

NEW HOSPITAL IS OPENED

Presbyterian Institution Moved to Old Bishop Worthington Home.

SIMPLE RITES ATTEND CHANGE

Ministers of Various Denominations Take Part in Program and the Nurses Are Given Diplomas.

The formal opening of the new Presbyterian hospital at 1240 South Tenth street was observed last night with ceremonies which included the graduation of a class of ten trained nurses.

The program included the invocation by Rev. R. B. Wheeler; an address on "The Modern Hospital," by Rev. T. J. Mackay; historical sketch of the hospital by G. W. Hurvey; dedicatory prayer by Rev. Stephen Phelps; presentation of diplomas to the graduating nurses by Dr. Le Roy Crumner; presentation of the handsome and Miss Sarah Huston, superintendent, and the benediction by Rev. P. A. McGovern.

The graduates were: Jennie M. Weed, Marie M. Martens, Augusta M. Koehler, Marie Hermann, Jennie C. Kane, Thelma Peterson, Elizabeth Ducker, Edith R. Perry, Mabel C. Mills and Alma C. Wiess. Following the program light refreshments were served and the large company of visitors were shown through the hospital, the affair closing with an informal reception.

The new Presbyterian hospital is what was formerly the Bishop Worthington residence, one of the handsomest and most commodious residences of lower Tenth street, a district noted for its many beautiful homes.

It was purchased a little over a year ago by R. McClellan for hospital purposes and has been undergoing transformation for that purpose since coming into his hands. The new hospital is but the evolution of the old Presbyterian hospital, for many years located on Marcy near Tenth street, which will shortly be absorbed into the new hospital.

Rooms are well furnished. The new hospital has forty-four rooms, twenty-eight of which are private rooms. All of the rooms are elaborately furnished with beds, bedsteads, mahogany furniture and other conveniences.

The building is a three-story brick structure and is equipped with an Otis automatic electric elevator, while the hospital furnishings embrace the latest improvements in sanitary hospital equipment.

The grounds are spacious and occupy a slight elevation, the whole being readily accessible by street car and close to the railway depot.

It is intended, as the needs may require, to enlarge the hospital, there being ample room for this purpose without infringing upon the beauty or symmetry of the grounds.

In referring to the equipment of the hospital authorities recognized the fact that the sick are as solicitous for comfort of surroundings as those enjoying full health. The reception rooms are spacious and are furnished in accord with the general elegance of the hospital.

The superintendent of the new hospital is Miss Sarah Huston, with Miss Jessie B.

Graham as head nurse and superintendent of the training school.

The new hospital starts out with about twenty nurses in training.

GOOD FELLOWS FOUND IN EVERY DIRECTION

Citizen with a Package Gets Swung Around Very Much Against His Will.

The man was a little better than three sheets in the wind and he was beating up toward the corner of Sixteenth and Harney under considerable difficulty. His method of navigation was a lifeline resemblance of a man walking through high snow, with great care to maintain a correct balance. In going to leeward of a bustling fat woman with an armful of bundles he got started on the new tack safely, but on the wrong foot, and it would have taken a guy twice as strong as he to get him back into line. He kept tacking and going about on his left heel till he was traveling in the direction from which he had come; and he knew it. But effort to get his bowsprit again headed on the right course was useless because he was now facing down hill.

Pausing momentarily, he appeared to debate the use of fighting, and finally beat out to windward till he reached the curb, then let himself go as he would, with the remark: "Wat's dif'rence, anyway? There's good fellows down this way, too."

TRAGEDY OF CARRYING BEER IN MILK BOTTLE ALL TOO PLAIN

Sad Lesson is Vividly Impressed on Man Who Sues Street Car Company.

Walter Emmons will never again carry beer home in a milk bottle. He had enough trouble, he says, last August, when he was conveying a little beer this way and riding on a street car.

Suddenly the cork popped out, attracting the attention of the motorman and conductor. They at once, Emmons swears, set upon him, beat him up and threw him out on the street. All this resulted in his great pain, anger and humiliation.

Wherefore Emmons now brings suit for \$5,000 against the street car company. He is careful to aver that the beer was "for medicinal purposes" and that the milk bottle was broken when he hit the pavement.

RECORD FOR NORTHWESTERN

During the Last Week Road Hauled More Cattle and Sheep from West Than Ever Before.

The Northwestern made a record in the moving of live stock from the range country last week. During the week more cattle and sheep were moved from the territory west of Long Pine to Omaha than during any previous week in the history of the company. The stock is in fine condition and the prices are right; making big inducements for shipping at this time.

In addition to the heavy live stock movement, grain loading in Nebraska is taking a swift and old corn and new wheat are being hustled to market. These movements eastward, with heavy machinery and merchandise movements west, are giving the railroads of Nebraska a busy time.

She Was Cleanly Surprised.

Miss H. E. Bell, Wynona, Wis., writes: "Before I commenced to take Foley's Kidney Pills I had severe pains in my back, could not sleep, and was greatly troubled with headache. The first few doses of Foley's Kidney Pills gave me relief, and two bottles cured me. The quick results surprised me, and I can honestly recommend them." Sold by all druggists.

HIGHWAYMAN ASKS THE TIME

When Accommodating Section Man Pulls Watch Out He Finds Gun in Face.

Gus Hamburg, section foreman for the Union Pacific, was on his way home from work Wednesday night when a man accosted him in the yards near Fifteenth and Webster streets.

"What time is it, friend?" Hamburg drew out his watch. He found himself looking into a revolver in the hands of the stranger. The man seized his watch and relieved him of \$4 in currency.

A Ten-cent cold could by nothing better for female weakness, lame back and kidney trouble than Electric Bitters. Sold by Beaton Drug Co.

UNCLE SAM AT CORN SHOW

Government's Seattle Exhibit Will Be One of Big Features.

MODEL FARMING TO BE SHOWN

Vivid Scenes of Modern Crop Raising and Land Reclamation in States and Provinces Will Be Displayed.

Moving models showing the evolution of the modern self-blender, actually at work in a miniature field of grain, which grows as rapidly as the machine cuts it will be only one of a half dozen interesting features of the exhibit the government will bring to the Omaha Corn Exposition from the Seattle exhibition.

About November 1 the exhibit which has been the marvel of crowds at the Seattle show will be brought to Omaha and set up in the Auditorium. The full experimental station demonstration will be carried on here as it was at Seattle.

The government, by its exhibit, is trying to show to the public just what is crops of the Department of Agriculture is and what it is trying to do to help make farms pay a larger profit. The value of such a showing, together with a demonstration of the results actually accomplished, will be apparent to everyone. The exhibit of harvesters of the various types from the first down to represent perfect machines, is only one example of the completeness of the demonstration.

Model Irrigation Farm.

Another exhibit of interest and importance is a model irrigated farm which has been constructed by an expert model maker under the direction of an irrigation engineer. The crops represented in the farm model are orchard fruits, alfalfa and sugar beets. The scientific character of this exhibit is shown by the detail with which the various methods of applying water to land for irrigation purposes are shown. The model also points out the best locations for head gates, dams and water-measuring devices. The exhibit also includes cases in which various devices of use in irrigation are in operation.

The experiment stations exhibit is not confined by any means to the United States, but includes interesting exhibits of the products of Alaska in the far north and Hawaii in the tropics. Two large pavilions contain the showing of Alaska, consisting of grasses and samples of grain, both threshed and in the straw. Large photographs are used to show the nature of the country, and some of the important epochs in its development.

Not less interesting is the exhibit of Hawaii, occupying one and a half cases. The showing is of all kinds of tropical crops with which the experiment stations are working.

Of practical importance to every man who tills the soil will be the entomological exhibit, the object of which is to disseminate information among farmers as to the insect life that infests the fields. Some of these insects are of great benefit to the growing crop and others are very harmful to it. To be able to distinguish between the good and the bad is desirable. The exhibit is so contrived that it will aid the farmer to make a scientific study of bugs and other flying creatures.

Patent Office Exhibit.

The patent office exhibit will have models of some of the important recent inventions, including colored photography; parallax stereograms; mechanical telegraphy and lighting exhibits. It will also include mechanical musical instruments. The human body reduced to its elements and these elements bottled up in glass tubes and jars is the unique method the expert stations are taking of demonstrating the nutritive value of foods. A series of jars in one of the pavilions shows the exact amount of the various elements in the human body and other elements of the various elements contained in some very common foods. These are placed side by side for purposes of comparison. Charts are used to show the composition and fuel value of various foods. The effect of cooking on meats and vegetables is also clearly demonstrated in an interesting manner. Large

The exhibit will be brought to Omaha from Seattle, November 1, and it will require several days to install it, but the officials in charge promise it will be ready by the time the exposition opens.

Mr. F. G. Fritz, chemist, N. Y., writes: "My little girl was greatly benefited by taking Foley's Orino Laxative, and I think it is the best remedy for constipation and liver troubles." Foley's Orino Laxative is mild, pleasant and effective, and cures habitual constipation. Sold by all druggists.

Officers Ride Ninety Miles in Physical Test

Make Thirty-Mile Rides Daily in Six to Seven and One-Half Hours—Lead Mounts Up Hills.

The staff officers and others of the Department of the Missouri completed the test horseback ride of ninety miles Thursday afternoon at 3 o'clock, and none of them are any the worse for wear for their strenuous experience of the last three days, except for their weather-tanned faces.

The officers taking the ride were: Brigadier General Charles Morton, U. S. A.; Lieutenant Colonel William A. Glassford, signal corps; John M. Banister, medical corps; Frank F. Eastman, commissary; Majors Daniel E. McCarthy, quartermaster; James H. Erwin, inspector general; Chase W. Kennedy, assistant general; Omar Bundy, inspector general; William F. Blauvelt, paymaster; William P. Burnham, general staff corps; Daniel B. Devore, Eleventh infantry; William F. Flynn, Fifteenth cavalry.

The ride began at 7 a. m. Tuesday, the staff being from Camp and Twenty-fourth streets, following up the Florence road to Fort Calhoun, a distance of fifteen miles, and return once each day. The macadamized road was followed to the county line and thence to Calhoun.

The first day was rather cool even for a week riding and the road was rough from frostbite, having heavy ruts in Calhoun. The ride was made in alternating stunts of a walk and trot and was made in six hours the first day. The officers dismounted and led their mounts up the steep hills.

The trip was made in seven and one-half hours the following day, all being completed, with time to spare, within the required limits.

All of the officers were subjected to a physical examination Monday before a board of medical officers consisting of Major Joseph T. Clarke, Captain Orville H. Ramsey, Captain Contract Surgeon W. H. Ramsey to test their physical condition to endure the ride.

A similar examination was made at the close of the ride by the same board Thursday afternoon.

The mounts for the ride were furnished by the Fifteenth cavalry, a detachment of which, consisting of the following: Sgt. Calhoun with mounts, should the return ride require new mounts.

PENNANT HOVERS OVER TWO NINES

(Continued from First Page.)

An average of more than 21,000 a game and a record for the "world's championship" series. The total receipts are \$18,625.50.

Today's game was played with the thermometer hovering about 40 degrees above zero and with a chilling southwest wind sweeping across the field. The sun, however, warmed the atmosphere and it was really the best baseball day Detroit has had for this season, although it was a long way from being good baseball weather.

Hans Wagner played a marvelous game in the field, but inside only one hit in four times at bat. "Big Red," however, he was everywhere and did his best to stop the Detroit team from scoring. He covered third, retiring Detroit players twice by crowding Byrne out of the way and taking the play himself. In the fourth inning he roused over to third, took Mullin's assist on Moriarty's hit, and threw out Delehanty. In the sixth session he covered third and took Camnitz's assist, retiring Schmidt.

Mullin, Schmidt, Crawford and Bush were the bright stars for Detroit. Mullin's wonderful pitching after he had been unwell, Schmidt's home run, Mullin's assist on Moriarty's hit, and Delehanty's hit were a revelation to the spectators. Four hits were made off his delivery in rapid succession at the opening of the game, but between the first and ninth innings he allowed only two safe hits. The ninth opened with three safe hits, success by Pittsburgh, but again Mullin arose to the occasion and stopped his hard-hitting opponents before they could reap any advantage from his short lapses. All told, Pittsburgh made nine hits off Mullin, and seven of them were bunched in the first and ninth innings.

Sensational Double Play.

One of the most sensational moments of the game was a double made by Schmidt and Bush in the sixth inning. With Muller on first Abstein lifted a high foul which Schmidt caught with his back to the field. Muller started for second after the catch, but a wonderfully fast whip by Schmidt and a great one-handed catch by Pittsburgh, but again Mullin arose to the occasion and stopped his hard-hitting opponents before they could reap any advantage from his short lapses. All told, Pittsburgh made nine hits off Mullin, and seven of them were bunched in the first and ninth innings.

Tigers Tie the Score.

Detroit tied the score in the fourth inning. Crawford drew a base on balls as a starter and went to third on Delehanty's single to right center. Moriarty singled to right and Crawford scored, but Delehanty was caught trying to reach third. Muller to Wagner, T. Jones singled past Byrne and Clarke let the grounder get away from him, Moriarty scoring the tying run and T. Jones going to second. Schmidt walked, but Moriarty ended the inning by making a spectacular catch of T. Jones' high-twisting fly that he got near the pitcher's slab.

Still another run was added to the Detroit total in the sixth. Schmidt opened with a two-bagger to right, but was caught at first by Mullin. Moriarty grounded to Camnitz, Wagner covering the base. D. Jones forced Mullin, Abstein to Wagner. D. Jones stole second and Bush drew another base on balls. "Ty" Cobb hit

one with a crack that could be heard far outside the grounds and it went far into the crowd for a certain home run had it not been for the ground rules, which cut it to a two-bagger. D. Jones scored and Bush went to third on the hit, but the inning ended when Crawford filed to Leach.

There was no more scoring until the ninth. The score:

Score table for Detroit vs Pittsburgh. Detroit: D. Jones, 1; Bush, 2; Cobb, 1; Crawford, 1; Delehanty, 2; Moriarty, 2; T. Jones, 1; Mullin, 1; Schmidt, 1. Pittsburgh: Byrne, 1; Leach, 1; Miller, 1; Wagner, 1; Abstein, 1; Wilson, 1; Gibson, 1; Willis, 1; Camnitz, 1; Hyatt, 1; Philippe, 1; Abbatistiole, 1.

PRATT SAYS FIGHT IS STILL ON

Carmen's Leader Returns from Toronto, Announcing that Men Will Not Give In.

C. Q. Pratt, international vice president of the street car men's organization, has returned to Omaha from his Toronto trip, declaring the strike here is still in good running order and not over by any means.

"Absolutely not," he answered when asked if there was any prospect of the rest of the men giving in. "The Cleveland men were out eleven months and at the end of that time the company took them all back with the exception of those who had been guilty of destruction of property. We still have a good army of men out and the fight will go on. The company is still short of men and it will be short a year from now unless a settlement is reached."

"I presented the case of the strikers to the delegates at Toronto and the convention voted unanimously to instruct the executive committee to extend all possible aid to the Omaha men. We will receive the regular strike benefits of \$5 a week, and I presented the case to the delegates, with the expectation they would take the matter up with their local unions and ask them to vote money to help in the fight. From the encouraging talk I think we will undoubtedly receive more aid."

The first installment of strike benefit money was received in Omaha by wire Wednesday and was distributed among the men.

Don't waste your money buying plasters when you can get a bottle of Chamberlain's Liniment for 25 cents. A piece of flannel dampened with this liniment is superior to any plaster for lame back, pains in the side and chest, and much cheaper. Sold by all druggists.

SEND VIZZARD'S BODY HOME

No Information Gained by Family as to Why Horseman Was Found Dead Minus His Valuables.

The body of William Vizzard, a wealthy horseman of St. Edwards, who died of tuberculosis, while standing on the viaduct near Union station Monday night, was taken to his home Thursday for burial. The members of the family who came to Omaha to identify the body have gone to St. Edwards.

The family has been unable to gain any information which will tend to explain the fact that Mr. Vizzard was without his money and valuables when he met his death.

A Burning Shame. It is not to have Buckler's Arnica Salve to cure burns, scalds, piles, cuts, wounds and ulcers. Sold by Beaton Drug Co.

Gaynor Resigns Judgeship.

For boys in knee trousers. Made for girls also. Only 50 or 75 cents. Worth double it. Dealers replace all defective pairs. Sold by Leading Clothing and Department Houses. If not, write Kazoo Suspender Co., Sole Makers, Kalamazoo, Mich.'

Not Mould-Work BUT Hand-Work

The next time you buy a cigar, squeeze it between your fingers. If it's hard, it's a "mould-made" cigar—rolled by a novice and forced into a "mould."

A "mould-made" cigar burns hard—burns up one side—never draws freely—except by a miracle.

Then feel a Contract Cigar. It's made by hand—by experts. Just tight enough to draw well—to burn evenly and smoothly.

Just right to let you enjoy to the utmost the fine Havana leaf we use.
