ket its first show of strength during the mid-session, but a fresh reaction in Union Pacific proved its influence on the gen-eral list still maintained. London Closing Stocks. LONDON, Sept. 13.—American securities opened flat and generally below parity. Weakness developed in the Harriman shares later at noon and the market was dull, with prices from 24 points lower to 12 higher than Saturday's New York clos-Pacific proved its influence on the general list still maintained.

The complexion of the weekly bank statement published after the market closed on Saturday came in for much discussion and prepared sentiment for a future hardening of money rates. Bankers do not anticipate tight money markets this fall, in spite of the narrow reserve of banks at present. A rise in Chicago exchange to 20 cents discount per \$1.000 was a development of the day, but the tide of the currency movement is strongly towards the London closing stocks: ment of the day, but the tide of the currency movement is strongly towards the interior. There is an increasing supply of commercial paper and prime grades for the regular maturities were marked up to 4½65 per cent. The fall in Union Pacific allowing for the dividend of today carried it off 7½c from the high point of the raily touched on Saturday. The closing of the books today for the coming annual meeting ends any demand for representameeting ends any demand for representa-tion at that meeting.

Bonds were weak. Total sales par value \$1,566,000. United States bonds were un-changed on call.

What has been said regarding beef steers would apply in large part to the trade in cows and heifers. The better grades commanded steady prices, while others were a little slow, the tendency being to pick out the best of the offerings, leaving others until the last.

Good feeders were wanted and they sold funly as well as last week. Horned feeders and all rough and undesirable grades were pretty dull.

40% and Safety

Get a statement of the resources of the Big Horn Power Company, and take notice of the unusual opportunity of getting a certificate of Stock at cash price in its water power plant, paying 40%.

THINK

4,000 to 5,000 electrical horse power will do as much work as 10,000 live horses working day and night forever and ever; never eat, never sleep, fed by water only, with but three men to take care of the plant.

SMALL INVESTORS

It is the only oportunity ever offered to get in on the bottom price on water power, generating electricity. Big men and water power monopolies have secured all other water power plants.

MACHINERY INSTALLED

Two units, generating 1,500 to 2,000 horse power, are

now installed and sold for \$100 per horse power, a year, which means at lowest estimate, \$12,500 per month income. REASON FOR SELLING 1,000 SHARES AT PAR

We need this money to install machinery for three more units in the power house, to make the full capacity. These shares represent one-seventh interest in the Company.

MARKET FOR POWER

12,000 horse power have been applied for, within 14 miles of the dam, to be used in mines and in Thermopolis and Shoshoni. The power installed is sold right at the dam. 150,000 acres of choice lands sloping towards the river are available for irrigation, of which 100,000 acres could be irrigated by this Company, but it would take the full capacity of the dam for four months to furnish water for this immense tract of land, and the Company has decided to only take up 30,000 acres, to which the ditch has been surveyed. These lands are near Shoshoni and adjacent to the river and reservoir.

Your Money Will Double in Thirty Months

\$100.00 invested brings \$40.00 each year. \$1,000.00 invested brings \$400.00 each year.
