Shorts were still active in covering their sales again today and advanced values still higher. This proved to be the only feature in the early trading in the wheat plt.

The government report was issued at 1 p. m. and gave out figures that were considered about a standoff for both the bears and bulls.

Wheat was firm early owing to the strong cash demand which has been ususually active for some days. After the government report was issued an easier feeling existed and a short decline resulted in some corn and values advanced sharply after holding steady all morning. Coffee Market.

NEW YORK, Oct. 8.—COFFEE—The market had an indifferent opening, with prices unchanged to 5 points lower, owing to a lack of trade interest. Later prices gained 16 to 15 points, owing to buying for a new long account, supposed to be by Wall street interests in Sympathy with valoralzing. Another builtsh point was the belief that a good rise was due owing to the prolonged inactivity in a speculative way. It is said that country jobbers show more buying interest and street prices for spot coffee were materially advanced. Toward the close there was no buying support, with considerable coffee offered in liquidation and prices broke until they were even with about the opening figures, or not unchanged to 5 points lower. Sales were 30.250 bags, including October at 3.754 5.764. November, 5.86c; May, 5.666.00c; July, 6.6566.00c; September, 6.1026.00c. Santow, No. 4 83c. Mild coffee was fairly active and firm, with Cordova quoted at 834612c. Coffee Market.
