THOUSANDS OF DOLLARS UTTERLY WASTED

Iowa Farmer Tells of Paying
Much Money to Doctors
Without Benefit.

SON SICK FROM CHILDHOOD

Short Course of Treatment by the
United Doctors Has Now Re-
stored His Health.

When a man spends money with doctors he either throws his money away or else he gets many times the value of his money. If he pays money to doctors who do not cure, his money is utterly wasted, but if the doctor's treatment cures him, he cannot pay too much for the service. No amount of money can be compared to health.

One reason for the great popularity of the United Doctors, those master medical specialists who have their Omaha Institute at 206 Neville block, corner 16th and Harney streets, is the fact that they do not accept any case for treatment unless it is such a one as they can cure. Anyone who is going to these doctors; if they cannot cure you they will not take your money.

A fair sample of the hundreds of letters received by these specialists from cured patients, is the following:

"Silver City, Iowa, Sept. 25, 1909.
Dear Doctors:

I am a farmer living two miles north of Silver City, Ia. My son Ed, who is now twenty-one years of age, had never been well since he was four years old. I had had him under treatment by the best doctors of our home town and those I could hear of in the surrounding towns, but he never seemed to get any permanent relief from any treatment and gradually grew worse. Four years ago he had begun to decline more rapidly and grew so bad that we had to give him morphine to relieve the pain and many times were compelled to sit up the entire night applying hot towels and other means to relieve the awful cramps in his stomach. I had spent thousands of dollars for treatment for the boy, all of which did no good. We had lost all faith in doctors and medicine and had given up hope of ever having our boy even partially restored to health when we decided as a last resort to try the United Doctors.

We went to them three months ago, and while they told us they could cure him, we did not believe it, but concluded to make the trial. He went under their treatment on June 13th. Before beginning your treatment he would have those terrible cramping attacks almost every night and the pain seemed unbearable. Now this is the 26th day of September and he has had only one or two light attacks and they were in the first month's treatment. Now he eats everything, digests it well and has absolutely no trouble. He is gaining flesh, his color is good and I am sure he will be entirely restored to health through your treatment.

I make this statement simply in the hope that it may lead some sufferer to your office where they may be cured after as many disappointments as we have had.

F. Bailey.

HERE IS A GOVERNMENT LILY

New Type Developed by the Agricultural Department.

OUTPUT OF THE PLANT BUREAU

It is a Cross of the Philippine and the Bermuda Lily and is Believed to Be Useful for Forcing for Easter.

WASHINGTON, Oct. 21.—The plant experts of the Department of Agriculture turning their attention to things of beauty as well as usefulness, and several new flowers have been evolved by them. Next season in all probability some novel varieties of lilies which were originated in the department's greenhouses in Washington will be placed upon the market by growers, as well as a new summer blooming Dahlia.

"The growing of lilies in the United States," said Prof. B. T. Galloway, in charge of the bureau of plant industry, "is rapidly becoming an important industry. Large quantities of bulbs have in years past been imported from Bermuda, Japan and other countries, and the demand for the flowering plants seems to be on the increase.

"Various lines of work have been undertaken and carried out by our expert, Mr. Oliver, chiefly for the purpose of securing new types of lilies by hybridizing and crossing and to demonstrate the practicability of growing lilies in this country directly from seed."

One of the most promising of the hybrids has resulted from crossing the Philippine lily and the Bermuda lily. The Philippine lily takes two months to come into bloom from the period of planting the bulb, while the Bermuda and its various relations require in the neighborhood of five months. It was thought that there would be a great saving if the time taken to force a good Easter lily could be reduced from one to two months.

Cross is a Success.
With a view to bringing this about the hybridization of the Philippine and the Bermuda lily has been effected. The result of the cross is a flower larger than the familiar Easter lily, but not quite as broad as and a little shorter than the Philippine lily.

Up to this time Americans have had to rely for a very sparse supply of Philippine lilies upon the Philippine islands, and they arrive early in the spring, when they cannot be used for forcing. But by growing them in California they can be obtained in the fall in good time for forcing into flower during the winter. The plants so far grown in California, says Mr. Oliver, do not show signs of the lily disease.

A second line of work in connection with the production of lilies has been under way in the department for the last four years. This embraces the selection of plants which show freedom from disease as manifested by spotted leaves and distorted flowers. Three varieties have been selected, all of which are well known in this country.

When these plants come into bloom the flowers are cross-fertilized with certain purposes in view. The seeds from these plants are sent to California and elsewhere about the end of the summer. They are planted out in the soil in the following spring and in a year the growth made by the seedlings is so great that hundreds of plants have been recently produced bearing in the neighborhood of thirty flowers to a stem.

Results Are Encouraging.
Disease among the plants has not been as prevalent as in Bermuda and Japan, which have hitherto been the sources of supply of bulbs used in this country. So far as the work has gone the results have been very encouraging, especially in southern California, so that the department plant specialists express themselves as reasonably certain that the entire supply of bulbs will in time be produced within the borders of the United States.

"There is," said Prof. Galloway, "a large tract of country with soil suitable for lily growing in the southern part of California from Santa Barbara down and extending inland for several miles. The bulbs can be harvested by the beginning of August.

"Some of those produced during the last season from 2-year-old plants are very large and satisfactory. Among some bulbs recently received by us was one which measured nearly fifteen inches in circumference and others closely approximated this great size.

"It would seem that the method of reproduction by seed, saving desirable types from the seedlings and propagating those only by division and not from scales, is the true solution of the problem confronting the Easter lily industry in the United States."

In connection with the work on the improvement of Florida's flowers a new summer blooming Dahlia has been developed by Mr. Oliver and it is believed, will fill a long felt want in supplying flowers of brilliant colors several weeks before the ordinary types of Dahlias are available. The seed-bearing parent of the new race is a species discovered three years ago in Mexico at an elevation of 7,000 feet by Federico Chisholm. The plants were forwarded to the bureau of plant industry and have been crossed with the ordinary species and as the result of these crosses more than twenty new forms have been developed.

ELECTRIC PROJECT IN SIGHT

Five Million-Dollar Interurban to Be Laid Between Eastern City and St. Louis.

JEFFERSON CITY, Mo., Oct. 22.—Charles A. Loomis of Kansas City was here today with the incorporation papers of the proposed electric line from St. Louis to Kansas City. Because of a technical error the documents could not be filed. St. Louis, Kansas City and Denver men are interested in the proposed line, which is to be 266 miles long and have an authorized capital of \$5,000,000.

New Departure in Thrift.

A Chicago man who owned a house which brought him in a tidy sum in rental every month, failed to receive his usual check on October 1. He went out to see what was the cause of the delay and found that someone had not paid him. He had heard a good deal about the boldness and enterprise of Chicago thieves, but had never heard of a man who would steal a rent check. The discovery that only a revelation. Hereafter a red hot stove has been regarded as the limit in theft.—Louisville Courier-Journal.

NEW VIEW OF APPENDICITIS

Boston Physician Says Operation for the Malady Should Be Proscribed.

Appendicitis has popularized itself as a disease to which universal man is liable. Science has grappled to eradicate either the disease or the appendix.

In the outset the disease attacked principally the wealthier classes, but in its later progress it has extended to all classes and conditions of life, and appendicitis human beings now daily walk the streets of every city and hamlet in the land.

Hence, startling is the information which comes from Boston, the center of learning, that one of the best known physicians of that city has declared operations for appendicitis in the form of surgical crabs which the law should declare criminal.

Hear him: "An operation for appendicitis should be called a criminal operation and as such should be prohibited by law. I have been following the records of appendicitis operations ever since the crabs for this form of surgery started, and I confidently believe that the day is coming when the people will realize that the cutting is a criminal operation. After the widely proclaimed benefits and saving of life by operations to cut out the appendix, it seems hardly necessary to cite the long lists of deaths following the operation."

"What are we coming to?" as Mrs. Partridge would say. If the Boston physician's contention be correct, what must our tens of thousands of appendicitis fellows-citizens think of the useless sacrifices they have made to science? Should they not be awarded heroes' medals to console them for the loss of that which henceforth, if Dr. Page's contention be established, those who remain whole and in their right mind will refuse to part with at any price. The statement of the Boston physician, that we may be sure, is not going to be accepted by the medical fraternity without a great controversy, and until that is settled the lady would better lie low—and avoid irritating the appendix.—Boston Post.

Children like Chamberlain's Cough Remedy. It is pleasant to take.

Pointed Paragraphs.

A widow and her fortune are soon married. It is impossible for greedy people to be grateful. A guest may be as glad to go as the host is to have him. Women who tell everything they hear manage to hear a lot. Nine men out of ten overestimate their importance in the world. The man who can tell you just how a thing ought to be done is seldom busy. When a man insists that he knows what he is talking about, make him prove it. A man is excusable for boasting that he never had occasion to visit a dentist. No man ever makes two mistakes in marriage—unless he marries more than once. It's a wise bird that can flirt through a lawyer's office without losing a few feathers. Some writer has said that as a rule preachers are not witty. Perhaps this may be due to the fact that brevity is the soul of wit.—Chicago News.

New Books

MY LADY OF THE SOUTH, By Randall Parrish, 361 pp., \$1.50. A. C. McClurg & Co.

A VOLUNTEER WITH PIKE, By Robert Ames Bennett, 426 pp., \$1.50. A. C. McClurg & Co.

A tale of the days of Thomas Jefferson. The hero and heroine are led from Washington to the wild frontier with final imprisonment aboard a man-of-war.

BELLA DONNA, By Robert Hinchins, 227 pp., \$1.50. B. Lippincott Company.

The contest between materialism and idealism furnishes the theme for this story. The scene opens in London, but quickly changes to the Nile and the Egyptian pyramids, temples, and desert.

THE ISLE OF DEAD SHIPS, By Crittenden Marriott, 235 pp., \$1. J. B. Lippincott Company.

Three ship-wrecked passengers—a charming girl, an escaped prisoner and a detective—are driven deep into that floating island known as the Sargasso sea during a terrific storm, and their adventures go to make up an interesting tale.

THE VICIOUS DEATH OF A YOUNG HEIRESS AND THE UNRAVELING OF THE MYSTERY MAKE UP THIS SHORING DETECTIVE STORY.

BRONSON OF THE RABBLE, By Albert Hancock, 231 pp., \$1.50. J. B. Lippincott Company.

A romance of old Philadelphia between the years of 1812 and the time of Andrew Jackson's inauguration, 1828. The political strife of that time is portrayed.

MASTREMAN AND SON, By W. J. Dawson, 235 pp., \$1.50. Fleming H. Revell Company.

The motive of the story is the relation of a father and son, and the scene goes from London to New York and British Columbia.

THE SECRET OF OLD THUNDERHEAD, By Louis Godfrey Irwin, 290 pp., \$1.50. Henry Holt & Co.

A story of farm life and of hidden treasure. The scene is laid in Vermont.

AT THE BACK OF THE NORTH WIND, By George MacDonald, 32 pp., J. B. Lippincott Company.

A new edition of this delightful fairy tale. Illustrated in color.

OVERHEARD IN FAIRYLAND, By Madge A. Bingham, 227 pp., \$1.50. Little, Brown & Co.

Fanciful and charming explanations of the origin and characteristics of the flowers, trees and other elements of woodland life supposedly told by Old Mother Nature.

REDNEY McGREW, By Arthur E. McFarlane, 280 pp., \$1.50. Little, Brown & Co.

A story of circus life, full of action and spirit and rich in humor and buoyant optimism.

WONDERFUL LITTLE LIVES, By Julia Augusta Schwartz, 251 pp., \$1.50. Little, Brown & Co.

Word-pictures of the life and doings of such humble creatures as the grasshopper, the house-fly, the earth-worm, the spider, the ant, the busy bee, the roldin, etc.

THE COMING OF MESTER, By Jean K. Baird, 226 pp., \$1.50. Lothrop, Lee & Shepard company.

First volume of "Hester Series." A wife comes to the house of a lonely woman and brightens her life. The principal part of the story takes place when Hester has reached high school age.

THE FOOT BALL BOYS OF LAKEPORT, By Edward Stratemeyer, 251 pp., \$1.50. Lothrop, Lee & Shepard company.

Fourth volume of the "Lakport Series." Tells what the boys did when the foot ball season came around. The story, however, is not all foot ball. Some jolly times on the water and on an island are depicted.

WINNING HIS SHOULDER STRAPS, By Norman Brainerd, 220 pp., \$1.50. Lothrop, Lee & Shepard company.

First volume of the "Five Chums Series." A story of life in a military school in which athletics are plentifully featured.

MOTHER TUCKER'S SEVEN, By Angeline W. Wray, 201 pp., \$1.50. Lothrop, Lee & Shepard company.

Tells the story of a merry active life of a family forced to find pleasure in most economical ways.

ment work. Illustrated from photographs taken from the United States Geological survey.

Miscellaneous.
THE BOOK OF CHRISTMAS, Introduction by Hamilton W. Mabie, drawings by George Wharton Edwards, 328 pp., \$1.25. The Macmillan company.

This volume comprises many things that have been written about Christmas, its customs, beliefs, spirit and sport.

THE RUBAIYAT OF OMAR KHAYYAM, Fitzgerald Centenary Edition. Illustrations and special designs in color by Willy Pogany, 65. Thomas Y. Crowell & Co.

A beautiful specimen of bookmaker's art, with the text printed in fantastic English type, each quatrains having a page to itself.

WAGS, The Philosophy of the Peaceful Pup, By Morgan Shepard, 60c. A. Wessels.

Humorous verse about dogs.
CRITICAL ESSAYS OF THE SEVENTEENTH CENTURY, Vol. III, 1655-1700. Edited by J. E. Spingarn, 374 pp., \$1.75. Oxford. At the Clarendon Press.

Selections from the work of, with commentary upon, Robert Walsley, Sir William Temple, John Dennis, William Wotton, Jeremy Collier and other seventeenth century critics.

WEBSTER'S NEW INTERNATIONAL DICTIONARY OF THE ENGLISH LANGUAGE, Edited by W. T. Harris and Sturges Allen, 2520 pp., G. & C. Merriam company.

The latest revised version of the dictionary compiled by Noah Webster with many supplements.

THE CROWN OF INDIVIDUALITY, By William George Jordan, 24 pp., H. Fleming H. Revell company.

In this volume of counsel the author takes for his keynote individuality and carries the theme through many situations which every one must face.

COURT LIFE IN CHINA, By Isaac Taylor Headland, 306 pp., \$1.50. Fleming H. Revell company.

The Chinese officials, the capital and its people are sketched by the author, who is a professor in Peking university. These sketches have appeared in a number of the popular magazines.

PRactical AGRICULTURE, By John W. Wilkinson, A. M., 233 pp., H. American Book company.

A complete and practical treatise on agriculture, horticulture, forestry, landscape gardening, roads and road-building and country life conveniences.

IN STARLAND WITH A THREE-INCH TELESCOPE, By William Taylor DeWitt, 148 pp., H. G. P. Putnam's Sons.

A conveniently arranged guide for the use of the amateur astronomer with forty diagrams of the constellations and eight of the moon.

NEW PHYSICAL LABORATORY MANUAL, By Charles F. Adams, 192 pp., 60 cents. American Book company.

In this volume the author embodies the results of twelve years' experience in laboratory work in physics.

"AND THE CAT CAME BACK"
A Domestic Episode with Enough Powder for an Explosion.

A Pittsburg society woman and her husband are working at cross purposes, and some of their friends are awaiting the outcome with much interest.

Some days ago the woman discovered she had lost gems and jewelry valued at over \$5,000. She couldn't figure out just whether she had lost them or whether they had been stolen. But they had disappeared, and being so valuable and because her husband had often chided her for being careless about her gems she feared to tell him.

Three prominent business men chanced to meet in a downtown store and were trading gossip. One happened to mention that a close friend of his, a prominent East End woman, had lost some valuable jewelry, and was very much worried about it; so much so she had come to his office and had him engage a detective.

"Maybe it can be of some service in the case," spoke up one of the party. "A friend of mine a day or two ago loaned a man \$5,000 on some jewelry. The fellow said he had been caught in the stock market, and preferred to borrow on the jewelry rather than sell his automobile, because the auto was such a comfort to his wife."

"Can you give me the name of the man who borrowed on them?" asked the woman's friend.

The borrower's name was mentioned.

"Good heavens! He's my lady friend's husband!"

Now the three business men are waiting to see how it comes out.—Pittsburg Dispatch.

Love Adventure Plot Mystery

all combine to make "Room Number Three At Three Forks Tavern" a little more exciting than any story you ever read. A crackerjack detective story written around the dramatic figure of the young and falsely suspected heroine. A great story—the greatest work of the famous author of "The Leavenworth Case," and "The Millionaire Baby."

Anna Katharine Green

In the same number are: "The True Story of a Young Actress," "How a Woman Built an Aeroplane," "Votes for Women from the Inside," "Why I Left the Woman's Club," the last writing of Edward Everett Hale, eight good stories, and seventy pages of practical departments—all in the November
