## BUSINESS CHANCES

# YOU WANT TO OBTAIN BIG DIVIDENDS?

We are opening up a great Gold Mine in one of the richest Gold Bearing Districts in the Rocky Mountains, about forty miles from Denver, Colorado.

## BIG BODIES OF ORE IN SIGHT

There are places in this mine where the vein is fully ten feet wide and the large bodies of ore already exposed in the tunnel and shafts, insure a big shipping produc-tion almost from the start, and the output is likely to run into millions of dellars. We have not got to spend a dollar hunting for ore: it's already found, immense bodies of it, ready to he mined. We have chunks of ore from the mine at our office, that weigh nearly 300 pounds, that will run up into the hundreds of dollars per ton, some of the pieces show free gold all through the ore.

# Ore Assaying from \$5 to \$25,000 per ton

has been found in the workings and along the surface.

For a distance of several hundred feet, along the mountain side, below the main workings, immensely rich ore has been found, that has evidently been broken off and washed down from the mother vein above. The surface of the ground at this point washed down from the mother vein above. The surface of the ground at this point is honeycombed with shallow shafts and open cuts made years ago by miners in their search for rich ores found in this ground. Some of the ores taken out of this slide have yielded from \$100 to over \$25,000 per ton, mostly gold, although slabs and chunks of rich sliver ore, evidently from a cross vein and running as high as 14,000 ounces of sliver per ton, have been found in the same slide rock, all indicating that there are probably two more very rich gold and sliver-bearing veins in close proximity on this property that have never been opened up as yet.

## **NEARLY \$500,000**

has been taken out of the mine immediately adjoining on the west, which belongs has been taken out of the mine immediately adjoining on the west, which belongs to the same English company that owns the famous Stratton's Independence Mine at Ciriple Creek and the big Camp Bird Mine at Ouray, Colorado. The miners who have worked in this mine all claim that the rich ore shoot pitches directly east into our property. The mine has been carefully examined by several mining experts, and as a result of their investigations, it is believed the property can be made one of the biggest producing mines in Colorado.

We have been quietly securing possession of the adjacent properties and now own nearly thirty acres of rich gold-bearing ground surrounding the mine and expect to begin active development and commence shipping ore to the mills and smelter inside of sixty days.

# We Offer for Sale
