### TWO CUSTER COUNTY MEN ACCUSED OF ROBBERY

Sheriff Kennedy, After Exciting Chase, Lands Them in Jail at Broken Bow.

BROKEN BOW, Neb., Sept. 28.—(Special Telegram.)—Elmer Johnson and Harry Luck, charged with having robbed Galveston at Anley Sunday night, after making way with two fine horses belonging to Dr. Hanna, were arrested here last night by Sheriff Kennedy after a short, but exciting chase. Johnson was taken near the stock yards while Luck was hauled from the feed rack of a stock car. When searched, Luck had twenty-eight different varieties of knives concealed about him. The stolen saddles were sold here to liverymen and merchants.

### The Weather.

WASHINGTON, Sept. 28.—Forecast of the weather for Wednesday and Thursday: For Nebraska—Fair Wednesday; Thursday increasing cloudiness. For Iowa and Missouri—Fair Wednesday and Thursday; no decided change in temperature. For South Dakota—Fair Wednesday; Thursday increasing cloudiness with cooler in west portion.

Deficiency for cor. period, 1907..... 4.59 inches

### Nebraska ATTACK ON NATURALIZATION PAPERS SAID TO BE FAULTY

United States Attorney Files Action Against Sixteen Nebraskans.

Lincoln, Y. M. C. A. Raises Eighty-Seven Thousand Dollars of the Hundred Thousand Desired and After Remainder.

(From a Staff Correspondent.)

LINCOLN, Sept. 28.—(Special.)—Because of various irregularities in obtaining naturalization papers, sixteen Nebraskan residents of different nationalities will probably have to go through the process of being made citizens a second time. Papers have been completed in the office of United States Attorney A. W. Lane for filing in the federal court attacking the validity of their certificates. Most of those whose citizenship is thus called into question live at Omaha and South Omaha, but others are scattered over the state. The list includes Germans, Bohemians, Scandinavians, Italians, an Irishman or two and others of miscellaneous nationality.

The suits to have the decrees of naturalization set aside will be commenced in the districts where the persons respectively live. Only two of the number will be filed in the Lincoln division. In some cases it will be alleged that the individual was naturalized illegally before he had been in this country five years. Another ground will be that some of them were more than 18 years old on arriving in this country and did not make a formal declaration of their intention to become citizens, which is required of all except those coming here as minors. In one or two instances the claim will be made that the certificate is defective because witnesses for the person naturalized were not themselves citizens.

Dependent Woman Hangs Self.

Craze by a lingering sickness, Mrs. Klaus Peterson, of Colfax, a patient at the Nebraska Sanitarium, committed suicide by hanging herself to an apple tree some time last night. The woman was 51 years old and had been ailing for some time, so that it was necessary for her to be almost constantly attended.

Mrs. Peterson has had the attention of a trained nurse for some weeks and was also cared for by her daughter, Anna and Edith. Last night the woman got up, during the absence of her attendants, and at 9 o'clock she was discovered to be missing. A search was made of the premises and an alarm was sent forth to all of the buildings connected with the sanitarium, to the watch for Mrs. Peterson, who was thought to be in the vicinity of the grounds. She was stopping at one of the annex buildings of the institution.

After a search which extended throughout the entire night the woman was found dangling from an apple tree this morning. Coroner Mathews was notified of the death and after an investigation he pronounced the cause of the woman's death a suicide and did not order an inquest to be held. Dr. O. A. Rockwell, the attending physician, stated that the woman has been ill for a long time and he said that the hanging was the result of a weakened brain, caused by sickness. Mrs. Peterson formerly lived at Elm Creek.

Y. M. C. A. Wants \$100,000.

With a rush and a whoop the Young Men's Christian association building fund moved up over the \$75,000 mark today, and with a day and a half left the committee decided to postpone the proposed race for the \$100,000 prize until tomorrow.

Young women pledged to the Alpha Omicron Pi sorority at the University of Nebraska were: Misses Nina Froyer, Edith Hall, Helen Flinn, Edna M. Harker, Mollie Waters of Sanford, Neb., Miss Harpner and Mabel Harper of Wallace, Neb.

### STREET RAILWAY FOR HASTINGS

Dayton Men in City Looking Over the Field.

HASTINGS, Sept. 28.—(Special.)—Officers of an electric railway system have been here for several days inspecting the field with a view to establishing a street car line in this city. They are Albert Emanuel, P. G. Beane and W. R. Sullivan, all of Dayton. They built and now operate electric systems in Tulsa and Okla., and Parsons and Lawrence, Kan. They are favorably impressed with the situation here and if they decide to build the line will ask no financial aid in Hastings.

### Callaway Fair Ends.

CALLAWAY, Neb., Sept. 28.—(Special.)—The third annual fair of the Callaway Fair association came to a close Friday night, after four days of showing. The stock exhibit was as fine as is found at any county fair in the state, while the grain, vegetable, fruit and farm product exhibits exceeded that of the county fair of Custer county. The racing program was fairly good, although not many horses were present. Good crowds were in attendance each day and no accidents nor fights occurred to mar the pleasure of anyone. The Callaway Fair association was organized three years ago by the business men of Callaway and the farmers of the community and is self supporting, receiving no appropriation from anyone.

Death from Blood Poison

was prevented by G. W. Floyd, Plunk Mo., who healed his dangerous wound with Bucklen's Arnica Salve. See Sold by Beaton Drug Co.

Buggy on Engine Pilot.

GIBBON, Neb., Sept. 28.—(Special.)—A top buggy was taken off the pilot of No. 5 this morning at Gibbon. The engineer and fireman, who by the business presence until the train stopped. A message was received from Shelton saying that a dead horse had been found near

These women are only a few of living witnesses of the power of Lydia E. Pinkham's Vegetable Compound to cure female diseases. Not one of these women ever received compensation in any form for the use of their names in this advertisement—but are willing that we should refer to them because of the good they may do other suffering women to prove that Lydia E. Pinkham's Vegetable Compound is a reliable and honest medicine, and that the statements made in our advertisements regarding its merit are the truth and nothing but the truth.

### NEBRASKAN BUYS VERMONT LAND

Jesse Gregg of Merrick County Hunts Up Baragans in East.

CENTRAL CITY, Neb., Sept. 28.—(Special.)—Heretofore when farms in Merrick county became too expensive and too scarce for farmers desiring more land to invest here they have been in the habit of moving further west, but it has remained for Jesse Gregg of Merrick township to invade the east and with the proceeds of his labor in Merrick county fields to purchase himself a home here. Mr. Gregg has just returned from an extensive tour of the east, and brings the news that he has bought himself a fine farm on the banks of the historic Lake Champlain in Vermont. He says that he secured a good tract of thoroughly subdued farming land there and that the price was \$300 for seventy acres, which is cheaper than the poorest land in Merrick county has been selling for this year, while the higher priced land here is selling at double and treble that price. When it can be secured at all. Mr. Gregg will move his family to Vermont some time during the month of February next.

### Hollenbeck Clears Up Docket.

CENTRAL CITY, Neb., Sept. 28.—(Special.)—At last the contention between the state pure food inspector and the Central City merchants has been settled and the docket dismissing them at the terms of the district court just ended. Over a year ago the state pure food inspector dropped into Central City and started on a tour of investigation for infractions of the state pure food law. At certain places it was being found that food was being sold in cans without the weight being stamped thereon, and it was charged that this was an infraction of the law requiring all canned goods to be stamped with the correct weight. Criminal proceedings were commenced against A. Fouts, M. G. Scudder, George Agnew, Charles Huxford and W. W. Morse, and with the assistance of the packing companies putting out the food, these grocers hired counsel and made a defense. The case was taken to the supreme court, but before a decision was rendered the legislature changed the law, so that food put up in the manner that upon which complaint was made here was not included in the list of canned articles to be stamped with the correct weight. Accordingly Judge Hollenbeck has wiped the cases from the docket.

### Stranger's Actions Cause Alarm.

FREMONT, Neb., Sept. 28.—(Special.)—Considerable excitement was caused at North Bend yesterday afternoon by the peculiar actions of a strange man, who had enticed a number of young girls from 8 to 12 years of age into a secluded place in the outskirts of town. A number of people noticed him assembling the children and notified their parents and the city marshal. The man was arrested and brought to Fremont last evening. He is about 50 years old and gave his name as Henry Story. He had been in North Bend two days and says he came from David City. He is being held awaiting a further investigation.

### Boy Accidentally Shot.

HUNTLEY, Neb., Sept. 28.—(Special.)—Eddie Webster, aged 18, of Alma, accidentally shot himself while hunting about one mile

southwest of here yesterday. He states the gun would not work and he tried to cock it with his heel when it went off, shooting him through the fleshy part of his hand and entering his breast near his heart. Drs. Massey of Huntley and Baker of Alma were summoned. They report his chances for recovery very favorable at present. His mother, Mrs. Frank Howard, is very low with typhoid fever in Alma.

### TAFT DISCUSSES IRRIGATION WORK

(Continued from First Page.)

entry, and greatly regret that it was not begun years before.

"Congress has come fully to recognize the necessity of pursuing forestry reform by making liberal appropriations for the purpose. The forest lands of the United States ought to be surveyed and carefully preserved, and its jurisdiction in respect to them clearly defined.

"The regulation of forests in private ownership within state boundaries is not plainly within the range of federal jurisdiction and it should be undertaken by the states. I don't think the states have taken up the matter with as much energy as they ought and have not improved the opportunity which was given them by way of example by the forestry bureau of the United States.

### Irrigation Projects Need Funds.

"The plan of the government to reclaim the arid and semi-arid lands, manifested in the reclamation act, has been carried out most rapidly by the bureau charged with its execution. I had the honor the other day, in Colorado, of opening the most ambitious of these projects—at least the most difficult of them—the Gunnison which is to bring water into a valley in Colorado, known as the Uncompaghe valley. I believe that the project is well advanced in condition to grow fruit and cereals.

"There are some thirty projects which have been entered upon by the reclamation bureau, and I believe that all of them are to be commended for their excellent adaptation for the purposes for which they were created, and for the speed with which the work has been done. However, that in the planning of a number of these improvements, the enthusiasm of the projectors has carried them to a point where they begin to feel embarrassed in the matter of resources with which to complete the projects, and begin to show that the strict limitations of the reclamation act, which are so well known to those engaged in executing them, that the projects were too many and more than could be completed in a reasonable time after their beginning, because of a lack of funds.

### Ten Millions More.

"The reclamation act provides for the expenditures of funds made up by the sale of public lands and reimbursed from time to time by the installment to be paid by the settlers who take up the irrigated land and also provides that no part of a project is to be contracted for and begun until the money for the completion of that part of the project contracted for shall be in the reclamation fund.

"Now, it appears that it will take \$10,000,000 or more, which is not available in the reclamation fund at present, fully to complete the projects, and it also appears that a great number of persons, by reason of the beginning of the projects, have been led into making settlements, the expenditure of time and labor, with the hope that such enterprise would be carried through in a reasonable time.

"I think there is no doubt that it will be the intention of congress, and that progress should not be multiplied in such a way that they could not be completed within a reasonable time with the reclamation funds provided by the sale of public lands and it probably would have been wiser to adhere strictly to the limitation thus contained, even though the language of the act, by dividing up the projects into parts on terms, seemed to permit the beginning of more projects than there was likely to be money enough to complete within a reasonable time.

"The pressure was doubtless great and the reclamation service yielded to the pressure within the letter of the law and now find themselves in the situation described. The work has been well done and reflects credit upon the engineers who have charge of it.

### Question Up to Congress.

"But whether it be to proceed to relieve the present situation which is one of disappointed hopes to many settlers upon the arid lands, who counted upon an early completion of the projects undertaken and invested their money and spent their time and seem to be no nearer the goal of satisfactory irrigation than they were when

the projects were begun. I think it wise to apply to congress for relief by urging the passage of an enabling act which shall permit the secretary of the interior to issue bonds in the sum of \$10,000,000 or more to complete all projects under the last administration large tracts of lands amounting to upward of 4,000,000 acres were temporarily withdrawn from settlement in order to prevent the acquisition of water power sites under the general land laws. This amount has been reduced under the present administration to \$6,000,000. It should be understood that these withdrawals are temporary and can be justified only as having been made in order to permit congress to legislate on the subject of water power sites.

### Legislation Suggested.

"I shall therefore urge upon congress at its next session the passage of a law authorizing the disposition of such water-power sites, upon terms to be agreed upon by the secretary of the interior with the proposed purchaser. My impression is that the demand for water-power is going to be so great that these restrictions will not prevent the investment of capital, but will ultimately bring to the public coffers a revenue from an entirely proper source and will secure the development of power for manufacturing industries that will probably in time exceed the utility and value of coal and be a substitute for it.

### Oil, Coal and Phosphate.

"It now comes to what should be the proper disposition of coal lands, oil lands and phosphate lands.

"It seems wise in the disposition of coal lands and, indeed, of all mineral lands having agricultural value, to separate the surface of the lands from its mineral contents, and then either to lease the right to take coal from the land at a specified compensation per ton—that is, to provide a system of royalties—or to sell the deposits of the land outright to the coal miner. In every case restriction by way of forfeiture ought to be included to prevent monopoly of ownership. This is the greatest objection to a change in the method of their disposition of the public for their transfer to private control.

### As to Power Sites.

"As to water power sites, there has been such a change in conditions that a special provision should be made in the interest of the public for their transfer to private control.

"We have reached a time when the importance of these water power sites has been greatly increased and there would seem to be no reason why it would interfere with a speedy development of the country to impose restrictions upon the use of such

water power sites equitable as between the public and the investor.

"There is now no power vested in the secretary of the interior to impose the conditions suggested. The matter has become so important that under the last administration large tracts of lands amounting to upward of 4,000,000 acres were temporarily withdrawn from settlement in order to prevent the acquisition of water power sites under the general land laws. This amount has been reduced under the present administration to \$6,000,000. It should be understood that these withdrawals are temporary and can be justified only as having been made in order to permit congress to legislate on the subject of water power sites.

### Many Unfair Inferences.

"There has been a good deal of discussion in the newspapers as to the attitude of the present administration toward the general policy of the conservation of resources, and some very unfair and altogether unfounded inferences have been drawn. The truth is my administration is pledged to follow out the policies of Mr. Roosevelt in this regard and while that pledge does not involve me in any obligation to carry them out unless I can get congress to give me full authority to do so, it does require that I take every step and exert every legitimate influence upon congress to get legislation which shall best serve the purposes indicated.

"I hope nothing will prevent our taking the further steps needed when congress meets.

"Secretary Hallinger of the Interior department, upon whom will fall the duty of executing the new provisions of the law, is in entire accord with me as to the necessity for promoting in every legitimate way the conservation of the resources which I have noted and he can be counted upon to use the great influence which he must have as secretary of the interior to this proper end.

"Indeed, it will be found that in his reports as commissioner of the general land office he brought these matters to the attention of congress and urged the adoption of a federal policy along the lines I have indicated."

### Chamberlain's Colic, Cholera and Diarrhoea Remedy is today the best known medicine in use for the relief and cure of bowel complaints. It cures griping, diarrhoea, dysentery, and shooting the bowels. It is equally valuable for children and adults. It always cures. Sold by all druggists.

### Jerome to Run Again.

NEW YORK, Sept. 28.—District Attorney William Travers Jerome today filed the necessary petition with the bureau of elections endorsing his candidacy for re-election.

## A Bracing Tonic After Typhoid

Mr. Francis Sheppard, of Scranton, Pa., says that he was left so weak after an attack of typhoid fever that he could scarcely walk. He took Duffy's Pure Malt Whiskey; one bottle put him on his feet. The second bottle gave him his old time vigor and strength. He recommends it to all who are weak and need something to build them up.

"Having read a great deal about Duffy's Pure Malt Whiskey, I decided to try it, and cannot praise it too much. During the typhoid epidemic in our city two years ago I happened to be one of the victims (one of the lucky victims, thank God.) It left me in such a weak condition that I was scarcely able to walk. Thanks to Duffy's Pure Malt Whiskey, after taking one bottle of it I was able to go to my work. After the second bottle I can say I am entirely well. I think there is nothing equal to it, and would recommend it to anyone who is run down with fever or any other disease. Although I do not drink liquor in any form, I do recommend Duffy's Pure Malt Whiskey as per directions." Francis Sheppard, Scranton, Pa.

## Duffy's Pure Malt Whiskey

As a tonic and stimulant when convalescing after fever is the greatest strength-giver known to science. It destroys disease germs, and by its building and healing properties restores tissues in a gradual, healthy, natural manner. It is a wonderful specific in the treatment and cure of consumption, pneumonia, grippe, bronchitis, coughs, colds, malaria, low fevers, stomach troubles and all wasting, weakened diseased conditions.

If in need of active advice, write Medical Department, The Duffy Malt Whiskey Company, Rochester, New York, stating your case fully. Our doctors will send you advice free, together with a handsome illustrated medical booklet containing some of the many gratifying letters received from men and women in all walks of life, both old and young, who have been cured and benefited by the use of this great medicine. It is sold everywhere by druggists, grocers and dealers, or shipped direct for \$1.00 per bottle.
