VICTIM DOOMED TO DEATH ESCAPES AT LAST MINUTE

Surrendered by His Old Friend, He
Cheats the Executioner in
Nick of Time.

Against a combination of circumstances
calculated to hurl a human being into the
darkest depths of despair, a little mongrel
dog worked out his own salvation in the
police station with sagacity and complete-
ness.

"Tige" is the dog and he is owned by a
Mr. Shaffer, 1038 South Seventeenth street.
Tige also is alleged to be a vicious dog.
Neighbors complained about him to the
police with the result that Tige and his
master were summoned to appear before
Judge Crawford.

This they did, that is, his master ap-
peared in court and testified that he had
tied the dog out in the police station and
that he then and there surrendered him to
be killed. To this several large and
capable policemen also testified, having
seen Tige tied to a wheel of the hurry-up
wagon.

This was all right with the judge and
the master was allowed to depart in
peace, leaving his faithful friend to the
mercy of the stalwart guardians of the
law, who proceeded artillery in limber to
carry out the edict of the court in spirit
and letter.

They had reckoned without Tige, how-
ever, and when they arrived upon the
scene, Tige had departed hence. Hanging
limply to the wheel was a short rope and
to it was attached a heavy collar. But
the collar was empty, and down Eleventh
street there vanished a small, scurrying
cloud of dust.

"Well, I'll be—" said Officer Bostwick.
Whatever Officer Bostwick will be, it is
a safe bet that Tige will not, just at pres-
ent at least.

"Advertising Nebraska" is the title of

The Ad club has received a letter from
Guy M. Ellis, manager of the Rochester,

ANATOMIK FOOTWEAR

(DR. COLE'S PATENT.)

"The present age knows no in-
vention or development means so
much to humanity in general as
does Dr. Cole's wonderful Anatom-
mik Shoe."

"Thousands upon thousands of
people—young, middle aged and
old—are suffering from some
one or more of the symptoms
produced by some stage of the
malady known as "flatfoot," or
broken down arch, as it is fre-
quently called.

The early stages of "flatfoot"
are usually the most painful. At
this time very little, if any, re-
formity or change in the foot's
outline can be observed; conse-
quently the pains are attributed
to other causes—frequently to
rheumatism. The rheumatic-like
pains may be in the feet, calves
of legs, knees, hips, back, and
sometimes there is a dull pain in
the back of the neck. Other
symptoms are swollen painful toes,
bunions, cramps in the feet, toes
drawn up or down, weakness and
a general "used up" feeling
at the end of the day.

Come to our store and let us
demonstrate to you a simple les-
son in foot anatomy and you will
quickly see why Anatomik Shoes
are considered by thousands of
people to be one of the greatest
blessings ever given to humanity.
