Correct Dress for Men and Boys Fall and Winter Clothes For Men, Young Men and Boys Are Ready

For weeks the new Fall wearables have been coming to us daily, and we want you to see

What We've Prepared for Fall. Come just for the purpose of getting posted on what's new for autumn wear. This is the store of better things—not only merchandise, but better values every season—and better service—a service that won't make you feel under obligation, nor a service of repeated exchange of salesmen—if you are particular or wish to look elsewhere.

Dressing the Boy For School Our Fall Hat Display Is Really Beyond Description

One of the worst things you can do to a boy is to buy him poorly made, badly fitting clothes. You can cut him off from personal pride, and he becomes careless of his clothes because he is ashamed of them. Our clothes are the kind that any boy would be proud to wear—they are the kind you can "rough house" it in one minute and look right every minute.

BABY WITH ITS HANDS TIED

To Keep It from Scratching Itself—Had Eczema that Doctors Couldn't Cure. SUFFERED ALL ITS LIFE.

At Last Parents Took the Little Sufferer to United Doctors and Now It's Well.

Little Majorie Olsen, the three-year-old daughter of Mr. and Mrs. W. E. Olsen, who live on a farm near Argenta, Ill., has at last been relieved from the terrible suffering which the poor little mite has endured all her life.

This little girl had been afflicted with eczema almost from birth. Her parents took her to many different doctors, but none of them understood the disease and allowed her to grow worse and worse.

At last Mr. Olsen heard of the marvelous cures being made by the United Doctors, who have their Omaha Institute on the second floor of the Neville Block, corner Sixteenth and Harney streets, and decided to take the little Majorie to them.

When the United Doctors commenced treating the little girl she was in a frightful condition, but these specialists did not depend upon ointments and washes as other doctors had. Instead they went to the root of the trouble—they treated the blood, as it is only by cleansing the poison out of the blood that any case of eczema can ever be really cured.

Mr. and Mrs. Olsen are overjoyed at the recovery of their daughter and make the following statement for publication: Argenta, Ill., July 1, 1909.

Dear Doctors:—Our little daughter, Majorie, has had eczema since she was one month old, being three years old last January. As soon as her face began to break out we took her to the doctor and have doctored her ever since, but none of them seemed to be able to stop the breaking out. They would help a little for a while and then it would get worse than ever.

When she was small we had to fasten her hands to keep her from scratching her face, and she suffered very severely. It was all over her face, body and hands. About five months ago we came to the United Doctors for examination and, although we had about given up hope of her ever being cured, after they told us they could cure her we began the treatment. They have helped her wonderfully. In five months it has all left her body and hands and her face is nearly all healed and we feel that she will soon be entirely cured. Yours very truly, MR. AND MRS. W. E. OLSEN.

There are hundreds of other Nebraska people who have had the same joyful experience. The wonderful new and more scientific treatment used by the United Doctors in curing those who had been given up as hopeless cases by all ordinary doctors is why their institute, on the second floor of the Neville Block, corner Sixteenth and Harney streets, is always crowded with patients.—Advertisement.
