CHICAGO, Oct & --Wheat prices were in-clined to sag today owing to foreign weak-ness and to favorable weather for the fail sown crop. Final quotations showed net losses of a shade to %c. Corn and oats were also heavy, but provisions were firm.
Wheat trading was quiet with news gen-raily bearish. Foreign markets failed to respond to the upturn here yesterday, the weakness abroad being ascribed to a re-vised estimate on the total world's ship-ments for the week as given out by a lead-ing European crop statistician, which placed the amount at 13,740,000 bushels.
December sold between \$1.01% \$1.02%. The market closed easy with December at \$1.01% \$1.02%.
The late bulge in corn yesterday, prompted a considerable selling today, the bulk being of a profit-taking nature. The wask to closed weak with prices %c tobs @Pyc lower.

NEW YORK, Oct. & Closing quotations,
Threamers are follows:
Threamers and for some and the period of the period of the period of the some and the period of t

with 1906, reflecting local conditions. The very large increase at New York City in to a greater extent than usual a reflection of conditions in general business at that center, as stock operations do not provide so large a proportion of payments as in some former years. In New England all cities show gains over last year, the increase being very large at Boston. while at several other points, notably Providence, Hartford, Worcester and Springfield there are also good gains. In the Middle States Philadelphia now shows a gain over both last year and 1906, and at Pittsburg there is a small gain compared with the latter year. Conditions in the iron trade are now practically normal and the effect of this will probably soon be seen in bank clearings. Almost all other cities in this section report larger clearings than in either year. Baitimore, Richmond, Norfolk, Atlanta, Augusta and Jacksonville in the South Atlantic States make increased returns, and the gains over 1936 denote marked activity in that section. At many cities in the Middle South, notably St. Louis, Memphis, Chattanooga, Nashville, Knozville, Houston and Little Rock, prosperous conditions are reflected in largely increased bank payments over all preceding years. In the Middle West payments through the backs continue of record breaking proportions, and none of the cities report losses as compared with this period in any preceding year. At Chicago, Milwaukee, Indianapolis, Cleveland, Detroit, Columbus and Dayton the gains are very large. In the Far West Kansas City, St. Paul, Des Moines, Omaha, St. Joseph and Denverstill show heavy gains over all preceding years, and at almost all other points in that section increases are noted. Almost all cities on the Pacific Coast provide good gains over former years, but at San Francisco and Oskiand there are losses in the comparison with 1906, on account of the large payments incident to settlements following the fire in that year. Comparison is made below of bank exchanges by socions covering three years; also the average daily figures for the year to date:

In the far West almost every city makes larger returns than in previous years, Minneapolis, where there is a loss compared with last year, due to special local conditions, being the only conspicuous exception. Very large increases are reported by St. Paul, Kansas City, Omaha. St. Joseph, Des Moines and Donver. The figures in detail follow:
