy at low cost. In shape and size the bulb is just like any other electric incandescent lamp. Why not try a Tungsten lamp yourself? Get one of the 40-watt and use it somewhere in your house in place of one of your carbon lamps. Then observe the great difference. Note the clear white light, exactly twice as brilliant and costing you one-fifth less for electricity. Tungsten lamps are destined to displace all others, for both store and house lighting.
